

Florida

Summer 2011

Title V Women's Health-Related Priority Needs:

- ▶ Prevent unintended and unwanted pregnancies.
- ▶ Promote preconception health screening and education.

State Performance and Outcome Measures Associated with Women's Health-Related Priority Needs

State Performance Measure 2: Increase time intervals between pregnancies.

Data Source: Vital statistics

Measure Definition: Percent of births with an interpregnancy interval of fewer than 18 months.

State Performance Measure 3: Increase the number of women who received preconception screening and counseling prior to pregnancy.

Data Source: PRAMS; vital statistics

Measure Definition: Of those women who gave birth in the calendar year reported, the percent who received preconception counseling.

Additional Data Associated with Women's Health-Related Priority Needs

This section lists other data sources that Title V agencies included in their 2010 Needs Assessments regarding the status of women's health outside of pregnancy.

Percent of births that were mistimed (being wanted later) and unwanted (not being wanted then or at any time in the future).

Data Source: PRAMS; vital statistics

The information presented here reflects only women's health-related content reported by the Title V agency in its FY 2011 MCH Block Grant Application, FY 2009 Annual Report and 2010 Needs Assessment. This information, as well as all Title V agencies' most current priority needs, performance and outcome measures, can be found at:
