

ABOUT THE TITLE V MATERNAL AND CHILD HEALTH BLOCK GRANT PROGRAM

Title V is one of the largest federal block grant programs. It is a key source of support for promoting and improving the health and well-being of the nation's mothers, children, including children with special needs, and their families.

Title V funds are distributed to 59 states and jurisdictions to create federal/state partnerships that support service systems for addressing current and emerging MCH challenges and significantly reducing infant mortality, such as:

- Providing comprehensive care for women before, during, and after pregnancy and childbirth
- Providing preventive and primary care services for infants, children, and adolescents
- Providing comprehensive care for children and adolescents with special health care needs
- Immunizing all children
- Assuring access to care for all mothers and children
- Meeting the nutritional and developmental needs of mothers, children, and families

ABOUT THE TVIS

Each of the 59 States and jurisdictions that receive Title V MCH Block Grant funding is required to report annually on the health impacts achieved. Based on their identified priority needs, States select eight of 15 National Performance Measures (NPMs) for programmatic focus. In addition, States may develop one or more State Performance Measures (SPMs) or State Outcome Measures to address identified MCH priority needs that are not addressed by the national performance or outcome measures. These data as well as other state-reported financial and program data are publicly accessible on the TVIS at <https://mchb.tvisdata.hrsa.gov>.

MOST COMMONLY SELECTED NATIONAL PERFORMANCE MEASURES

MEASURE NUMBER	MEASURE SHORT NAME	POPULATION DOMAIN(S)
NPM 1	Well-Woman Visit	Women/Maternal Health
NPM 4	Breastfeeding	Perinatal/Infant Health
NPM 6	Developmental Screening	Child Health
NPM 8	Adolescent Well Visit	Child Health, Adolescent Health
NPM 11	Medical Home	Child Health, Adolescent Health, Children with Special Health Care Needs

HIGHLIGHTS OF THE FY 2017 TVIS DATA RELEASE

INVESTMENT

The Title V MCH federal-state partnership investment was **MORE THAN \$6 BILLION.**

86% pregnant women, **99%** of infants, and **55%** of children nationally benefited from a Title V-supported service.

MORE THAN 69% of the total federal and state/local Title V funds expended supported services for children with special health care needs.

Included in the over **48 MILLION** children served, Title V supported direct and/or enabling services for almost **2 MILLION** children with special health care needs.

ACCOUNTABILITY

NPMs that addressed well-woman visit, breastfeeding, developmental screening and medical home were selected by forty or **MORE OF THE 59** states and jurisdictions.

The number of performance measures selected by an individual state **RANGED FROM 5-11** NPMs in the FY 2019 Application/FY 2017 Annual Report.

NATIONAL PERFORMANCE TRENDS

Smoking in pregnancy (NPM 14.1) **DECREASED BY 22%** from 2010 to 2016.

Between 2000 and 2017, the national Infant Mortality rate **DECLINED 16%** and the Child Mortality rate **DECLINED 25%**.

Exclusive breastfeeding for 6 months (NPM 4B) **INCREASED BY 45%** from 2010 to 2014.

Babies sleeping on their back (NPM 5) **INCREASED BY 9%** from 2010 to 2015.

Injury hospitalization of children (NPM 7.1) **DECREASED BY 19%** from 2010 to 2015.
