

Mississippi

Summer 2011

Title V Women's Health-Related Priority Needs:

- ▶ Low birthweight and preterm birth, preconception care.
- ▶ Sexually transmitted infections.
- ▶ Adult immunizations.

State Performance and Outcome Measures Associated with Women's Health-Related Priority Needs

State Performance Measure 7: Reduce the number of chlamydia, gonorrhea, and syphilis cases per 100,000 women aged 13–44.

Data Source: Mississippi State Dept of Health, Office of Epidemiology

Measure Definition: Number of chlamydia, gonorrhea, and syphilis cases among women aged 13–44 divided by the number of women aged 13–44.

State Performance Measure 8: Increase the percent of women aged 13–44 years who received an influenza vaccination within the last year.

Data Source: Patient Information Management System (PIMS)

Measure Definition: Number of women aged 13–44 who received an influenza vaccination within the last year divided by the number of women aged 13–44.

Additional Data Associated with Women's Health-Related Priority Needs

This section lists other data sources that Title V agencies included in their 2010 Needs Assessments regarding the status of women's health outside of pregnancy.

None included.

The information presented here reflects only women's health-related content reported by the Title V agency in its FY 2011 MCH Block Grant Application, FY 2009 Annual Report and 2010 Needs Assessment. This information, as well as all Title V agencies' most current priority needs, performance and outcome measures, can be found at: <https://perfddata.hrsa.gov/MCHB/TVISReports/MeasurementData/MeasurementDataMenu.aspx>
