

Montana

Summer 2011

Title V Women's Health-Related Priority Needs:

- ▶ Increase the number of Medicaid clients with an identified risk factor during a previous live birth (gestational diabetes, preconception obesity) who receives follow up care.

State Performance and Outcome Measures Associated with Women's Health-Related Priority Needs

State Performance Measure 3: Increase the percent of Medicaid clients who have an identified risk factor during a previous live birth and receive follow-up by primary care or public health providers.

Data Source: State Medicaid claims data; vital statistics; a to-be-determined data source tracking follow-up with women with identified risk factors

Measure Definition: Medicaid clients who experienced an identified risk factor (gestational diabetes, preterm birth, preconception obesity) related to a previous live birth who receive follow-up care from a primary care or public health provider prior to a subsequent pregnancy.

Additional Data Associated with Women's Health-Related Priority Needs

This section lists other data sources that Title V agencies included in their 2010 Needs Assessments regarding the status of women's health outside of pregnancy.

Percent of women with a live birth who were obese or overweight prior to pregnancy.

Data Source: Vital statistics

The information presented here reflects only women's health-related content reported by the Title V agency in its FY 2011 MCH Block Grant Application, FY 2009 Annual Report and 2010 Needs Assessment. This information, as well as all Title V agencies' most current priority needs, performance and outcome measures, can be found at: <https://perfdata.hrsa.gov/MCHB/TVISReports/MeasurementData/MeasurementDataMenu.aspx>
