Discretionary Grant Performance Measures

OMB No. 0915-0298
Expires: 06/30/2022

Attachment B:
Core Measures, Population Domain Measures, Program-Specific Measures (Detail Sheets)

OMB Clearance Package

Public Burden Statement: An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control number for this project is 0915-0298. Public reporting burden for this collection of information is estimated to average 36 hours per response, including the time for reviewing instructions, searching existing data sources, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to HRSA Reports Clearance Officer, 5600 Fishers Lane, Room 14N-39, Rockville, Maryland, 20857.

### Core 3 PERFORMANCE MEASURE

**Goal:** Health Equity  
**Level:** Grantee  
**Domain:** Capacity Building

<table>
<thead>
<tr>
<th>GOAL</th>
<th>To ensure MCHB grantees have established specific aims related to improving health equity.</th>
</tr>
</thead>
<tbody>
<tr>
<td>MEASURE</td>
<td>The percent of MCHB funded projects with specific measurable aims related to promoting health equity.</td>
</tr>
</tbody>
</table>
| DEFINITION | **Tier 1:** Are you promoting and/or facilitating health equity in your program?  
- Yes  
- No  
**Tier 2:** Please select within which of the following domains your program addresses health equity (check all that apply):  
- Income  
- Race  
- Ethnicity  
- Language  
- Socioeconomic Status  
- Health Status  
- Disability  
- Sexual Orientation  
- Sex  
- Gender  
- Age  
- Geography – Rural/Urban  
- Other: _________  
**Tier 3:** Implementation  
Has your program set stated goal/objectives for health equity? Y/N  
If yes, what are those aims? _______________  
**Tier 4:** What are the related outcomes?  
% of programs that met stated goals/objectives around health equity  
- **Numerator:** # of programs that met stated specific aims around health equity  
- **Denominator:** # of programs that set specific aims around health equity  

* Health equity exists when challenges and barriers have been removed for those groups who experience greater obstacles to health based on their racial or ethnic group; religion; socioeconomic status; gender; age; mental health; cognitive, sensory, or physical disability; sexual orientation or gender identity; geographic location; or other characteristics historically linked to discrimination or exclusion.

### BENCHMARK DATA SOURCES

N/A

### GRANTEE DATA SOURCES

Grantee self-reported.

### SIGNIFICANCE

Health equity is achieved when every individual has the opportunity to attain his or her full health potential and no one is
“disadvantaged from achieving this potential because of social position or socially determined consequences.” Achieving health equity is a top priority in the United States.
CB 1 PERFORMANCE MEASURE

Goal: State capacity for advancing the health of MCH populations (for National programs)
Level: Grantee
Domain: Capacity Building

GOAL
To ensure adequate and increasing state capacity for advancing the health of MCH populations.

MEASURE
The percent of MCHB-funded projects of a national scale promoting and facilitating state capacity for advancing the health of MCH populations, and through what processes.

DEFINITION
Tier 1: Are you promoting and facilitating state capacity for advancing the health of MCH populations for _________’s* priority topic?
☐ Yes
☐ No

*prepopulated with program focus

Tier 2: Through what activities are you promoting and facilitating state capacity for advancing the health of MCH populations?
☐ Delivery of training on program priority topic
☐ Support state strategic planning activities
☐ Serve as expert and champion on the priority topic
☐ Facilitate state level partnerships to advance priority topics
☐ Maintain consistent state-level staffing support for priority topic (State-level programs only)
☐ Collect data to track changes in prevalence of program priority issues
☐ Utilize available data to track changes in prevalence of program priority issue on national/regional level
☐ Issue model standards of practice for use in the clinical setting

Tier 3: Implementation
☐ # of professionals trained on program priority topic
☐ How frequently are data collected and analyzed to monitor status and refine strategies?:
  o Less frequently than annually
  o Bi-annual
  o Quarterly
  o Monthly
☐ # of MOUs between State agencies addressing priority area
☐ # of State agencies/departments participating on priority area. This includes the following key state agencies (check all that apply):
  ☐ Commissions/Task Forces
  ☐ MCH/CSHCN
  ☐ Genetics
  ☐ Newborn Screening
  ☐ Early Hearing and Detection
  ☐ EMSC
### CB 1 PERFORMANCE MEASURE

**Goal:** State capacity for advancing the health of MCH populations (for National programs)
**Level:** Grantee
**Domain:** Capacity Building

The percent of programs promoting and facilitating state capacity for advancing the health of MCH populations.

- Oral Health
- Developmental Disabilities
- Medicaid
- Mental & Behavioral Health
- Housing
- Early Intervention/Head Start
- Education
- Child Care
- Juvenile Justice/Judicial System
- Foster Care/Adoption Agency
- Transportation
- Higher Education
- Law Enforcement
- Children’s Cabinet
- Other (Specify______)

- Have model standards of practice been established to increase integration of MCH priority issue into clinical setting? Y/N
- Development or identification of reimbursable services codes to cover delivery of clinical services on MCH priority topic? Y/N
- Inclusion of specific language in Medicaid managed care contracts to assure coverage of payment for clinical services on MCH priority topic? Y/N

**Tier 4:** What are the related outcomes in the reporting year? (National Programs Only)

- % of state/jurisdictions have a strategic plan on program priority topic
- % of states/jurisdictions receiving training on this program topic
- % of states/jurisdictions which have state FTEs designated for this MCH topic
- % of MCH programs have an identified state lead designated on this topic
- % of states/jurisdictions utilizing reimbursable services codes to cover delivery of clinical services on MCH priority topic?
- % of states/jurisdictions which report progress on strategic plan goals and objectives?

### BENCHMARK DATA SOURCES

N/A

### GRANTEE DATA SOURCES

Grantee Self-Reported.
**CB 2 PERFORMANCE MEASURE**

**Goal:** Technical Assistance  
**Level:** Grantee  
**Domain:** Capacity Building

The percent of programs providing technical assistance on MCH priority topics.

**GOAL**

To ensure supportive programming for technical assistance.

**MEASURE**

The percent of MCHB funded projects providing technical assistance, on which MCH priority topics, and to whom.

**DEFINITION**

**Tier 1:** Are you providing technical assistance (TA) though your program?
- Yes
- No

**Tier 2:** To whom are you providing TA (check all that apply)?
- Participants/ Public
- Providers/ Health Care Professionals
- Local/ Community Partners
- State/ National Partners

*Technical Assistant refers to collaborative problem solving on a range of issues, which may include program development, program evaluation, needs assessment, and policy or guideline formulation. It may include administrative services, site visitation, and review or advisory functions. TA may be a one-time or ongoing activity of brief or extended frequency.*
CB 2 PERFORMANCE MEASURE

Goal: Technical Assistance
Level: Grantee
Domain: Capacity Building

The percent of programs providing technical assistance on MCH priority topics.

Tier 3: Implementation (populated from prior domain questions)
- CSHCN/Developmental Disabilities TA
- Autism TA
- Prenatal Care TA
- Perinatal/Postpartum Care TA
- Maternal and Women’s Depression Screening TA
- Safe Sleep TA
- Breastfeeding TA
- Newborn Screening TA
- Genetics TA
- Quality of Well Child Visit TA
- Well Visit TA
- Injury Prevention TA
- Family Engagement TA
- Medical Home TA
- Transition TA
- Adolescent Major Depressive Disorder Screening TA
- Health Equity TA
- Adequate health insurance coverage TA
- Tobacco and eCigarette Use TA
- Oral Health TA
- Nutrition TA
- Data Research and Evaluation TA
- Other TA

(Please specify additional topics: ______________)

Tier 4: What are the related outcomes in the reporting year?
(populated from prior questions)
- receiving TA
- technical assistance activities
- TA activities by target audience (Local, Title V, Other state agencies, partners, Regional, National, International)

GRANTEE DATA SOURCES

Grantee self-reported.

SIGNIFICANCE

National Resource Centers, Policy Centers, leadership training institutes and many other MCHB discretionary grantees provide technical assistance and training to various target audiences, including grantees, health care providers, state agencies, community-based programs, program beneficiaries, and the public as a way of improving skills, increasing the MCH knowledge base, and thus improving capacity to adequately serve the needs of MCH populations and improve their outcomes.
Data Collection Form for #CB 2

The form below will be prepopulated by TA selected in domain-specific measures.
All measures for which a grantee reported that they provide TA will be triggered in this table.

**Instructions:** Please report the number of TA activities for each audience. If TA activities reached multiple audiences, please count for each audience, without concern for duplication. Participants/public include infants, children, adolescents, adult participants, and families. Community/local partners are considered to be community-based organizations or municipal or city divisions, programs, or organizations including schools. State or national partners include state or federal divisions or programs, as well as statewide or national organizations, such as non-profit organizations and non-governmental organizations.

**CB 3 PERFORMANCE MEASURE**

<table>
<thead>
<tr>
<th>Goal: Impact Measurement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Level: Grantee</td>
</tr>
<tr>
<td>Domain: Capacity Building</td>
</tr>
</tbody>
</table>

The percent of grantees that collect and analyze data on the impact of their grants on the field.

**GOAL**
To ensure supportive programming for impact measurement.

**MEASURE**
The percent of grantees that collect and analyze data on the impact of their grants on the field, and the methods used to collect data.

**DEFINITION**

**Tier 1:** Are you collecting and analyzing data related to impact measurement in your program?
- [ ] Yes
- [ ] No

**Tier 2:** How are you measuring impact?
- [ ] Conduct participant surveys
- [ ] Collect client level data
- [ ] Qualitative assessments
- [ ] Case reports
- [ ] Other: _______________

**Tier 3:** Implementation
- [ ] List of tools used
  - Specify Tools: _______________
- [ ] Outcomes of qualitative assessment
  - [ ] # of participant surveys
  - [ ] # of clients whose level data collected
  - [ ] # of case reports

**Tier 4:** What are the related outcomes in the reporting year?
% of grantees that collect data on the impact of their grants on the field (and methods used to collect data)
- **Numerator:** # of grantees that collect data on the impact of their grants on the field
- **Denominator:** # of grantees

How is data collected: ____________________
% of grantees that collect and analyze data on the impact of their grants on the field (and methods used to analyze data)
- **Numerator:** # of grantees that analyze data on the impact of their grants on the field
- **Denominator:** # of grantees

How is data analyzed: ____________________

**GRANTEE DATA SOURCES**
Grantee self-reported.

**SIGNIFICANCE**
Impact as referenced here is a change in condition or status of life. This can include a change in health, social, economic or environmental condition. Examples may include improved health for a community/population or a reduction in disparities for a specific disease or increased adoption of a practice.
**CB 4 PERFORMANCE MEASURE**

**Goal:** Sustainability  
**Level:** Grantee  
**Domain:** Capacity Building

The percent of MCHB funded initiatives working to promote sustainability of their programs or initiatives beyond the life of MCHB funding.

**GOAL**

To ensure sustainability of programs or initiatives over time, beyond the duration of MCHB funding.

**MEASURE**

The percent of MCHB funded initiatives working to promote sustainability of their programs or initiatives beyond the life of MCHB funding, and through what methods.

**DEFINITION**

**Tier 1:** Are you addressing sustainability in your program?
- Yes  
- No

**Tier 2:** Through what processes/mechanisms are you addressing sustainability?
- A written sustainability plan is in place within two years of the MCHB award with goals, objectives, action steps, and timelines to monitor plan progress
- Staff and leaders in the organization engage and build partnerships with consumers, and other key stakeholders in the community, in the early project planning, and sustainability planning and implementation processes
- There is support for the MCHB-funded program or initiative within the parent agency or organization, including from individuals with planning and decision making authority
- There is an advisory group or a formal board that includes family, community and state partners, and other stakeholders who can leverage resources or otherwise help to sustain the successful aspects of the program or initiative
- The program’s successes and identification of needs are communicated within and outside the organization among partners and the public, using various internal communication, outreach, and marketing strategies
- The grantee identified, actively sought out, and obtained other funding sources and in-kind resources to sustain the entire MCHB-funded program or initiative
- Policies and procedures developed for the successful aspects of the program or initiative are incorporated into the parent or another organization’s system of programs and services
- The responsibilities for carrying out key successful aspects of the program or initiative have begun to be transferred to permanent staff positions in other ongoing programs or organizations
- The grantee has secured financial or in-kind support from within the parent organization or external organizations to sustain the successful aspects of the MCHB-funded program or initiative

**Tier 3:** Implementation  
N/A

**Tier 4:** What are the related outcomes?
<table>
<thead>

<td></td>
</tr>
</tbody>
</table>

**BENCHMARK DATA SOURCES**
N/A

**GRANTEE DATA SOURCES**
Grantee self-reported.

**SIGNIFICANCE**
In recognition of the increasing call for recipients of public funds to sustain their programs after initial funding ends, MCHB encourages grantees to work toward sustainability throughout their grant periods. A number of different terms and explanations have been used as operational components of sustainability. These components fall into four major categories, each emphasizing a distinct focal point as being at the heart of the sustainability process: (1) adherence to program principles and objectives, (2) organizational integration, (3) maintenance of health benefits, and (4) State or community capacity building. Specific recommended actions that can help grantees build toward each of these four sustainability components are included as the Tier 2 data elements for this measure.
CB 5 PERFORMANCE MEASURE

Goal: Scientific Publications
Level: Grantee
Domain: Capacity Building

The percent of programs supporting the production of scientific publications and through what means, and related outcomes.

GOAL
To ensure supportive programming for the production of scientific publications.

MEASURE
The percent of MCHB funded projects programs supporting the production of scientific publications.

DEFINITION

Tier 1: Are you supporting the production of scientific publications in your program?
☐ Yes
☐ No

Tier 2: Indicate the categories of scientific publication that have been produced with grant support (either fully or partially) during the reporting period.
☐ Submitted
☐ In press
☐ Published

Tier 3: How many are reached through those activities?
# of scientific/ peer-reviewed publications

Tier 4: How, if at all, have these publications been disseminated (check all that apply)?
Note: research only; include this as Part B of publications form
☐ TV/ Radio interview(s)
☐ Newspaper interview(s)
☐ Online publication interview(s)
☐ Press release
☐ Social Networking sites
☐ Listservs
☐ Presentation at conference (poster, abstract, presentation)
☐ Websites

GRANTEE DATA SOURCES
Grantee self-reported.

SIGNIFICANCE
Advancing the field of MCH based on evidence-based, field-tested quality products. Collection of the types of and dissemination of MCH products and publications is crucial for advancing the field. This measure addresses the production and quality of new informational resources created by grantees for families, professionals, other providers, and the public.
**CB 6 PERFORMANCE MEASURE**

**Goal:** Products  
**Level:** Grantee  
**Domain:** Capacity Building

The percent of programs supporting the development of informational products and through what means, and related outcomes.

**GOAL**

To ensure supportive programming for the development of informational products.

**MEASURE**

The percent of MCHB funded projects supporting the development of informational products, and through what processes.

**DEFINITION**

**Tier 1:** Are you creating products as part of your MCHB-supported program?
- ☐ Yes
- ☐ No

**Tier 2:** Indicate the categories of products that have been produced with grant support (either fully or partially) during the reporting period.  
*Count the original completed product, not each time it is disseminated or presented.*
- ☐ Books
- ☐ Book chapters
- ☐ Reports and monographs (including policy briefs, best practice reports, white papers)
- ☐ Conference presentations and posters presented
- ☐ Web-based products (website, blogs, webinars, newsletters, distance learning modules, wikis, RSS feeds, social networking sites) Excluding video/audio products that are posted online post-production
- ☐ Audio/Video products (podcasts, produced videos, video clips, CD-ROMs, CDs, or audio)
- ☐ Press communications (TV/Radio interviews, newspaper interviews, public service announcements, and editorial articles)
- ☐ Newsletters (electronic or print)
- ☐ Pamphlets, brochures, or fact sheets
- ☐ Academic course development
- ☐ Distance learning modules
- ☐ Doctoral dissertations/ Master’s theses
- ☐ Other: __________________

**Tier 3:** Implementation of products  
# products created in each category

**GRANTEE DATA SOURCES**

Grantee self-reported.

**SIGNIFICANCE**

Advancing the field of MCH based on evidence-based, field-tested quality products. Collection of the types of and dissemination of MCH products and publications is crucial for advancing the field. This PM addresses the production and quality of new informational resources created by grantees for families, professionals, other providers, and the public.
**Goal: Direct Annual Access to MCH Data**

**Level: Grantee**

**Domain: Capacity Building**

**Goal:** The percent of programs promoting and facilitating state capacity for direct annual access to MCH electronic health data.

**Measure:**

To ensure state capacity for accessing electronic health data on a timely basis for programming and/or reporting.

**Definition:** The percent of programs that are consistently accessing direct electronic MCH health data to support planning, monitoring, and evaluation on a timely basis.

<table>
<thead>

---

¹ Consistent Annual Access Yes = 1; No = 0
² Direct Access to an Electronic Database for Analysis Yes = 1; No = 0
³ Consistent Annual and Direct Access Yes = 1; No = 0
⁴ If Available More Often Than Annually, Indicate Most Frequent Availability Yes = 1; No = 0
⁵ Indicate Lag Length for Most Timely Data Available in Number of Months
⁶ Indicate Lag Lengths Less than 6 months Yes = 1; No = 0
## II. RELATED OUTCOMES

A. Percentage of unlinked data sources with consistent and direct annual access
   ______ (Column C Percentage)

B. Percentage of data sources available more frequently than annually
   ______ (Column D Percentage)

C. Percentage of data sources with a lag length of ≤6 months
   ______ (Column E Percentage)

D. Percentage of data sources linked to Vital Records Birth ________ (Column F Percentage)

### GRANTEE DATA SOURCES

MCH State Databases

### SIGNIFICANCE

Timely and comprehensive data are required for needs assessments and program design.

---

7 Only Sum 1’s; Include only Unshaded Cells in Sums
8 Calculate Percentage = Sum/N
Please use the form below to identify what services you provide to each segment. For those you provide the service to, please provide the number of services provided (i.e., # of women receiving referrals or # of partners receiving TA). For those services you do not provide, or segments you do not reach, please leave the cell blank.

WHM 1 PERFORMANCE MEASURE

Goal: Prenatal Care
Level: Grantee
Domain: Women’s/ Maternal Health

GOAL
To ensure supportive programming for prenatal care.

MEASURE
The percent of MCHB funded projects addressing prenatal care.
The percent of pregnant program participants who receive prenatal care beginning in the first trimester.

DEFINITION
Tier 1: Are you addressing prenatal care in your program?
- Yes
- No

Tier 2: Through what processes/mechanisms are you addressing prenatal care?
- Technical Assistance
- Training
- Product Development
- Research/ Peer-reviewed publications
- Outreach/ Information Dissemination/ Education
- Tracking/ Surveillance
- Screening/ Assessment
- Referral/ care coordination
- Direct Service
- Quality improvement initiatives

Tier 3: How many are reached through those activities? (Report in Table 1: Activity Data Collection Form)
- # receiving TA
- # receiving training
- # products developed
- # peer-reviewed publications published
- # receiving information and education through outreach
- # receiving screening/ assessment
- # referred/care coordinated
- # received direct service
- # participating in quality improvement initiatives

Tier 4: What are the related outcomes?
% of pregnant women who receive prenatal care beginning in the first trimester

Numerator: Pregnant program participants who began prenatal care in the first trimester of pregnancy.
Denominator: Pregnant program participants who were enrolled prenatally, prior to their second trimester of pregnancy.

BENCHMARK DATA SOURCES
Related to MICH Objective #10: Increase the proportion of pregnant women who receive prenatal care beginning in the first trimester (Baseline: 70.8% in 2007, Target: 77.9%)

GRANTEE DATA SOURCES
Title V Ntnl Outcome Measure #1, Healthy People 2020 MICH-10

SIGNIFICANCE
Entry of prenatal care during the first trimester is important to ensuring a healthy pregnancy. Women who receive delayed
<table>

WHM 2 PERFORMANCE MEASURE

Goal: Perinatal/ Postpartum Care
Level: Grantee
Domain: Women’s/ Maternal Health

The percent of programs promoting and/or facilitating timely postpartum care.

GOAL
To ensure supportive programming for postpartum care.

MEASURE
The percent of MCHB funded projects addressing perinatal and postpartum care.
The percent of pregnant women with a postpartum visit within 4-6 weeks of delivery

DEFINITION
Tier 1: Are you promoting and/or facilitating timely postpartum care in your program?
☐ Yes
☐ No

Tier 2: Through what processes/mechanisms are you promoting and/or facilitating perinatal and postpartum care?
☐ Technical Assistance
☐ Training
☐ Product Development
☐ Research/Peer-reviewed publications
☐ Outreach/Information Dissemination/Education
☐ Tracking/Surveillance
☐ Screening/Assessment
☐ Referral/care coordination
☐ Direct Service
☐ Quality improvement initiatives

Tier 3: How many are reached through those activities?
(Report in Table 1: Activity Data Collection Form)
# receiving TA
# receiving training
# products developed
# peer-reviewed publications published
# receiving information and education through outreach
# receiving screening/assessment
# referred/care coordinated
# received direct service
# participating in quality improvement initiatives

Tier 4: What are the related outcomes in the reporting year?
% of pregnant women with a postpartum visit within 4 to 6 weeks after delivery

Numerator: Women program participants who enrolled prenatally or within 30 days after delivery and received a postpartum visit within 4-6 weeks after delivery

Denominator: Women program participants who enrolled prenatally or within 30 days after delivery during the reporting period

Definition: ACOG recommends that the postpartum visit occur between 4-6 weeks after delivery. ACOG suggests a 7-14 day postpartum visit for high-risk

1 Consistent with Healthy Start Benchmark 3: The percent of Healthy Start women participants who receive a postpartum visit.
2 PRAMS measures 4-6 weeks, a visit between 28-42 days of delivery.
WHM 2 PERFORMANCE MEASURE

Goal: Perinatal/ Postpartum Care
Level: Grantee
Domain: Women’s/ Maternal Health

The percent of programs promoting and/or facilitating timely postpartum care.

A participant who has a visit prior to 4-6 weeks must still have a visit between 4-6 weeks to meet the standard and be included in the numerator.

BENCHMARK DATA SOURCES

Related to Healthy People 2020 MICH- 19: Increase the proportion of women giving birth who attend a postpartum care visit with a health worker.

Pregnancy Risk Assessment Monitoring System (PRAMS) (91% in 14 states with no timing restriction, 2011); Healthcare Effectiveness Data and Information Set (HEDIS) – (61.8% Medicaid HMO, 2014)

GRANTEE DATA SOURCES

Grantee Data System; Pregnancy Risk Assessment Monitoring System

SIGNIFICANCE

Since the period immediately following birth is a time of many physical and emotional adjustments, the postpartum visit is important for educating new mothers on what to expect during this period and address any concerns which may arise. Additional issues include any health complications the mother may have and the health benefits of breastfeeding for the mother and baby.

ACOG Committee on Obstetric Practice. Guidelines for Perinatal Care (7th Edition, p. 207) state that 4 to 6 weeks after delivery, women should have a postpartum visit with her doctor.

1 Note: ACOG suggests a 7-14 day postpartum visit for high-risk women.

- Screening/ Assessment
- Referral/ care coordination
- Direct Service
- Quality improvement initiatives

Tier 3: How many are reached through those activities?
(Report in Table 1: Activity Data Collection Form)
- # receiving TA
- # receiving training
- # products developed
- # peer-reviewed publications published
- # receiving information and education through outreach
- # receiving screening/ assessment
- # referred/care coordinated
- # received direct service
- # participating in quality improvement initiatives

Tier 4: What are the related outcomes in the reporting year?
- % of women with a well woman/ preventative visit in the past year.5

Numerator: Women program participants who received a well-woman or preventive visit (including prenatal or postpartum visit) in the past 12 months prior to last assessment within the reporting period.
Denominator: Women program participants during the reporting period

Definition: A participant is considered to have a well-woman or preventive visit and included in the numerator if she has a documented health assessment visit where she obtained recommended preventive care.

---

5 Consistent with Healthy Start Benchmark 5: The percent of Healthy Start women participants who have a well-woman visit.

**BENCHMARK DATA SOURCES**
- BRFSS (Women 18-44 with a past-year preventive visit: 65.2%, 2013); Vital Statistics (any prenatal care: 98.4%, 2014); PRAMS (postpartum visit: 91%, 2011)

**GRANTEE DATA SOURCES**
- Grantee Data Systems

**SIGNIFICANCE**
A number of illnesses that affect women can be prevented when proper well-woman care is a priority and even illnesses that can't be prevented have a much better prognosis when detected early during a regular well-woman care exam. ACOG recommends annual assessments to counsel patients about preventive care and to provide or refer for recommended services. These assessments should include screening, evaluation and counseling, and immunizations based on age and risk factors.⁶

</tr>
</tbody>
</table>

BENCHMARK DATA SOURCES

Related to Healthy People 2020 MICH #34 Objective: (Developmental) Decrease the proportion of women delivering a live birth who experience postpartum depressive symptoms. PRAMS (depression screening)

GRANTEE DATA SOURCES

Grantee Data Systems

SIGNIFICANCE

Perinatal depression is one of the most common medical complications during pregnancy and may include major and minor depressive episodes. It is important to identify women with depression because when untreated, mood disorders can have adverse effects on women, infants, and families. Often, perinatal depression goes unrecognized because the changes are often attributed to normal pregnancy, such as changes in sleep and appetite. Therefore, it is important and recommended that clinicians screen patients at least once during the perinatal period for depression. Although screening is important for detecting perinatal depression, screening by itself is insufficient to improve clinical outcomes and must be paired with appropriate follow-up and treatment when indicated.⁹

</tr>
</tbody>
</table>

**Tier 4:** What are the related outcomes in the reporting year?

% of infants placed to sleep following safe sleep practices

**Numerator:** Number of child program participants (aged <12 months) whose parent/caregiver reports that they are placed to sleep following all three AAP recommended safe sleep practices.

**Denominator:** Total number of child program participants aged <12 months.

A participant is considered to engage in safe sleep practices and included in the numerator if it is reported that the baby is ‘always’ or ‘most often’ 1) placed to sleep on their back, 2) always or often sleeps alone in his or her own crib or bed with no bed

---

1 Consistent with Healthy Start Benchmark 6: Percent of Healthy Start participants who are placed to sleep following safe sleep behaviors.

PIH 1 PERFORMANCE MEASURE

Goal: Safe Sleep  
Level: Grantee  
Domain: Perinatal Infant Health

The percent of Healthy Start participants who engage in safe sleep practices.

sharing, and 3) sleeps on a firm sleep surface (crib, bassinet, pack and play, etc.) with no soft objects or loose bedding.  
The requirement is that the baby is placed on their back to sleep. If they roll over onto their stomach after being placed to sleep, the standard is met. Although safe sleep behaviors are self-reported, programs are encouraged to observe safe sleep practices during home visits, as possible.

BENCHMARK DATA SOURCES

Related to MICH Objective #20: Increase the proportion of infants placed to sleep on their backs (Baseline: 69.0%, Target: 75.9%), Pregnancy Risk Assessment Monitoring System (PRAMS) Phase 7, Question 48 (Sleep Position) and F1 (Bed Sharing).  

GRANTEE DATA SOURCES

Grantee Data Systems

SIGNIFICANCE

Sleep-related infant deaths, called Sudden Unexpected Infant Deaths (SUIDS), are the leading cause of infant death after the first month of life. Risk of SUIDS increases when babies are placed on their side or stomach to sleep. Placing babies on their back, on a firm surface without loose bedding or soft objects, as well as no bed-sharing are the recommended practices to follow according to American Assoc. of Pediatrics. It is estimated that 14% of infant deaths—those categorized as Sudden Unexpected Infant Death (SUID)—may be prevented by changing the ways babies are put down to sleep.

</tbody>
</table>

**BENCHMARK DATA SOURCES**

Ever breastfed: Pregnancy Risk Assessment Monitoring System (83.9%, 2011); Vital Statistics (81%, 2014); National Immunization Survey (80%, 2012) Breastfed at 6 months: CDC National Immunization Survey (51.4%, 2012)

**GRANTEE DATA SOURCES**

Grantee data systems.

**SIGNIFICANCE**

The American Academy of Pediatrics recommends breastfeeding for the first six months because scientific studies have shown that breastfeeding is good for both the baby’s and mother’s health. Breastmilk contains vitamins and nutrients babies need for good health and to protect the baby from disease. Research shows that any amount of breastfeeding is beneficial for the baby and that skin-to-skin contact of breastfeeding has physical and emotional benefits. Some studies have found that breastfeeding may reduce risk for certain diseases while also increasing cognitive development.

**BENCHMARK DATA SOURCES**

Objective # MICH-32: Increase appropriate newborn-blood spot screening and follow-up testing (Baseline: 98.3% in 2006, Target: 100%)

**GRANTEE DATA SOURCES**

Title V National Outcome Measure #12

**SIGNIFICANCE**

Newborn screening detects thousands of babies each year with potentially devastating, but treatable disorders. The benefits of newborn screening depend upon timely collection of the newborn blood-spots or administration of a point-of-care test (pulse oximeter for critical congenital heart disease), receipt of the newborn blood spot at the laboratory, testing of the newborn blood spot, and reporting out all results. Timely detecting prevents death and other significant health complications.
CH 1 PERFORMANCE MEASURE

Goal: Well Child Visit
Level: Grantee
Domain: Child Health

The percent of programs promoting and/or facilitating well-child visits.

GOAL
To ensure supportive programming for well-child visits.

MEASURE
The percent of MCHB funded projects promoting and/or facilitating well-child visits.

DEFINITION
Tier 1: Are you promoting and/or facilitating well-child visits in your program?
☐ Yes
☐ No

Tier 2: Through what activities are you promoting and/or facilitating well-child visits?

CH 2 PERFORMANCE MEASURE

Goal: Quality of Well Child Visit  
Level: Grantee  
Domain: Child Health

The percent of programs promoting and/ or facilitating quality of well-child visits.

GOAL
To ensure supportive programming for quality of well child visits.

MEASURE
The percent of MCHB funded projects promoting or facilitating quality of well child visits.

DEFINITION
Tier 1: Are you addressing the quality of well child visits in your program?

☐ Yes  
☐ No

Tier 2: Through what activities are you addressing quality of well child visits?

☐ Technical Assistance  
☐ Training  
☐ Product Development  
☐ Research/ Peer-reviewed publications  
☐ Outreach/ Information Dissemination/ Education  
☐ Quality improvement initiatives

Tier 3: How many are reached through those activities?

# receiving TA  
# receiving training  
# product disseminated  
# reached while guideline setting  
# peer-reviewed publications published  
# receiving information and education through outreach  
# participating in quality improvement initiatives

See data collection form below.

Tier 4: What are the related outcomes in the reporting year?

% providers trained in conducting a quality well-child visit  

Numerator: # of providers trained  
Denominator: # of providers targeted through the program

BENCHMARK DATA SOURCES
N/A

GRANTEE DATA SOURCES
Grantee self-reported.

SIGNIFICANCE
Children grow and develop very rapidly so it is important they see a pediatrician on a regular basis. Each visit should include a complete physical examination, record of height and weight, and information regarding hearing, vision, and annual screenings.

### CH 3 PERFORMANCE MEASURE

<table>
<thead>
<tr>
<th>Goal: Developmental Screening</th>
<th>Percent of programs promoting developmental screenings and follow-up for children.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Level: Grantee</td>
<td></td>
</tr>
<tr>
<td>Domain: Child Health</td>
<td></td>
</tr>
</tbody>
</table>

### SIGNIFICANCE

Early identification of developmental disorders is critical to the well-being of children and their families. It is an integral function of the primary care medical home and an appropriate responsibility of all pediatric health care professionals. The early identification of developmental problems should lead to further developmental and medical evaluation, diagnosis, and treatment, including early developmental intervention. Children diagnosed with developmental disorders should be identified as children with special health care needs, and chronic-condition management should be initiated. Identification of a developmental disorder and its underlying etiology may also drive a range of treatment planning, from medical treatment of the child to family planning for his or her parents.
CH 4 PERFORMANCE MEASURE

Goal: Injury Prevention  
Level: Grantee  
Domain: Child Health

The percent of programs promoting and/or facilitating injury prevention among children.

GOAL

To ensure supportive programming for injury prevention among children.

MEASURE

The percent of MCHB funded projects addressing injury prevention and through what processes.

DEFINITION

Tier 1: Are you promoting and/or facilitating injury prevention among children in your program?

☐ Yes  
☐ No

Tier 2: Through what processes/mechanisms are you addressing injury-prevention? See data collection form.

☐ Technical Assistance  
☐ Training  
☐ Research/dissemination  
☐ Peer-reviewed publications  
☐ Outreach/Information Dissemination/Education  
☐ Referral/care coordination  
☐ Quality improvement initiatives  
☐ Use of fatality review data

Please check which child safety domains which program activities were designed to impact:

☐ Motor Vehicle Traffic  
☐ Suicide/Self-Harm  
☐ Falls  
☐ Bullying  
☐ Child Maltreatment  
☐ Unintentional Poisoning  
☐ Prescription drug overdose  
☐ Traumatic Brain Injury  
☐ Drowning  
☐ Other

Tier 3: How many are reached through those activities?

# receiving TA  
# receiving professional/organizational development training  
# of peer-reviewed publications published  
# receiving information and education through outreach  
# referred/managed  
% using fatality review data

See data collection form.

Tier 4: What are the related outcomes in the reporting year?

Rate of injury-related hospitalization to children ages 1-9.

Numerator: Injury-related hospitalizations to children ages 1-9  
Denominator: Children ages 1-9 in the target population

Target Population: ____________________

Percent of children ages 6-11 missing 5 or more days of school because of illness or injury.
**CH 4 PERFORMANCE MEASURE**

**Goal:** Injury Prevention  
**Level:** Grantee  
**Domain:** Child Health

The percent of programs promoting and/or facilitating injury prevention among children.

**Numerator:** 
# of children ages 6-11 missing 5 or more days of school

**Denominator:** 
Total number of children ages 6-11 represented in National Survey of Children’s Health results Dataset reporting from: __________________________

---

**BENCHMARK DATA SOURCES**

Related to Healthy People 2020 Injury and Violence Prevention objectives 1 through 39.

**GRANTEE DATA SOURCES**

Title V National Performance Measure #7 Child Injury, AHRQ Healthcare Cost and Utilization Project: National Inpatient Sample or State Inpatient Database; National Survey of Children’s Health, Question G1 in the 6-11 year old survey

---

**SIGNIFICANCE**

Two dozen children die every day in the United States from an unintentional or intentional injury. In addition, millions of children survive their injury and have to live the rest of their lives with negative health effects. Although there has been much progress in the United States in reducing child injuries, more is needed.

CSHCN 1 PERFORMANCE MEASURE

Goal: Family Engagement
Level: Grantee
Domain: CSHCN

The percent of programs promoting and/or facilitating family engagement among children and youth with special health care needs.

GOAL

To ensure supportive programming for family engagement among children and youth with special health care needs.

MEASURE

The percent of MCHB funded projects promoting and/or facilitating family engagement among children and youth with special health care needs.

DEFINITION

Tier 1: Are you promoting and/or facilitating family engagement among children and youth with special health care needs in your program?

- Yes
- No

Tier 2: Through what processes/mechanisms are you promoting and/or facilitating family engagement?

- Technical Assistance
- Training
- Product Development
- Research/Peer-reviewed publications
- Outreach/Information Dissemination/Education
- Tracking/Surveillance
- Screening/Assessment
- Referral/care coordination
- Direct Service
- Quality improvement initiatives

Tier 3: How many are reached through those activities? (Report in Table 1: Activity Data Collection Form)

- # receiving TA
- # receiving training
- # products developed
- # peer-reviewed publications published
- # receiving information and education through outreach
- # receiving screening/assessment
- # referred/care coordinated
- # received direct service
- # participating in quality improvement initiatives

Tier 4: What are the related outcomes?

% of target population with family and CSHCN leaders with meaningful roles on community/state/regional/national level teams focused on CSHCN systems

**Numerator:** # of Family and CSHCN leaders with meaningful roles on community/state/regional/national level teams focused on CSHCN systems

**Denominator:** # of CSHCN in catchment area

% of racial and ethnic family and CSHCN leaders who are trained and serving on community/state/regional/national level teams focused on CSHCN systems

**Numerator:** # of racial and ethnic family and CSHCN leaders trained and serving on community/state/regional/national level teams focused on CSHCN systems

</tbody>
</table>

**Definitions:**

- **Family Engagement** is defined as “patients, families, their representatives, and health professionals working in active partnership at various levels across the health care system to improve health and health care.” This definition is not intended to negate the various levels or degree to which the interaction between families and professionals can take place.

- **Family and Youth Leaders** are family members who have experience navigating through service systems and are knowledgeable and skilled in partnering with professionals to carry out necessary system changes. Family members are not limited to the immediate family within the household.

- **Meaningful [Support] Roles** for family members/leaders are above and beyond “feedback” surveys. Families are considered to have a meaningful role in decision making when the partnership involves all elements of shared decision-making which are: collaboration, respect, information sharing, encouragement and consideration of preferences and values, and shared responsibility for outcomes.

**BENCHMARK DATA SOURCES**

Related to Healthy People 2020 Family Planning Objectives

**GRANTEE DATA SOURCES**

Title V National Performance Measure #2

**SIGNIFICANCE**

In recent years, policy makers and program administrators have emphasized the central role of family engagement in policy-making activities. In accordance with this philosophy, MCHB is facilitating such partnerships at the local, state and national levels.

While there has been a significant increase in the level and types of family engagement, there is still a need to share strategies and mechanisms to recruit, train, monitor, and evaluate family engagement as a key component for CSHCN.
CSHCN 2 PERFORMANCE MEASURE

Goal: Access to and Use of Medical Home
Level: Grantee
Domain: CSHCN

The percent of programs promoting and/or facilitating medical home access and use among children and youth with special health care needs.

GOAL

To ensure supportive programming medical home access and use among children and youth with special health care needs.

MEASURE

The percent of MCHB-funded projects promoting and/or facilitating medical home access and use among children and youth with special health care needs.

DEFINITION

Tier 1: Are you promoting and/or facilitating medical home access and use among children and youth with special health care needs?

☐ Yes  ☐ No

Tier 2: Through what processes/mechanisms are you addressing medical home access and use?

☐ Technical Assistance
☐ Training
☐ Product Development
☐ Research/Peer-reviewed publications
☐ Outreach/Information Dissemination/Education
☐ Tracking/Surveillance
☐ Screening/Assessment
☐ Referral/care coordination
☐ Direct Service
☐ Quality improvement initiatives

Tier 3: How many are reached through those activities?

(Report in Table 1: Activity Data Collection Form)

# receiving TA
# receiving training
# products developed
# peer-reviewed publications published
# receiving information and education through outreach
# receiving screening/assessment
# referred/care coordinated
# received direct service
# participating in quality improvement initiatives

Tier 4: What are the related outcomes?

% of target population that demonstrate a direct linkage to a coordinated medical home community as a direct result of activities conducted by project

Numerator: Target population with a demonstrated direct linkage to a coordinated medical home.

Denominator: Target population (as identified in grantee application)

Definitions: Medical Home: The pediatric medical home can be defined by the AAP as having the following characteristics: the medical care of infants, children, and adolescents ideally should be accessible, continuous, comprehensive, family-centered, coordinated, compassionate, and culturally effective. It should be delivered or directed by well-trained physicians who provide

**Denominator:** Total number of transition practices sponsored by grantee
CSHCN 3 PERFORMANCE MEASURE

| Goal: Transition | The percent of programs promoting and/or facilitating transition to adult health care for youth with special health care needs. |
| Level: Grantee | Domain: CSHCN |

% of grantees initiating or encouraging transition planning early in adolescence

Numerator: Number of Grantees promoting transition planning early in adolescence
Denominator: Total number of grantees reporting transition performance measure

% of grantees linking transition efforts with medical home initiatives

Numerator: Number of Grantees promoting transition as part of routine medical home care
Denominator: Total number of grantees reporting transition performance measure

% of grantees linking transition efforts with adolescent preventive care efforts

Numerator: Number of grantees promoting transition as part of routine adolescent preventive care
Denominator: Total number of grantees reporting transition performance measure

Definitions: The terms “assessed for readiness” and “deemed ready” used here refer to language utilized by gottransition.org.

Health care transition: is the process of changing from a pediatric to an adult model of health care. The goal of transition is to optimize health and assist youth in reaching their full potential. To achieve this goal requires an organized transition process to support youth in acquiring independent health care skills, preparing for an adult model of care, and transferring to new providers without disruption in care.

Transition Readiness: Assessing youth’s transition readiness and self-care skills is the third element in these health care transition quality recommendations. Use of a standardized transition assessment tool is helpful in engaging youth and families in setting health priorities; addressing self-care needs to prepare them for an adult approach to care at age 18, and navigating the adult health care system, including health insurance. Providers can use the results to jointly develop a plan of care with youth and families. Transition readiness assessment should begin at age 14 and continue through adolescence and young adulthood, as needed.

BENCHMARK DATA SOURCES

NA

GRANTEE DATA SOURCES

Title V National Performance Measure #6 and #12, NS-CSHCN Survey Outcome #6

SIGNIFICANCE

Transitioning of children to adolescent services to adult services is important to ensure that growth and development is adequately and accurately screened throughout all stages. These stages of life represent a time of rapid development and it is important to make sure changes are documented and children and receiving appropriate treatment, preventive services, and screenings.

### BENCHMARK DATA SOURCES

Healthy People 2020, MHMD 11.2 – Increase the proportion of primary care physician office visits where youth aged 12 to 18 years are screened for depression (Baseline 2.1 in 2007, Target: 2.3%); Healthy People 2020 Objective MHMD-4.1. Percent of adolescents aged 12 to 17 years experienced a major depressive episode (Baseline: 8.3% in 2008, Target: 7.5%)

### GRANTEE DATA SOURCES

Grantee Data Systems

### SIGNIFICANCE

Major depression is becoming more and more common in the United States. Major depression entails interference with the ability to work, sleep, study, eat, and enjoy life. Screening for this disorder can identify individuals and effectively treat them.
LC 1 PERFORMANCE MEASURE

Goal: Adequate Health Insurance Coverage
Level: Grantee
Domain: Life Course/ Cross Cutting

The percent of programs promoting and/or facilitating adequate health insurance coverage.

GOAL

To ensure supportive programming for adequate health insurance coverage.

MEASURE

The percent of MCHB funded projects promoting and/or facilitating adequate health insurance coverage.

DEFINITION

Tier 1: Are you promoting and/or facilitating adequate health insurance coverage in your program?

☐ Yes
☐ No

Tier 2: Through what activities are you promoting and/or facilitating adequate health insurance coverage?

☐ Technical Assistance
☐ Training
☐ Product Development
☐ Research/ Peer-reviewed publications
☐ Outreach/ Information Dissemination/ Education
☐ Tracking/ Surveillance
☐ Screening/ Assessment
☐ Referral to insurance enrollment
☐ Quality improvement initiatives

Tier 3: How many are reached through those activities?

See data LC 1 Data Collection Form.

Tier 4: What are the related outcomes?

% with health insurance¹

Numerator: Program participants with health insurance as of the last assessment during the reporting period
Denominator: Program participants during the reporting period

Participants are identified as not insured if they report not having any of the following: private health insurance, Medicare, Medicaid, Children’s Health Insurance Program (CHIP), State-sponsored or other government-sponsored health plan, or military plan at the time of the interview. A participant is also defined as uninsured if he or she reported having only Indian Health Service coverage, or only a private plan that paid for one type of service such as family planning, accidents, or dental care. For more information regarding health insurance questions please refer to Section VII (page 35) of the 2014 National Health Interview Survey (NHIS) Survey Description.

% with adequate health insurance in the reporting year

Numerator: Program participants who reported having adequate insurance coverage during the reporting period
Denominator: Program participants during the reporting period

¹ Consistent with Healthy Start Benchmark 1: The percent of Healthy Start women and child participants with health insurance.
**LC 1 PERFORMANCE MEASURE**

| Goal: Adequate Health Insurance Coverage | The percent of programs promoting and/or facilitating adequate health insurance coverage. |
| Level: Grantee | |
| Domain: Life Course/ Cross Cutting | |

**BENCHMARK DATA SOURCES**

Related to HP2020 Access to Health Services Objective 1: Increase the proportion of persons with health insurance. (Baseline: 83.2% persons had medical insurance in 2008, Target: 100%); National Survey of Children’s Health (Children’s Average 94.5%, 2011/2012),\(^2\) National Health Interview Survey\(^3\)

**GRANTEE DATA SOURCES**

Grantee data systems

**SIGNIFICANCE**

Individuals who acquire health insurance are more likely to have access to a usual source of care, receive well child care and immunizations, to have developmental milestones monitored, and receive prescription drugs, appropriate care for asthma and basic dental services. Insured children not only receive more timely diagnosis of serious health care conditions but experience fewer avoidable hospitalizations, improved asthma outcomes and fewer missed school days.

**GRANTEE DATA SOURCES**

Title V National Performance Measure #13

**SIGNIFICANCE**

Oral health is a vital component of overall health. Access to oral health care, good oral hygiene and adequate nutrition are essential components of oral health to help ensure individuals achieve and maintain oral health. Those with limited preventive oral health services access are at a greater risk for oral diseases.

| Training 01 PERFORMANCE MEASURE | Goal: Family/ Youth/ Community Engagement in MCH Training and Healthy Tomorrows Programs  
Level: Grantee  
Domain: MCH Workforce Development | The percent of MCHB training and Healthy Tomorrows programs that ensure family, youth, and community member participation in program and policy activities. |
<p>| GOAL | To increase family, youth, and/or community member participation in MCH Training and Healthy Tomorrows programs. |
| MEASURE | The percent of MCHB training and Healthy Tomorrows programs that ensure family/ youth/ community member participation in program and policy activities. |
| DEFINITION | Attached is a table of five elements that demonstrate family member/youth/community member participation, including an emphasis on partnerships and building leadership opportunities for family members/youth/community members in MCH Training or Healthy Tomorrows programs. Please check yes or no to indicate if your MCH Training Program or Healthy Tomorrows program has met each element. |
| BENCHMARK DATA SOURCES | PHL-3: Increase the proportion of Council on Education for Public Health (CEPH) accredited schools of public health, CEPH accredited academic programs, and schools of nursing (with a public health or community health component) that integrate Core Competencies for Public Health Professionals into curricula. |
| GRANTEE DATA SOURCES | Attached data collection form to be completed by grantee. |
| SIGNIFICANCE | Over the last decade, policy makers and program administrators have emphasized the central role of families and other community members as advisors and participants in program and policy-making activities. In accordance with this philosophy, MCH Training Programs and Healthy Tomorrows Programs are facilitating such partnerships at the local, State and national levels. MCH Training programs support interdisciplinary/interprofessional graduate education and training programs that emphasize leadership, and family-centered, community-based, and culturally competent systems of care. Training programs are required to incorporate family members/youth/community members as faculty, trainees, and partners. The Healthy Tomorrows program supports community initiated and community-based projects that apply principles of health promotion, disease prevention, and the benefits of coordinated health care to the provision of services that improve access to comprehensive, community-based, family-centered, |</p>

<tr>
<td>MEASURE</td>
<td>The percent of MCHB training and Healthy Tomorrows programs that have integrated cultural and linguistic competence into their policies, guidelines, and training.</td>
</tr>
<tr>
<td>DEFINITIONS</td>
<td>Attached is a checklist of 6 elements that demonstrate cultural and linguistic competency. Please check yes or no to indicate if your MCH Training or Healthy Tomorrows program has met each element. Please keep the completed checklist attached. Cultural and linguistic competence is a set of congruent behaviors, attitudes, and policies that come together in a system, agency, or among professionals that enables effective work in cross-cultural situations. ‘Culture’ refers to integrated patterns of human behavior that include the language, thoughts, communications, actions, customs, beliefs, values, and institutions of racial, ethnic, religious, or social groups. ‘Competence’ implies having the capacity to function effectively as an individual and an organization within the context of the cultural beliefs, behaviors, and needs presented by consumers and their communities. (Adapted from Cross, 1989; cited from National Center for Cultural Competence [<a href="http://nccc.george">http://nccc.george</a> to wn.edu/foundations/frameworks.html]) Linguistic competence is the capacity of an organization and its personnel to communicate effectively, and convey information in a manner that is easily understood by diverse audiences including persons of limited English proficiency, those who have low literacy skills or are not literate, and individuals with disabilities. Linguistic competency requires organizational and provider capacity to respond effectively to the health literacy needs of populations served. The organization must have policy, structures, practices, procedures, and dedicated resources to support this capacity. (Goode, T. and W. Jones, 2004. National Center for Cultural Competence; <a href="http://www.nccccurricula.info/linguisticcompetence.html">http://www.nccccurricula.info/linguisticcompetence.html</a> ) Cultural and linguistic competency is a process that occurs along a developmental continuum. A culturally and linguistically competent program is characterized by elements including the following: written strategies for advancing cultural competence; cultural and linguistic competency policies and practices; cultural and...</td>

- linguistic competence knowledge and skills building efforts; research data on populations served according to racial, ethnic, and linguistic groupings; faculty and other instructors are racially and ethnically diverse; faculty and staff participate in professional development activities related to cultural and linguistic competence; and periodic assessment of trainees’ progress in developing cultural and linguistic competence.

**BENCHMARK DATA SOURCES**

Related to the following HP2020 Objectives:

PHI-3: Increase the proportion of Council on Education for Public Health (CEPH) accredited schools of public health, CEPH accredited academic programs, and schools of nursing (with a public health or community health component) that integrate Core Competencies for Public Health Professionals into curricula

PHI-12: Increase the proportion of public health laboratory systems (including State, Tribal, and local) which perform at a high level of quality in support of the 10 Essential Public Health Services

ECBP-11: Increase the proportion of local health departments that have established culturally appropriate and linguistically competent community health promotion and disease prevention programs

**GRANTEE DATA SOURCES**

Attached data collection form is to be completed by grantees.

There is no existing national data source to measure the extent to which MCHB supported programs have incorporated cultural competence elements into their policies, guidelines, and training.

**SIGNIFICANCE**

Over the last decade, researchers and policymakers have emphasized the central influence of cultural values and cultural/linguistic barriers: health seeking behavior, access to care, and racial and ethnic disparities. In accordance with these concerns, cultural competence objectives have been: (1) incorporated into the Division of MCH Workforce Development strategic plan; and (2) in guidance materials related to the MCH Training and Healthy Tomorrows Programs.

The Division of MCH Workforce Development provides support to programs that address cultural and linguistic competence through development of curricula, research, learning and practice environments.
DATA COLLECTION FORM FOR DETAIL SHEET: Training 02 – Cultural Competence in MCH Training and Healthy Tomorrows Programs

<table>
<thead>
<tr>
<th>Goal: Healthy Tomorrow’s Partnership</th>
</tr>
</thead>
<tbody>
<tr>
<td>Level: Grantee</td>
</tr>
<tr>
<td>Domain: MCH Workforce Development</td>
</tr>
</tbody>
</table>

The degree to which the Healthy Tomorrows Partnership for Children program collaborates with State Title V agencies, other MCH or MCH-related programs.

GOAL
To assure that the Healthy Tomorrows program has collaborative interactions related to professional development, policy development and product development and dissemination with relevant national, state and local MCH programs, agencies and organizations.

MEASURE
The degree to which a Healthy Tomorrows program collaborates with State Title V agencies, other MCH or MCH-related programs and other professional organizations.

DEFINITION
Attached is a list of the 7 elements that describe activities carried out by Healthy Tomorrows programs for or in collaboration with State Title V and other agencies on a scale of 0 to 1 (0=no; 1=yes). If a value of ‘1’ (yes) is selected, provide the number of activities for the element. The total score for this measure will be determined by the sum of those elements noted as ‘1.’

BENCHMARK DATA SOURCES
ECBP-11(Developmental) Increase the proportion of local health departments that have established culturally appropriate and linguistically competent community health promotion and disease prevention programs …
ECBP-2: Increase the proportion of elementary, middle, junior high, and senior high schools that provide comprehensive school health education to prevent health problems.
ECBP-12 Increase the inclusion of core clinical prevention and population health content in M.D.-granting medical schools.
ECBP-13: Increase the inclusion of core clinical prevention and population health content in in D.O.-granting medical schools.
ECBP-15: Increase the inclusion of core clinical prevention and population health content in in nurse practitioner training.
ECBP-17: Increase the inclusion of core clinical prevention and population health content in in Doctor of Pharmacy (PharmD) granting colleges and schools of pharmacy.
PHI-2(Developmental) Increase the proportion of Tribal, State, and local public health personnel who receive continuing education consistent with the Core Competencies for Public Health Professionals.

GRANTEE DATA SOURCES
The Healthy Tomorrows program completes the attached table which describes the categories of collaborative activity.

¹State Title V programs include State Block Grant funded or supported activities.
²Other maternal and child health-related programs (both MCHB-funded and funded from other sources) include, but are not limited to:

- State Health Department
- State Adolescent Health
- Social Service Agency
- Medicaid Agency
- Education
- Juvenile Justice
- Early Intervention
- Home Visiting
- Professional Organizations/Associations
- Family and/or Consumer Group
- Foundations
- Clinical Program/Hospitals
- Local and state division of mental health
- Developmental disability agencies
- Other programs working with maternal and child health populations
**GOAL**

To assure that a training program has collaborative
interactions related to training, technical assistance,
continuing education, and other capacity-building
services with relevant national, state and local programs,
agencies and organizations.

**MEASURE**

The degree to which a training program collaborates with
State Title V agencies, other MCH or MCH-related
programs and other professional organizations.

**DEFINITION**

Attached is a list of the 6 elements that describe activities
carried out by training programs for or in collaboration
with State Title V and other agencies on a scale of 0 to 1.
If a value of ‘1’ is selected, provide the number of
activities for the element. The total score for this
measure will be determined by the sum of those elements
noted as ‘1.’

**BENCHMARK DATA SOURCES**

ECBP-11(Developmental) Increase the proportion of
local health departments that have established culturally
appropriate and linguistically competent community
health promotion and disease prevention programs.
ECBP-12 Increase the inclusion of core clinical
prevention and population health content in M.D.-
granting medical schools.
ECBP-13: Increase the inclusion of core clinical
prevention and population health content in in D.O.-
granting medical schools.
ECBP-15: Increase the inclusion of core clinical
prevention and population health content in in nurse
practitioner training.
ECBP-17: Increase the inclusion of core clinical
prevention and population health content in in Doctor of
Pharmacy (PharmD) granting colleges and schools of
pharmacy
PHI-2(Developmental) Increase the proportion of Tribal,
State, and local public health personnel who receive
continuing education consistent with the Core
Competencies for Public Health Professionals

**GRANTEE DATA SOURCES**

The training program completes the attached table which
describes the categories of collaborative activity.

**SIGNIFICANCE**

As a SPRANS grantee, a training program enhances the
Title V State block grants that support the MCHB goal to
promote comprehensive, coordinated, family-centered,
and culturally-sensitive systems of health care that serve

*Ongoing collaborations with clinical locations should be counted as one activity (For example: multiple trainees rotate through the same community-based clinical site over the course of the year. This should be counted as one activity.)
Training 05 PERFORMANCE MEASURE

Goal: Policy Development
Level: Grantee
Domain: MCH Workforce Development

The degree to which MCH long-term training grantees engage in policy development, implementation, and evaluation.

GOAL

To increase the number of MCH long-term training programs that actively promote the transfer and utilization of MCH knowledge and research to the policy arena through the work of faculty, trainees, alumni, and collaboration with Title V.

MEASURE

The degree to which MCH long-term training grantees engage in policy development, implementation, and evaluation.

DEFINITION

Attached is a list of six elements that demonstrate policy engagement. Please check yes or no to indicate which the elements have been implemented. Please keep the completed checklist attached. Policy development, implementation and evaluation in the context of MCH training programs relates to the process of translating research to policy and training for leadership in the core public health function of policy development. Actively – mutual commitment to policy-related projects or objectives within the past 12 months.

BENCHMARK DATA SOURCES

Related to PHI-3: Increase the proportion of Council on Education for Public Health (CEPH) accredited schools of public health, CEPH accredited academic programs, and schools of nursing (with a public health or community health component) that integrate Core Competencies for Public Health Professionals into curricula.

GRANTEE DATA SOURCES

• Attached data collection form to be completed by grantee.
• Data will be collected from competitive and continuation applications as part of the grant application process and annual reports. The elements of training program engagement in policy development, implementation, and evaluation need to be operationally defined with progress noted on the attached list with an example described more fully in the narrative application.

SIGNIFICANCE

Policy development is one of the three core functions of public health as defined by the Institute of Medicine in The Future of Public Health (National Academy Press, Washington DC). In this landmark report by the IOM, the committee recommends that “every public health agency exercise its responsibility to serve the public interest in the development of comprehensive public health policies by promoting use of the scientific knowledge base in decision-making about public health and by leading in developing public health policy.” Academic institutions such as schools of public health and research universities have the dual responsibility to develop knowledge and to produce well-trained

## Training 06 PERFORMANCE MEASURE

<table>
<thead>
<tr>
<th>Goal: Long Term Training Programs</th>
<th>The percentage of participants in MCHB long-term training programs who are from underrepresented racial and ethnic groups.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Level: Grantee</td>
<td></td>
</tr>
<tr>
<td>Domain: MCH Workforce Development</td>
<td></td>
</tr>
</tbody>
</table>

### GOAL

To increase the percentage of trainees participating in MCHB long-term training programs who are from underrepresented racial and ethnic groups.

### MEASURE

The percentage of participants in MCHB long-term training programs who are from underrepresented racial and ethnic groups.

### DEFINITION

**Numerator:** Total number of long-term trainees (≥ 300 contact hours) participating in MCHB training programs reported to be from underrepresented racial and ethnic groups. (Include MCHB-supported and non-supported trainees.)

**Denominator:** Total number of long-term trainees (≥ 300 contact hours) participating in MCHB training programs. (Include MCHB-supported and non-supported trainees.)

**Units:** 100

**Text:** Percentage

The definition of “underrepresented racial and ethnic groups” is based on the categories from the U.S. Census.

### BENCHMARK DATA SOURCES

Related to Healthy People 2020 Objectives:

- AHS-4: Increase the number of practicing primary care providers
- ECBP-11: (Developmental) Increase the proportion of local health departments that have established culturally appropriate and linguistically competent community health promotion and disease prevention programs

### GRANTEE DATA SOURCES

Data will be collected annually from grantees about their trainees.

MCHB does not maintain a master list of all trainees who are supported by MCHB long-term training programs.

References supporting Workforce Diversity:

### SIGNIFICANCE
DATA COLLECTION FORM FOR DETAIL SHEET: Training 06 – Long Term Training Programs

Report on the percentage of long-term trainees (≥300 contact hours) who are from any underrepresented racial/ethnic group (i.e., Hispanic or Latino, American Indian or Alaskan Native, Asian, Black or African-American, Native Hawaiian or Pacific Islander, two or more race (OMB). Please use the space provided for notes to detail the data source and year of data used.

- Report on all long-term trainees (≥ 300 contact hours) including MCHB-funded and non MCHB-funded trainees
- Report race and ethnicity separately
- Trainees who select multiple ethnicities should be counted once
- Grantee reported numerators and denominator will be used to calculate percentages

Total number of long term trainees (≥ 300 contact hours) participating in the training program. (Include MCHB-supported and non-supported trainees.)

**GOAL**
To increase the number of pipeline graduates that enter graduate programs preparing them to work with the MCH population.

**MEASURE**
The percent of pipeline graduates that enter graduate programs preparing them to work with the MCH population.

**DEFINITION**

**Numerator:** Total number of MCH Pipeline trainees enrolled in or who have completed a graduate school program* preparing them to work with the MCH population, 2 or 5 years after graduating from the MCH Pipeline program.

*Graduate programs preparing students to work with the MCH population include: pediatric medicine, public health, pediatric nutrition, public health social work, pediatric nursing, pediatric dentistry, psychology, health education, health administration, pediatric occupational/physical therapy, or speech language pathology.

**Denominator:** Total number of MCH Pipeline Trainees who graduated from the MCH pipeline program 2 or 5 years previously.

**BENCHMARK DATA SOURCES**
Related to Healthy People 2020 Objectives:

- ECBP-12: Increase the inclusion of core clinical preventive and population health content in M.D.-granting medical schools
- ECBP-13: Increase the inclusion of core clinical preventive and population health content in D.O.-granting medical schools
- ECBP-14: Increase the inclusion of core clinical preventive and population health content in undergraduate nursing
- ECBP-15: Increase the inclusion of core clinical preventive and population health content in nurse practitioner training
- ECBP-16: Increase the inclusion of core clinical preventive and population health content in physician assistant training
- PHI-1: Increase the proportion of Federal, Tribal, State, and local public health agencies that incorporate Core Competencies for Public Health Professionals into job descriptions and performance evaluations

DATA COLLECTION FORM FOR DETAIL SHEET: Training 10 – Field Leadership

SECTION A: 2 YEAR FOLLOW-UP

Numerator: The number of long-term trainees who have demonstrated field leadership after completing their MCH Training Program.

Denominator: The total number of long-term trainees, following completion of an MCHB-funded training program, included in this report.

Long-term trainees are defined as those who have completed a long-term (greater than or equal to 300 contact hours) MCH training program, including those who received MCH funds and those who did not.

A. The total number of long-term trainees, post program completion, included in this report

B. The total number of program completers lost to follow-up

C. Number of respondents (A-B)

D. Number of respondents who have demonstrated field leadership in at least one of the following areas below

E. Percent of long-term trainees (post program completion) who have demonstrated field leadership in at least one of the following areas:

(Individual respondents may have leadership activities in multiple areas below)

1. Number of trainees that have participated in academic leadership activities since completing their MCH Training Program
   - Disseminated information on MCH Issues (e.g., Peer-reviewed publications, key presentations, training manuals, issue briefs, best practices documents, standards of care)
   - Conducted research or quality improvement on MCH issues
   - Provided consultation or technical assistance in MCH areas
   - Taught/mentored in my discipline or other MCH related field
   - Served as a reviewer (e.g., for a journal, conference abstracts, grant, quality assurance process)
   - Procured grant and other funding in MCH areas
   - Conducted strategic planning or program evaluation

2. Number of trainees that have participated in clinical leadership activities since completing their MCH Training Program
   - Participated as a group leader, initiator, key contributor or in a position of influence/authority on any of the following: committees of State, national, or local organizations; task forces; community boards; advocacy groups; research societies; professional societies; etc.
   - Served in a clinical position of influence (e.g. director, senior therapist, team leader, etc.
   - Taught/mentored in my discipline or other MCH related field
   - Conducted research or quality improvement on MCH issues
   - Disseminated information on MCH Issues (e.g., Peer-reviewed publications, key presentations, training manuals, issue briefs, best practices documents, standards of care)
• Served as a reviewer (e.g., for a journal, conference abstracts, grant, quality assurance process)

3. Number of trainees that have participated in **public health practice** leadership activities since completing their MCH Training Program

• Provided consultation, technical assistance, or training in MCH areas
• Procured grant and other funding in MCH areas
• Conducted strategic planning or program evaluation
• Conducted research or quality improvement on MCH issues
• Served as a reviewer (e.g., for a journal, conference abstracts, grant, quality assurance process)
• Participated in public policy development activities (e.g., Participated in community engagement or coalition building efforts, written policy or guidelines, provided testimony, educated policymakers, etc.)

4. Number of trainees that have participated in **public policy & advocacy** leadership activities since completing their MCH Training Program

• Participated in public policy development activities (e.g., participated in community engagement or coalition building efforts, written policy or guidelines, influenced MCH related legislation, provided testimony, educated legislators)
• Participated on any of the following as a group leader, initiator, key contributor, or in a position of influence/authority: committees of State, national, or local organizations; task forces; community boards; advocacy groups; research societies; professional societies; etc.
• Disseminated information on MCH public policy issues (e.g., Peer-reviewed publications, key presentations, training manuals, issue briefs, best practices documents, standards of care, commentaries, and chapters)

**SECTION B: 5 YEAR FOLLOW-UP**

**Numerator:** The number of long-term trainees who have demonstrated field leadership 5 years after completing their MCH Training Program.

**Denominator:** The total number of long-term trainees, 5 years following completion of an MCHB-funded training program, included in this report.

Long-term trainees are defined as those who have completed a long-term (greater than or equal to 300 contact hours) MCH training program, including those who received MCH funds and those who did not.

F. The total number of long-term trainees, **5 years** post program completion, included in this report

G. The total number of program completers lost to follow-up

H. Number of respondents (A-B)

I. Number of respondents who have demonstrated field leadership in **at least** one of the following areas below

J. Percent of long-term trainees (**5 years** post program completion) who have demonstrated field leadership in **at least one** of the following areas:

(Individual respondents may have leadership activities in multiple areas below)

1. **Number of trainees that have participated in** academic **leadership activities** since completing their MCH Training Program
• Disseminated information on MCH Issues (e.g., Peer-reviewed publications, key presentations, training manuals, issue briefs, best practices documents, standards of care)
• Conducted research or quality improvement on MCH issues
• Provided consultation or technical assistance in MCH areas
• Taught/mentored in my discipline or other MCH related field
• Served as a reviewer (e.g., for a journal, conference abstracts, grant, quality assurance process)
• Procured grant and other funding in MCH areas
• Conducted strategic planning or program evaluation

2. **Number of trainees that have participated in** clinical leadership activities since completing their MCH Training Program

• Participated as a group leader, initiator, key contributor or in a position of influence/authority on any of the following: committees of State, national, or local organizations; task forces; community boards; advocacy groups; research societies; professional societies; etc.
• Served in a clinical position of influence (e.g. director, senior therapist, team leader, etc)
• Taught/mentored in my discipline or other MCH related field
• Conducted research or quality improvement on MCH issues
• Disseminated information on MCH Issues (e.g., Peer-reviewed publications, key presentations, training manuals, issue briefs, best practices documents, standards of care)
• Served as a reviewer (e.g., for a journal, conference abstracts, grant, quality assurance process)

3. **Number of trainees that have participated in** public health practice leadership activities since completing their MCH Training Program

• Provided consultation, technical assistance, or training in MCH areas
• Procured grant and other funding in MCH areas
• Conducted strategic planning or program evaluation
• Conducted research or quality improvement on MCH issues
• Served as a reviewer (e.g., for a journal, conference abstracts, grant, quality assurance process)
• Participated in public policy development activities (e.g., Participated in community engagement or coalition building efforts, written policy or guidelines, provided testimony, educated policymakers, etc.)

4. **Number of trainees that have participated in** public policy & advocacy leadership activities since completing their MCH Training Program

• Participated in public policy development activities (e.g., participated in community engagement or coalition building efforts, written policy or guidelines, influenced MCH related legislation, provided testimony, educated legislators)
• Participated on any of the following as a group leader, initiator, key contributor, or in a position of influence/authority: committees of State, national, or local organizations; task forces; community boards; advocacy groups; research societies; professional societies; etc.
• Disseminated information on MCH public policy issues (e.g., Peer-reviewed publications, key presentations, training manuals, issue briefs, best practices documents, standards of care, commentaries, and chapters)

Long-term trainees are defined as those who have completed a long-term (greater than or equal to 300 contact hours) MCH Training Program, including those who received MCH funds and those who did not.  
Cohort is defined as those who have completed an MCHB-funded training program 2 years and 5 years prior to the reporting period.  
MCH Populations: Includes all of the Nation’s women, infants, children, adolescents, young adults and their families, including and children with special health care needs. |
| **BENCHMARK DATA SOURCES** | Related to ECBP-10 Increase the number of community-based organizations (including local health departments, Tribal health services, nongovernmental organizations, and State agencies) providing population-based primary prevention services…  
Related to ECBP-11(Developmental) Increase the proportion of local health departments that have established culturally appropriate and linguistically competent community health promotion and disease prevention programs.  
Related to PHI-1 Increase the proportion of Federal, Tribal, State, and local public health agencies that incorporate Core Competencies for Public Health Professionals into job descriptions and performance |
| **GRANTEE DATA SOURCES** | A revised trainee follow-up survey that incorporates the new form for collecting data on the involvement of those completing an MCH training program in work related to MCH populations will be used to collect these data. |
### Training 11 PERFORMANCE MEASURE

**Goal:** Long-term trainees working with MCH populations  
**Level:** Grantee  
**Domain:** MCH Workforce Development

The percentage of long-term trainees who are engaged in work focused on MCH populations after completing their MCH Training Program.

**SIGNIFICANCE**

HRSA’s MCHB places special emphasis on improving service delivery to women, children and youth from communities with limited access to comprehensive care.
DATA COLLECTION FORM FOR DETAIL SHEET: Training 11 - Long-term trainees working with MCH populations

Individuals completing a long-term training program who report working with the maternal and child health population (i.e., women, infants, children, adolescents, young adults and their families, including children with special health care needs) at 2 years and at 5 years after completing their training program.

NOTE: If the individual works with more than one of these groups only count them once.

2 YEAR FOLLOW-UP

A. The total number of long-term trainees, 2 years following program completion

B. The total number of long-term trainees lost to follow-up (2 years following program completion)

C. The total number of respondents (A-B) = denominator

D. Number of respondents 2 years following completion of program who report working with an MCH population

E. Percent of respondents 2 years following completion of program who report working with an MCH population

5 YEAR FOLLOW-UP

F. The total number of long-term trainees, 5 years following program completion

G. The total number of long-term trainees lost to follow-up (5 years following program completion)

H. The total number of respondents (F-G) = denominator

I. Number of respondents 5 years following completion of program who report working with an MCH population

J. Percent of respondents 5 years following completion of program who report working with an MCH population
### Training 12 PERFORMANCE MEASURE

<thead>
<tr>
<th>Goal: Long-term Trainees</th>
<th>Level: Grantee</th>
<th>Domain: MCH Workforce Development</th>
</tr>
</thead>
<tbody>
<tr>
<td>The percent of long-term trainees who, at 2, 5 and 10 years post training, have worked in an interdisciplinary manner to serve the MCH population (e.g., individuals with disabilities and their families, adolescents and their families, etc.).</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

#### GOAL

To increase the percent of long-term trainees who, upon completing their training, work in an interdisciplinary manner to serve the MCH population.

#### MEASURE

The percent of long-term trainees who, at 2, 5 and 10 years post training have worked in an interdisciplinary manner to serve the MCH population.

#### DEFINITION

**Numerator:** The number of long-term trainees indicating that they have worked in an interdisciplinary manner serving the MCH population.

**Denominator:** The total number of long-term trainees responding to the survey

**Units:** 100

**Text:** Percent

In addition, data on the total number of the long-term trainees and the number of non-respondents for each year will be collected.

Long-term trainees are defined as those who have completed a long-term (300+ hours) MCH Training program, including those who received MCH funds and those who did not.

#### BENCHMARK DATA SOURCES

Related to Healthy People 2020 Objectives:

1. **ECBP-12:** Increase the inclusion of core clinical preventive and population health content in M.D.-granting medical schools
2. **ECBP-13:** Increase the inclusion of core clinical preventive and population health content in D.O.-granting medical schools
3. **ECBP-14:** Increase the inclusion of core clinical preventive and population health content in undergraduate nursing
4. **ECBP-15:** Increase the inclusion of core clinical preventive and population health content in nurse practitioner training
5. **ECBP-16:** Increase the inclusion of core clinical preventive and population health content in physician assistant training
6. **PHI-3:** Increase the proportion of Council on Education for Public Health (CEPH) accredited schools of public health, CEPH accredited academic programs and schools of nursing (with a public health or community health component) that integrate Core Competencies for Public Health Professionals into curricula
7. **MICH-31:** Increase the proportion of children with special health care needs who receive their care in family-centered, comprehensive, coordinated systems

#### GRANTEE DATA SOURCES

The trainee follow-up survey is used to collect these data.
<table>

Training 14 PERFORMANCE MEASURE

<table>
<thead>
<tr>
<th>Goal: Medium-Term Trainees Skill and Knowledge Level: Grantee Domain: MCH Workforce Development</th>
</tr>
</thead>
<tbody>
<tr>
<td>The percentage of Level I medium term trainees who report an increase in knowledge and the percentage of Level II medium term trainees who report an increase in knowledge or skills related to MCH core competencies.</td>
</tr>
</tbody>
</table>

GOAL

To increase the percentage of medium term trainees (MTT) who report increased knowledge or skills related to MCH core competencies.

MEASURE

The percentage of Level I medium term trainees who report an increase in knowledge and the percentage of Level II medium term trainees who report an increase in knowledge or skills related to MCH core competencies.

DEFINITION

Numerator: The number of Level I medium term trainees who report an increase in knowledge and Level II medium term trainees who report an increase in knowledge or skills related to MCH core competencies. Denominator: The total number of medium term trainees responding to the survey. Medium Term trainees: Level I MTT complete 40-149 hours of training. Level II MTT complete 150–299 hours of training.

BENCHMARK DATA SOURCES

MICH-31: Increase the proportion of children with special health care needs who receive their care in family-centered, comprehensive, and coordinated systems.
ECBP-19: Increase the proportion of academic institutions with health professions education programs whose prevention curricula include interprofessional educational experiences.
ECBP-12.2: Increase the inclusion of cultural diversity content in M.D.-granting medical schools.
ECBP-15.2: Increase the inclusion of cultural diversity content in nurse practitioner training.
ECBP-17.2: Increase the inclusion of cultural diversity content in Doctor of Pharmacy (PharmD) granting colleges and schools of pharmacy.

GRANTEE DATA SOURCES

End of training survey is used to collect these data.

SIGNIFICANCE

Medium Term trainees comprise a significant proportion of training efforts. These trainees impact the provision of care to CYSHCN nationally. The impact of this training must be measured and evaluated.
DATA COLLECTION FORM FOR DETAIL SHEET: Training 14 – Medium-Term Trainees Skill and Knowledge

**Level I Medium Term Trainees - Knowledge**

A. The total number of Level I Medium-Term Trainees (40-149 hours) _______

**EMSC 01 PERFORMANCE MEASURE**

**Goal:** Submission of NEMSIS compliant version 3.x or higher data  
**Level:** Grantee  
**Domain:** Emergency Medical Services for Children

<table>
<thead>
<tr>
<th>GOAL</th>
<th>The degree to which EMS agencies submit NEMSIS compliant version 3.x or higher data to the State EMS Office.</th>
</tr>
</thead>
<tbody>
<tr>
<td>MEASURE</td>
<td>The degree to which EMS agencies submit NEMSIS compliant version 3.x or higher data to the State EMS Office.</td>
</tr>
</tbody>
</table>
| DEFINITION | **Numerator:** The number of EMS agencies in the state/territory that submit NEMSIS version 3.X or higher compliant patient care data to the State Emergency Medical Services (EMS) Office.  
**Denominator:** Total number of EMS agencies in the state/territory actively responding to 911 requests for assistance.  
**Units:** 100  
**Text:** Percent |

**EMS:** Emergency Medical Services  

**EMS Agency:** A prehospital provider agency. An EMS agency is defined as an organization staffed with personnel who are actively rendering medical care in response to a 911 or similar emergency call. Data will be gathered from State EMS Offices for both transporting and non-transporting agencies (excludes air- and water-only EMS services).

**NEMSIS:** National EMS Information System. NEMSIS is the national repository that is used to store EMS data from every state in the nation.

**NEMSIS Version 3.X or higher compliant patient care data:**  
A national set of standardized data elements collected by EMS agencies.

**NEMSIS Technical Assistance Center (TAC):** The NEMSIS TAC is the resource center for the NEMSIS project. The NEMSIS TAC provides assistance states, territories, and local EMS agencies, creates reference documents, maintains the NEMSIS database and XML schemas, and creates compliance policies.

</tr>
<tr>
<td><strong>Domain:</strong> Emergency Medical Services for Children</td>
<td>Improve Health Equity by monitoring, identifying, and advancing evidence-based and promising practices to achieve health equity.</td>
</tr>
<tr>
<td><strong>GRANTEE DATA SOURCES</strong></td>
<td>State EMS Offices</td>
</tr>
<tr>
<td><strong>SIGNIFICANCE</strong></td>
<td>Access to quality data and effective data management play an important role in improving the performance of an organization’s health care systems. Collecting, analyzing, interpreting, and acting on data for specific performance measures allows health care professionals to identify where systems are falling short, to make corrective adjustments, and to track outcomes. However, uniform data collection is needed to consistently evaluate systems and develop Quality Improvement programs. The NEMSIS operated by the National Highway Traffic Safety Administration, provides a basic platform for states and territories to collect and report patient care data in a uniform manner.</td>
</tr>
<tr>
<td></td>
<td>NEMSIS enables both state and national EMS systems to evaluate their current prehospital delivery. As a first step toward Quality Improvement (QI) in pediatric emergency medical and trauma care, the EMSC Program seeks to first understand the proportion of EMS agencies reporting to the state EMS office NEMSIS version 3.X or higher compliant data, then use that information to identify pediatric patient care needs and promote its full use at the EMS agency level. In the next few years, NEMSIS will enable states and territories to evaluate patient outcomes and as a result, the next phase will employ full utilization of NEMSIS data on specific measures of pediatric data utilization. This will include implementing pediatric-specific EMS Compass measures in states, publishing results, publishing research using statewide EMS kids data, linking EMS data, providing performance information back to agencies, and building education programs around pediatric data, etc. This measure also aligns with the Healthy People 2020 objective PREP-19: Increase the number of states reporting 90% of emergency medical services (EMS) calls to National EMS Information System (NEMSIS) using the current accepted dataset standard.</td>
</tr>
<tr>
<td>EMSC 01 PERFORMANCE MEASURE</td>
<td>The degree to which EMS agencies submit NEMSIS compliant version 3.x or higher data to the State EMS Office.</td>
</tr>
<tr>
<td>-----------------------------</td>
<td>------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Goal: Submission of NEMSIS compliant version 3.x or higher data</td>
<td>While most localities collect and most states report NEMSIS version 2.X compliant data currently, NEMSIS version 3.X or higher is available today and in use in several states. Version 3 includes an expanded data set, which significantly increases the information available on critically ill or injured children. NHTSA is encouraging states and localities to upgrade to version 3.X or higher compliant software and submit version 3.X data by January 1, 2017.</td>

DATA COLLECTION FORM FOR DETAIL SHEET: EMSC 01

The percentage of EMS agencies in the state/territory that submit National Emergency Medical Services Information System (NEMSIS) version 3.X or higher compliant patient care data to the State Emergency Medical Services Office for all 911 initiated EMS activations.

State EMS Offices will be asked to select which of six (6) statements best describes their current status. The measure will be determined on a scale of 0-5. The following table shows the scoring rubric for responses. Achievement for grantees will be reached when 80% of EMS agencies are submitting NEMSIS version 3.X or higher compliant patient care data to the State EMS Office. This is represented by a score of “5”.

**Percent:**

**Proposed Survey Questions:**
As part of the HRSA’s quest to improve the quality of healthcare, the EMSC Program is interested to hear about current efforts to collect NEMSIS version 3.X or higher compliant patient care data from EMS agencies in the state/territory. The EMSC Program aims to first understand the proportion of EMS agencies that are submitting NEMSIS version 3.X or higher compliant patient care data to the state EMS office.

The NEMSIS Technical Assistance Center will only collect version 3.X or higher compliant data beginning on January 1, 2017.
Which one of the following statements best describes your current status toward submitting NEMSIS version 3.X or higher compliant patient care data to the NEMSIS TAC from currently active EMS agencies in the state/territory? (Choose one)

☐ Our State EMS Office does not submit patient care data to the NEMSIS Technical Assistance Center (TAC)

☐ Our State EMS Office intends to submit patient care data to the NEMSIS Technical Assistance Center (TAC) by or before 2021.

☐ Our State EMS Office submits NEMSIS version 3.X or higher compliant patient care data to the NEMSIS Technical Assistance Center (TAC) with less than 10% of EMS agencies reporting.

☐ Our State EMS Office submits NEMSIS version 3.X or higher compliant patient care data to the NEMSIS Technical Assistance Center (TAC) with at least 10% and less than 50% of EMS agencies reporting.

☐ Our State EMS Office submits NEMSIS version 3.X or higher compliant patient care data to the NEMSIS Technical Assistance Center (TAC) with at least 50% and less than 80% of EMS agencies reporting.

☐ Our State EMS Office submits NEMSIS version 3.X or higher compliant patient care data to the NEMSIS Technical Assistance Center (TAC) with at least 80% of EMS agencies reporting.

EMSC 02 PERFORMANCE MEASURE

Goal: Pediatric Emergency Care Coordination Level: Grantee Domain: Emergency Medical Services for Children

The percentage of EMS agencies in the state/territory that have a designated individual who coordinates pediatric emergency care.

GOAL

By 2020, 30% of EMS agencies in the state/territory have a designated individual who coordinates pediatric emergency care.

By 2023, 60% of EMS agencies in the state/territory have a designated individual who coordinates pediatric emergency care.

By 2026, 90% of EMS agencies in the state/territory have a designated individual who coordinates pediatric emergency care.

MEASURE

The percentage of EMS agencies in the state/territory that have a designated individual who coordinates pediatric emergency care.

DEFINITION

Numerator: The number of EMS agencies in the state/territory that score a ‘3’ on a 0-3 scale.

Denominator: Total number of EMS agencies in the state/territory that provided data.

Units: 100

Text: Percent

Recommended Roles: Job related activities that a designated individual responsible for the coordination of pediatric emergency care might oversee for your EMS agency are:

- Ensure that the pediatric perspective is included in the development of EMS protocols
- Ensure that fellow EMS providers follow pediatric clinical practice guidelines
- Promote pediatric continuing education opportunities
- Oversee pediatric process improvement
- Ensure the availability of pediatric medications, equipment, and supplies
- Promote agency participation in pediatric prevention programs
- Promote agency participation in pediatric research efforts
- Liaises with the emergency department pediatric emergency care coordinator
- Promote family-centered care at the agency

EMS: Emergency Medical Services
EMS Agency: An EMS agency is defined as an organization staffed with personnel who render medical care in response to a 911 or similar emergency call. Data will be gathered from both transporting and non-transporting agencies.

</tbody>
</table>

**SIGNIFICANCE**

The Institute of Medicine (IOM) report “Emergency Care for Children: Growing Pains” (2007) recommends that EMS agencies and emergency departments (EDs) appoint a pediatric emergency care coordinator to provide pediatric leadership for the organization. This individual need not be dedicated solely to this role and could be personnel already in place with a special interest in children who assumes this role as part of their existing duties.

Gausche-Hill et al in a national study of EDs found that the presence of a physician or nurse pediatric emergency care coordinator was associated with an ED being more prepared to care for children. EDs with a coordinator were more likely to report having important policies in place and a quality improvement plan that addressed the needs of children than EDs that reported not having a coordinator.

The IOM report further states that pediatric coordinators are necessary to advocate for improved competencies and the availability of resources for pediatric patients. The presence of an individual who coordinates pediatric emergency care at EMS agencies may result in ensuring that the agency and its providers are more prepared to care for ill and injured children.

The individual designated as the Pediatric Emergency Care Coordinator (PECC) may be a member of the EMS agency or that individual could serve as the PECC for one of more individual EMS agencies within the county or region.
DATA COLLECTION FORM FOR DETAIL SHEET: EMSC 02

The percentage of EMS agencies in the state/territory that have a designated individual who coordinates pediatric emergency care.

| Numerator: The number of EMS agencies in the state/territory that score a ‘3’ on a 0-3 scale. |
| Denominator: Total number of EMS agencies in the state/territory that provided data. |
| Percent: |

EMS agencies will be asked to select which of four statements best describes their agency. The measure will be determined on a scale of 0-3. The following table shows the scoring rubric for responses. Achievement for grantees will be reached when at least 90% of the EMS agencies in the state/territory report a ‘3’ on the scale below.

<table>

</tr>
</tbody>
</table>

Proposed Survey Questions:

Now we are interested in hearing about how pediatric emergency care is coordinated at your EMS agency. This is an emerging issue within emergency care and we want to gather information on what is happening across the country within EMS agencies.

One way that an agency can coordinate pediatric emergency care is by DESIGNATING AN INDIVIDUAL who is responsible for pediatric-specific activities that could include:

- Ensure that the pediatric perspective is included in the development of EMS protocols
- Ensure that fellow providers follow pediatric clinical practice guidelines
- Promote pediatric continuing education opportunities
- Oversee pediatric process improvement
- Ensure the availability of pediatric medications, equipment, and supplies
- Promote agency participation in pediatric prevention programs
- Promote agency participation in pediatric research efforts
- Liaise with the ED pediatric emergency care coordinator
- Promote family-centered care at the agency
A DESIGNATED INDIVIDUAL who coordinates pediatric emergency care need not be dedicated solely to this role; it can be an individual already in place who assumes this role as part of their existing duties. The individual may be located at your agency, county or region.

Which one of the following statements best describes your EMS agency? (Choose one)

- [ ] Our EMS agency does NOT have a designated INDIVIDUAL who coordinates pediatric emergency care at this time
- [ ] Our EMS agency does NOT CURRENTLY have a designated INDIVIDUAL who coordinates pediatric emergency care but we would be INTERESTED IN ADDING this role
- [ ] Our EMS agency does NOT CURRENTLY have a designated INDIVIDUAL who coordinates pediatric emergency care but we HAVE A PLAN TO ADD this role within the next year
- [ ] Our EMS agency HAS a designated INDIVIDUAL who coordinates pediatric emergency care

You indicated that you have a designated individual who coordinates pediatric emergency care at your EMS agency.

Is this individual:

- A member of your agency
- Located at the county level
- Located at a regional level
- Other, please describe

To the best of your knowledge, does this individual serve as the pediatric coordinator for one or more than one EMS agency?

- Just my agency
- My agency as well as other agencies

We are interested in understanding a little bit more about what this individual does for your agency in the coordination of pediatric emergency care. Does this individual…

(Check Yes or No for each of the following questions)

Ensure that the pediatric perspective is included in the development of EMS protocols

- [ ] Yes
- [ ] No

Ensure that fellow providers follow pediatric clinical practice guidelines and/or protocols

- [ ] Yes
- [ ] No

Promote pediatric continuing education opportunities

- [ ] Yes
- [ ] No

Oversee pediatric process improvement

- [ ] Yes
- [ ] No
Ensure the availability of pediatric medications, equipment, and supplies
  □ Yes
  □ No

Promote agency participation in pediatric prevention programs
  □ Yes
  □ No

Liaise with the emergency department pediatric emergency care coordinator
  □ Yes
  □ No

Promote family-centered care at the agency
  □ Yes
  □ No

Promote agency participation in pediatric research efforts
  □ Yes
  □ No

Other
  □ Yes
  □ No

You marked ‘other’ to the previous question. Please describe the ‘other’ activity(s) performed by the designated individual who coordinates pediatric emergency care at your agency.

If you have any additional thoughts about pediatric emergency care coordination, please share them here:
<table>
<thead>
<tr>
<th>EMSC 03 PERFORMANCE MEASURE</th>
<th>The percentage of EMS agencies in the state/territory that have a process or plan that requires EMS providers to physically demonstrate the correct use of pediatric-specific equipment.</th>
</tr>
</thead>
</table>
| **Goal: Use of pediatric-specific equipment** | **Level: Grantee**  
**Domain: Emergency Medical Services for Children** | **GOAL**  
By 2020, 30% of EMS agencies will have a process that requires EMS providers to physically demonstrate the correct use of pediatric-specific equipment, which is equal to a score of ‘6’ or more on a 0-12 scale.  
By 2023: 60% of EMS agencies will have a process that requires EMS providers to physically demonstrate the correct use of pediatric-specific equipment, which is equal to a score of ‘6’ or more on a 0-12 scale.

|----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
EMSC 03 PERFORMANCE MEASURE

Goal: Use of pediatric-specific equipment
Level: Grantee
Domain: Emergency Medical Services for Children

Survey of EMS agencies

GRANTEE DATA SOURCES

SIGNIFICANCE

The Institute of Medicine (IOM) report “Emergency Care for Children: Growing Pains” reports that because EMS providers rarely treat seriously ill or injured pediatric patients, providers may be unable to maintain the necessary skill level to care for these patients. For example, Lammers et al. reported that paramedics manage an adult respiratory patient once every 20 days compared to once every 625 days for teens, 958 days for children and once every 1,087 days for infants. As a result, skills needed to care for pediatric patients may deteriorate. Another study by Su et al. found that EMS provider knowledge rose sharply after a pediatric resuscitation course, but when providers were retested six months later; their knowledge was back to baseline.

Continuing education such as the Pediatric Advance Life Support (PALS) and Pediatric Education for Prehospital Professionals (PEPP) courses are vitally important for maintaining skills and are considered an effective remedy for skill atrophy. These courses are typically only required every two years. More frequent practice of skills using different methods of skill ascertiment are necessary for EMS providers to ensure their readiness to care for pediatric patients when faced with these infrequent encounters. These courses may be counted if an in-person skills check is required as part of the course.

Demonstrating skills using EMS equipment is best done in the field on actual patients but in the case of pediatric patients this can be difficult given how infrequently EMS providers see seriously ill or injured children. Other methods for assessing skills include simulation, case scenarios and skill stations. In the absence of pediatric patient encounters in the field. There is not definitive evidence that shows that one method is more effective than another for demonstrating clinical skills. But, Miller's Model of Clinical Competence posits via the skills complexity triangle that performance assessment can be demonstrated by a combination of task training, integrated skills training, and integrated team performance. In the EMS environment this can be translated to task training at skill stations, integrated skills training during case scenarios, and integrated team performance while treating patients in the field.
DATA COLLECTION FORM FOR DETAIL SHEET: EMSC 03

The percentage of EMS agencies in the state/territory that have a process that requires EMS providers to physically demonstrate the correct use of pediatric-specific equipment.

<table>
<thead>

<td>1</td>
<td>0</td>
</tr>
<tr>
<td>How often are your providers required to demonstrate skills via a FIELD ENCOUNTER?</td>
<td>4</td>
<td>2</td>
<td>1</td>
<td>0</td>
</tr>
</tbody>
</table>

**Proposed Survey Questions:**

EMS runs involving pediatric patients are a small percentage of runs for most agencies. As a result, EMS providers rarely apply life-saving skills using pediatric equipment on children such as:

- Airway adjunct use/ventilation
- Clearing airway/suctioning
- CPR
- AED use/cardio-monitoring
- IV/IO insertion and administration of fluids
- Weight/length-based tape use
- Child safety restraint vehicle installation and pediatric patient restraint

In the next set of questions we are asking about the process or plan that your agency uses to evaluate your EMS providers’ skills using pediatric-specific equipment.

While individual providers in your agency may take PEPP or PALS or other national training courses in pediatric emergency care, we are interested in learning more about the process or plans that your agency employs to evaluate skills on pediatric equipment.

We realize that there are multiple processes that might be used to assess correct use of pediatric equipment. Initial
focus of this performance measure metrics is on the following three processes:

- At a skill station
- Within a simulated event
- During an actual pediatric patient encounter

At a **SKILL STATION** (not part of a simulated event), does your agency have a process or plan which **REQUIRES** your EMS providers to **PHYSICALLY DEMONSTRATE** the correct use of **PEDIATRIC-SPECIFIC** equipment?

- [ ] Yes
- [ ] No

**How often is this process required for your EMS providers?** (Choose one)

- [ ] Two or more times a year
- [ ] At least once a year
- [ ] At least once every two years
- [ ] Less frequently than once every two years

Within a **SIMULATED EVENT** (such as a case scenario or a mock incident), does your agency have a process or plan which **REQUIRES** your EMS providers to **PHYSICALLY DEMONSTRATE** the correct use of **PEDIATRIC-SPECIFIC** equipment?

- [ ] Yes
- [ ] No

**How often is this process required for your EMS providers?** (Choose one)

- [ ] Two or more times a year
- [ ] At least once a year
- [ ] At least once every two years
- [ ] Less frequently than once every two years

During an actual **PEDIATRIC PATIENT ENCOUNTER**, does your agency have a process or plan which **REQUIRES** your EMS providers to be observed by a **FIELD TRAINING OFFICER** or **SUPERVISOR** to ensure the correct use of **PEDIATRIC-SPECIFIC** equipment?

- [ ] Yes
- [ ] No

**How often is this process required for your EMS providers?** (Choose one)

- [ ] Two or more times a year
- [ ] At least once a year
- [ ] At least once every two years
- [ ] Less frequently than once every two years

If you have any additional thoughts about skill checking, please share them here:
### EMSC 04 PERFORMANCE MEASURE

**Goal:** Emergency Department Preparedness  
**Level:** Grantee  
**Domain:** Emergency Medical Services for Children

The percent of hospitals with an Emergency Department (ED) recognized through a statewide, territorial or regional standardized program that are able to stabilize and/or manage pediatric medical emergencies.

#### GOAL

By 2022: 25% of hospitals are recognized as part of a statewide, territorial, or regional standardized program that are able to stabilize and/or manage pediatric medical emergencies.

#### MEASURE

The percent of hospitals recognized through a statewide, territorial or regional program that are able to stabilize and/or manage pediatric medical emergencies.

#### DEFINITION

- **Numerator:** Number of hospitals with an ED that are recognized through a statewide, territorial or regional standardized program that are able to stabilize and/or manage pediatric medical emergencies.

- **Denominator:** Total number of hospitals with an ED in the State/Territory.

- **Units:** 100  
- **Text:** Percent

**Standardized system:** A system of care provides a framework for collaboration across agencies, health care organizations/services, families, and youths for the purposes of improving access and expanding coordinated culturally and linguistically competent care for children and youth. The system is coordinated, accountable and includes a facility recognition program for pediatric medical emergencies. Recognizing the pediatric emergency care capabilities of hospitals supports the development of a system of care that is responsive to the needs of children and extends access to specialty resources when needed.

**Hospital:** Facilities that provide definitive medical and/or surgical assessment, diagnoses, and life and/or limb saving interventions for the ill and injured AND have an Emergency Department. Excludes Military and Indian Health Service hospitals.

#### EMSC STRATEGIC OBJECTIVE

Ensure the operational capacity and infrastructure to provide pediatric emergency care.

Develop a statewide, territorial, or regional program that recognizes hospitals that are able to stabilize and/or manage pediatric medical emergencies.

#### GRANTEE DATA SOURCES

This performance measure will require grantees to determine how many hospitals participate in their facility recognition program (if the state has a facility recognition program) for medical emergencies.
EMSC 04 PERFORMANCE MEASURE

Goal: Emergency Department Preparedness
Level: Grantee
Domain: Emergency Medical Services for Children

The percent of hospitals with an Emergency Department (ED) recognized through a statewide, territorial or regional standardized program that are able to stabilize and/or manage pediatric medical emergencies.

SIGNIFICANCE

The performance measure emphasizes the importance of the existence of a standardized statewide, territorial, or regional system of care for children that includes a recognition program for hospitals capable of stabilizing and/or managing pediatric medical emergencies. A standardized recognition and/or designation program, based on compliance with the current published pediatric emergency/trauma care guidelines, contributes to the development of an organized system of care that assists hospitals in determining their capacity and readiness to effectively deliver pediatric emergency/trauma and specialty care.

This measure helps to ensure essential resources and protocols are available in facilities where children receive care for medical and trauma emergencies. A recognition program can also facilitate EMS transfer of children to appropriate levels of resources. Additionally, a pediatric recognition program, that includes a verification process to identify facilities meeting specific criteria, has been shown to increase the degree to which EDs are compliant with published guidelines and improve hospital pediatric readiness statewide.

In addition, Performance Measure EMSC 04 does not require that the recognition program be mandated. Voluntary facility recognition is accepted.
DATA COLLECTION FORM FOR DETAIL SHEET: EMSC 04

The percent of hospitals with an Emergency Department (ED) that are recognized through a statewide, territorial or regional standardized program that are able to stabilize and/or manage pediatric medical emergencies.

| **DEFINITION** | **Numerator:** Number of hospitals with an ED that are recognized through a statewide, territorial or regional standardized system that are able to stabilize and/or manage pediatric trauma.  
**Denominator:** Total number of hospitals with an ED in the State/Territory.  
**Units:** 100 **Text:** Percent |
| **Standardized system:** A system of care provides a framework for collaboration across agencies, health care organizations/services, families, and youths for the purposes of improving access and expanding coordinated culturally and linguistically competent care for children and youth. The system is coordinated, accountable and includes a facility recognition program for pediatric traumatic injuries. Recognizing the pediatric emergency care capabilities of hospitals supports the development of a system of care that is responsive to the needs of children and extends access to specialty resources when needed. |
| **Hospital:** Facilities that provide definitive medical and/or surgical assessment, diagnoses, and life and/or limb saving interventions for the ill and injured AND have an Emergency Department. Excludes Military and Indian Health Service hospitals. |
| **EMSC STRATEGIC OBJECTIVE** | Ensure the operational capacity and infrastructure to provide pediatric emergency care. Develop a statewide, territorial, or regional standardized system that recognizes hospitals that are able to stabilize and/or manage pediatric medical emergencies and trauma. |
| **GRANTEE DATA SOURCES** | This performance measure will require grantees to determine how many hospitals participate in their facility recognition program (if the state has a facility recognition program) for pediatric trauma. |
EMSC 05 PERFORMANCE MEASURE

Goal: Standardized System for Pediatric Trauma
Level: Grantee
Domain: Emergency Medical Services for Children

The percent of hospitals with an Emergency Department (ED) recognized through a statewide, territorial or regional standardized system that are able to stabilize and/or manage pediatric trauma.

SIGNIFICANCE

The performance measure emphasizes the importance of the existence of a standardized statewide, territorial, or regional system of care for children that includes a recognition program for hospitals capable of stabilizing and/or managing pediatric trauma emergencies. A standardized recognition and/or designation program, based on compliance with the current published pediatric emergency/trauma care guidelines, contributes to the development of an organized system of care that assists hospitals in determining their capacity and readiness to effectively deliver pediatric emergency/trauma and specialty care.

This measure addresses the development of a pediatric trauma recognition program. Recognition programs are based upon State-defined criteria and/or adoption of national current published pediatric emergency and trauma care consensus guidelines that address administration and coordination of pediatric care; the qualifications of physicians, nurses and other ED staff; a formal pediatric quality improvement or monitoring program; patient safety; policies, procedures, and protocols; and the availability of pediatric equipment, supplies and medications.

Additionally, EMSC 05 does not require that the recognition program be mandated. Voluntary facility recognition is accepted. However, the preferred status is to have a program that is monitored by the State/Territory.
DATA COLLECTION FORM FOR DETAIL SHEET: EMSC 05

The percent of hospitals with an Emergency Department (ED) recognized through a statewide, territorial or regional standardized system that are able to stabilize and/or manage pediatric traumatic emergencies.

</tr>
</tbody>
</table>

**DEFINITION**

**Numerator:** Number of hospitals with an ED that have written inter-facility transfer guidelines that cover pediatric patients and that include specific components of transfer according to the data collected.

**Denominator:** Total number of hospitals with an ED that provided data.

**Units:** 100  
**Text:** Percent

**Pediatric:** Any person 0 to 18 years of age. Inter-facility transfer guidelines: Hospital-to-hospital, including out of State/Territory, guidelines that outline procedural and administrative policies for transferring critically ill patients to facilities that provide specialized pediatric care, or pediatric services not available at the referring facility. Inter-facility guidelines do not have to specify transfers of pediatric patients only. A guideline that applies to all patients or patients of all
EMSC 06 PERFORMANCE MEASURE

| Goal: Inter-facility transfer guidelines | The percent of hospitals with an Emergency Department (ED) in the State/Territory that have written inter-facility transfer guidelines that cover pediatric patients and that contain all the components as per the implementation manual. |
| Level: Grantee | Grantees should consult the EMSC Program representative if they have questions regarding guideline inclusion of pediatric patients. In addition, hospitals may have one document that comprises both the inter-facility transfer guideline and agreement. This is acceptable as long as the document meets the definitions for pediatric inter-facility transfer guidelines and agreements (i.e., the document contains all components of transfer). |
| Domain: Emergency Medical Services for Children | All hospitals in the State/Territory should have guidelines to transfer to a facility capable of providing pediatric services not available at the referring facility. If a facility cannot provide a particular type of care (e.g., burn care), then it also should have transfer guidelines in place. Consult the NRC to ensure that the facility (facilities) providing the highest level of care in the state/territory is capable of definitive care for all pediatric needs. Also, note that being in compliance with EMTALA does not constitute having inter-facility transfer guidelines. |

EMSC STRATEGIC OBJECTIVE

Ensure the operational capacity and infrastructure to provide pediatric emergency care

Hospital: Facilities that provide definitive medical and/or surgical assessment, diagnoses, and life and/or limb saving interventions for the ill and injured AND have an Emergency Department (ED). Excludes Military and Indian Health Service hospitals.

GRANTEE DATA SOURCE(S)

- Surveys of hospitals with an emergency department.
- Hospital licensure rules and regulations

SIGNIFICANCE

In order to assure that children receive optimal care, timely transfer to a specialty care center is essential. Such transfers are better coordinated through the presence of inter-facility transfer agreements and guidelines.
DATA COLLECTION FORM FOR DETAIL SHEET: EMSC 06

Performance Measure EMSC 06: The percentage of hospitals in the State/Territory that have written inter-facility transfer guidelines that cover pediatric patients and that include the following components of transfer:

- Defined process for initiation of transfer, including the roles and responsibilities of the referring facility and referral center (including responsibilities for requesting transfer and communication).
- Process for selecting the appropriate care facility.
- Process for selecting the appropriately staffed transport service to match the patient’s acuity level (level of care required by patient, equipment needed in transport, etc.).
- Process for patient transfer (including obtaining informed consent).
- Plan for transfer of patient medical record.
- Plan for transfer of copy of signed transport consent.
- Plan for transfer of personal belongings of the patient.
- Plan for provision of directions and referral institution information to family.

Hospitals with Inter-facility Transfer Guidelines that Cover Pediatric Patients:
You will be asked to enter a numerator and a denominator, not a percentage. **NOTE:** This measure only applies to hospitals with an Emergency Department (ED).

**NUMERATOR:**
Number of hospitals with an ED that have written inter-facility transfer guidelines that cover pediatric patients and that include specific components of transfer according to the data collected.

**DENOMINATOR:**
Total number of hospitals with an ED that provided data.

<thead>
<tr>
<th>EMSC 08 PERFORMANCE MEASURE</th>
<th>The degree to which the State/Territory has established permanence of EMSC in the State/Territory EMS system.</th>
</tr>
</thead>
</table>

**Goal:** EMSC Permanence  
**Level:** Grantee  
**Domain:** Emergency Medical Service for Children

**GOAL**  
To increase the number of States/Territories that have established permanence of EMSC in the State/Territory EMS system.

**MEASURE**  
The degree to which States/Territories have established permanence of EMSC in the State/Territory EMS system.

**DEFINITION**  
Permanence of EMSC in a State/Territory EMS system is defined as:

- The EMSC Advisory Committee has the required members as per the implementation manual.
- The EMSC Advisory Committee meets at least four times a year.
- Pediatric representation incorporated on the State/Territory EMS Board.
- The State/Territory require pediatric representation on the EMS Board.
- One full time EMSC Manager is dedicated solely to the EMSC Program.

**EMSC:** The component of emergency medical care that addresses the infant, child, and adolescent needs, and the Program that strives to ensure the establishment and permanence of that component. EMSC includes emergent at the scene care as well as care received in the emergency department, surgical care, intensive care, long-term care, and rehabilitative care. EMSC extends far beyond these areas yet for the purposes of this manual this will be the extent currently being sought and reviewed.

**EMS system:** The continuum of patient care from prevention to rehabilitation, including pre-hospital, dispatch communications, out-of-hospital, hospital, primary care, emergency care, inpatient, and medical home. It encompasses every injury and illness.

**EMSC STRATEGIC OBJECTIVE**

- Establish permanence of EMSC in each State/Territory EMS system.
- Establish an EMSC Advisory Committee within each State/Territory
- Incorporate pediatric representation on the State/Territory EMS Board
- Establish one full-time equivalent EMSC manager that is dedicated solely to the EMSC Program.
EMSC 08 PERFORMANCE MEASURE

Goal: EMSC Permanence
Level: Grantee
Domain: Emergency Medical Service for Children

The degree to which the State/Territory has established permanence of EMSC in the State/Territory EMS system.

GRANTEE DATA SOURCES

- Attached data collection form to be completed by grantee.

SIGNIFICANCE

Establishing permanence of EMSC in the State/Territory EMS system is important for building the infrastructure of the EMSC Program and is fundamental to its success. For the EMSC Program to be sustained in the long-term and reach permanence, it is important to establish an EMSC Advisory Committee to ensure that the priorities of the EMSC Program are addressed. It is also important to establish one full time equivalent EMSC Manager whose time is devoted solely (i.e., 100%) to the EMSC Program. Moreover, by ensuring pediatric representation on the State/Territory EMS Board, pediatric issues will more likely be addressed.

EMSC 09 PERFORMANCE MEASURE

Goal: Integration of EMSC priorities
Level: Grantee
Domain: Emergency Medical Services for Children

The degree to which the State/Territory has established permanence of EMSC in the State/Territory EMS system by integrating EMSC priorities into statutes/regulations.

GOAL

By 2027, EMSC priorities will have been integrated into existing EMS or hospital/healthcare facility statutes/regulations.

MEASURE

The degree to which the State/Territory has established permanence of EMSC in the State/Territory EMS system by integrating EMSC priorities into statutes/regulations.

DEFINITION

Priorities: The priorities of the EMSC Program include the following:

1. EMS agencies are required to submit NEMSIS compliant data to the State EMS Office.
2. EMS agencies in the state/territory have a designated individual who coordinates pediatric emergency care.
3. EMS agencies in the state/territory have a process that requires EMS providers to physically demonstrate the correct use of pediatric-specific equipment.
4. The existence of a statewide, territorial, or regional standardized system that recognizes hospitals that are able to stabilize and/or manage
   - pediatric medical emergencies
   - trauma
5. Hospitals in the State/Territory have written inter-facility transfer guidelines that cover pediatric patients and that include the following components of transfer:
   - Defined process for initiation of transfer, including the roles and responsibilities of the referring facility and referral center (including responsibilities for requesting transfer and communication).
   - Process for selecting the appropriate care facility.
   - Process for selecting the appropriately staffed transport service to match the patient’s acuity level (level of care required by patient, equipment needed in transport, etc.).
   - Process for patient transfer (including obtaining informed consent).
   - Plan for transfer of patient medical record
   - Plan for transfer of copy of signed transport consent
   - Plan for transfer of personal belongings of the patient
   - Plan for provision of directions and referral institution information to family
6. Hospitals in the State/Territory have written inter-facility transfer agreements that cover pediatric patients.
7. BLS and ALS pre-hospital provider agencies in the State/Territory are required to have on-line and off-line pediatric medical direction available.
<table>

HS 03 PERFORMANCE MEASURE

Goal: Interconception Planning
Level: Grantee
Domain: Healthy Start

The percent of Healthy Start women participants who conceive within 18 months of a previous birth.\(^6\)

**GOAL**

To reduce the proportion of Healthy Start women participants who conceive within 18 months of a previous birth to 30%.

**MEASURE**

The percent of Healthy Start women participants who conceive within 18 months of a previous birth.

**DEFINITION**

**Numerator:** Number of Healthy Start (HS) women participants whose current pregnancy during the reporting period was conceived within 18 months of the previous birth.

**Denominator:** Total number of HS women participants enrolled before the current pregnancy in the reporting period who had a prior pregnancy that ended in a live birth.

The interval between the most recent pregnancy and previous birth is derived from the delivery date of the birth and the date of conception for the most recent pregnancy.

**BENCHMARK DATA SOURCES**

CDC National Survey of Family Growth, Healthy People 2020 Family Planning Goal 5; Vital Statistics\(^7\)

**GRANTEE DATA SOURCES**

Grantee data systems

**SIGNIFICANCE**

Family planning is important to ensure spacing pregnancies at least 18 months apart to reduce health risks for both mother and baby. Pregnancy within 18 months of giving birth is associated with increased risk for the baby including low birth weight, small size for gestational age, and preterm birth. Additionally, the mother needs time to fully recover from the previous birth.\(^8\)

**HS 04 PERFORMANCE MEASURE**

**Goal:** Intimate Partner Violence Screening  
**Level:** Grantee  
**Domain:** Healthy Start

| GOAL | The percent of HS women participants who receive intimate partner violence screening.  
| MEASURE | The percent of Healthy Start women participants who receive intimate partner violence screening.  
| DEFINITION | **Numerator:** Number of Healthy Start (HS) women participants who received intimate partner violence screening using a standardized screening tool during the reporting period.  
**Denominator:** Total number of HS women participants in the reporting period.  
A participant is considered to have been screened and included in the denominator if a standardized screening tool which is appropriately validated for her circumstances is used. A number of screening tools have been validated for IPV screening.  
Intimate Partner Violence is a pattern of assaultive behavior and coercive behavior that may include physical injury, psychological abuse, sexual assault, progressive isolation, stalking, deprivation, intimidation, and reproductive coercion. These behaviors are committed by someone who is, was, or wishes to be involved in an intimate relationship with the participant.  

| BENCHMARK DATA SOURCES | PRAMS  
| GRANTEE DATA SOURCES | Grantee data systems  
| SIGNIFICANCE | Intimate Partner Violence is a substantial yet preventable public health problem that affects women across the world. Research shows that intimate partner violence screening differs among health care specialties and is overall relatively low. The U.S. Department of Health and Human Services recommends that IPV screening and counseling to be a core part of a women’s well visit.  

---

9 Consistent with Healthy Start Benchmark 13.  
HS 05 PERFORMANCE MEASURE

**Goal:** Father/Partner Involvement during pregnancy  
**Level:** Grantee  
**Domain:** Healthy Start

The percent of Healthy Start women participants that demonstrate father and/or partner involvement during pregnancy.  

<table>
<thead>
<tr>
<th>GOAL</th>
<th>To increase proportion of Healthy Start women participants that demonstrate father and/or partner involvement (e.g., attend appointments, classes, etc.) to 90%.</th>
</tr>
</thead>
<tbody>
<tr>
<td>MEASURE</td>
<td>The percent of Healthy Start women participants that demonstrate father and/or partner involvement during pregnancy.</td>
</tr>
</tbody>
</table>
| DEFINITION | **Numerator:** Number of Healthy Start (HS) prenatal participants who report supportive father and/or partner involvement (e.g., attend appointments, classes, etc.) in the reporting period.  
**Denominator:** Total number HS prenatal participants in the reporting period.  
A participant is considered to have support and included in the numerator if she self-reports a partner who has a significant and positive role in the participant’s pregnancy.  
Involvement during pregnancy may include, but is not limited to:  
- Partnership; social/emotional support  
- Attending prenatal appointments  
- Attending prenatal classes  
- Assisting in preparing the home for the baby (e.g., putting together a crib)  
- Providing economic support |
| BENCHMARK DATA SOURCES | Child Trend Research Brief, CDC National Health Statistics Report |
| GRANTEE DATA SOURCES | Grantee data systems |
| SIGNIFICANCE | Research suggests that paternal involvement has been recognized to have an impact on both pregnancy and infant outcomes. Father involvement during pregnancy has shown to reduce negative maternal health behaviors, risk of preterm birth, low birth weight, and fetal growth restrictions. |

---

12 Consistent with Healthy Start Benchmark 14.
HS 06 PERFORMANCE MEASURE

Goal: Father and/or Partner Involvement with child <24 Months
Level: Grantee
Domain: Healthy Start

The percent of Healthy Start women participants that demonstrate father and/or partner involvement with child <24 months.\(^{13}\)

**GOAL**

To increase proportion of HS women participants that demonstrate father and/or partner involvement (e.g., attend appointments, classes, infant/child care) with child <24 months to 80%.

**MEASURE**

The percent of Healthy Start women participants that demonstrate father and/or partner involvement with child <24 months.

**DEFINITION**

**Numerator:** Number of Healthy Start (HS) child participants whose mother reports supportive father and/or partner involvement (e.g., attend appointments, classes, child care, etc.) during the reporting period.

**Denominator:** Total number of Healthy Start women participants with a child participant <24 months.

A participant is considered to have support and included in the numerator if she self-reports a partner who has a significant and positive role for the child.

Involvement includes, but is not limited to:\(^{14}\)

- Engagement or direct interaction with the child, including taking care of, playing with, or teaching the child
- Accessibility or availability, which includes monitoring behavior from the next room or nearby and allowing direct interaction if necessary
- Responsibility for the care of the child, which includes making plans and arrangements for care
- Economic support or breadwinning
- Attending postpartum and well child visits
- Other meaningful support

**BENCHMARK DATA SOURCES**

None

**GRANTEE DATA SOURCES**

Grantee data systems

**SIGNIFICANCE**

Research suggests that paternal involvement has been recognized to have an impact on both pregnancy and infant outcomes.

\(^{13}\) Consistent with Healthy Start Benchmark 15.

**HS 07 PERFORMANCE MEASURE**

**Goal:** Daily Reading  
**Level:** Grantee  
**Domain:** Healthy Start

<table>
<thead>
<tr>
<th>GOAL</th>
<th>To increase the proportion of Healthy Start child participants age 6 through 23 months who are read to 3 or more times per week to 50%.</th>
</tr>
</thead>
<tbody>
<tr>
<td>MEASURE</td>
<td>The percent of Healthy Start child participants age 6 through 23 months who are read to by a family member 3 or more times per week, on average.</td>
</tr>
</tbody>
</table>
| DEFINITION | **Numerator:** Number of Healthy Start children participants whose parent/caregiver reports that they were read to by a family member on 3 or more days during the past week during the reporting period.  
**Denominator:** Total number of Healthy Start child participants 6 through 23 months of age during the reporting period.  
Reading by a family member may include reading books, picture books, or telling stories. |
| BENCHMARK DATA SOURCES | National Survey of Children’s Health (2011-2012) |
| GRANTEE DATA SOURCES | Grantee data systems |
| SIGNIFICANCE | Reading to a child teaches them about communication, introduces concepts such as numbers, letters, colors, and shapes, builds listening, memory, and vocabulary skills, and gives them information about the world around them. The American Academy of Pediatrics (AAP) promotes reading aloud as a daily fun family activity to promote early literacy development as an important evidence-based intervention beginning in infancy and continuing at least until the age of school entry. |

### HS 08 PERFORMANCE MEASURE

**Goal:** CAN implementation  
**Level:** Grantee  
**Domain:** Healthy Start

<table>
<thead>
<tr>
<th>GOAL</th>
<th>The percent of Healthy Start grantees with a fully implemented Community Action Network (CAN).</th>
<th>18</th>
</tr>
</thead>
</table>

**DEFINITION**

Two benchmarks are calculated to capture Community Action Network (CAN) implementation and progress towards achieving collective impact:

- **Numerator:** Number of related CAN measure components implemented by the CAN in which the Healthy Start grantee participates.
- **Denominator:** 3 (representing total of CAN components)

This is a scaled measure which reports progress towards full implementation of a CAN. A “yes” answer is scored 1 point; a “no” answer receives no point. To meet the standard of “fully implemented” for this measure, the HS grantee must answer “yes” to all three core elements listed below:

1. Does your CAN have regularly scheduled meetings? (Regular scheduled is minimally defined as every quarter during the reporting period). This can be documented by using sign in sheets. Yes = 1  No = 0

2. Does your CAN have members from three or more community sectors? (e.g., individuals with lived experience, Healthy Start consumer, faith based, hospital, school setting, community based organizations, government, business, medical provider(s), child care provider(s)). Yes = 1  No = 0

3. Does your CAN have a twelve month work plan? This work plan should outline the CAN’s goals, objectives, activities, entities responsible for completing, and timelines. Yes = 1  No = 0

---

**Numerator:** Number of related Collective Impact (CI) measure components implemented by the CAN in which the Healthy Start grantee participates.

**Denominator:** 10 (representing total points for 5 CI measure components)

1. Does your CAN have a common agenda developed? All participants have a shared vision for change including a common understanding of the problem and a joint approach to solving it through agreed upon actions. This can be documented by using a theory of change, logic model, work plan template that captures this information, and/or a charter.

---

18 Consistent with Healthy Start Benchmark 17.
HS 08 PERFORMANCE MEASURE

Goal: CAN implementation
Level: Grantee
Domain: Healthy Start

The percent of Healthy Start grantees with a fully implemented Community Action Network (CAN).^18

<table>
<thead>
<tr>
<th>Yes</th>
<th>In Process</th>
<th>Not started</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>1</td>
<td>0</td>
</tr>
</tbody>
</table>

2. Does your CAN have Shared Measurement Systems? The CAN has identified a common set of indicators that tracks progress/action related to the common agenda, collects data across partners, presents data on a consistent basis, and uses data to make informed decisions and to hold each other accountable.

<table>
<thead>
<tr>
<th>Yes</th>
<th>In Process</th>
<th>Not started</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>1</td>
<td>0</td>
</tr>
</tbody>
</table>

3. Does your CAN engage in Mutually Reinforcing Activities? Participant activities are differentiated while still being coordinated through a mutually reinforcing plan of action. This plan of action can be included on the work plan noted above and should include at least two to three activities, a description of how it is believed that the activities will impact the common agenda, how the activities will be measured, who/what organization will take the lead, and the timeline for implementation.

<table>
<thead>
<tr>
<th>Yes</th>
<th>In Process</th>
<th>Not started</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>1</td>
<td>0</td>
</tr>
</tbody>
</table>

4. Does your CAN have Continuous Communication? Consistent and open communication is needed across the many players to build trust, assure mutual objectives, and appreciate common motivation. A communication plan agreed upon by stakeholders should be included as a part of the work plan noted above.

<table>
<thead>
<tr>
<th>Yes</th>
<th>In Process</th>
<th>Not started</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>1</td>
<td>0</td>
</tr>
</tbody>
</table>

5. Does your CAN have a backbone infrastructure in place? Creating and managing collective impact requires a dedicated staff and a specific set of skills to serve as the backbone for the entire initiative and coordinate participating organizations and agencies. Documentation is shared with CAN members describing roles and responsibilities, and skills required for staff of the entity(ies) supporting the backbone infrastructure.

<table>

Grantee data systems

A Community Action Network, or CAN, is an existing, formally organized partnership of organizations and individuals. The CAN represents consumers and appropriate agencies which unite in an effort to collectively apply their resources to the implementation of one or more commons strategies to achieve a common goal within that project area.
**HS 9 PERFORMANCE MEASURE**

**Goal:** CAN participation  
**Level:** Grantee  
**Domain:** Healthy Start

The percent of Healthy Start grantees with at least 25% community members and Healthy Start program participants serving as members of their CAN.  

---

**GOAL**

To increase the proportion of Healthy Start grantees with at least 25% community members and Healthy Start program participants serving as members of their CAN to 100%.

**MEASURE**

The percent of Healthy Start grantees with at least 25% community members and Healthy Start program participants serving as members of their CAN.

**DEFINITION**

**Numerator:** Number of community members and Healthy Start (HS) program participants serving as members of the CAN.

**Denominator:** Total number of individual members serving on the CAN.

**Community Member:** an individual who has lived experience that is representative of the project’s Healthy Start target population. Community members may include former Healthy Start participants, fathers and/or partners of Healthy Start participants, males and family members.

**Program Participant:** an individual having direct contact with Healthy Start staff or subcontractors and receiving Healthy Start services on an ongoing systematic basis to improve perinatal and infant health. Specifically, program participants are pregnant women and women of reproductive age and children up to age 2.

A Community Action Network, or CAN, is an existing, formally organized partnership of organizations and individuals. The CAN represents consumers and appropriate agencies which unite in an effort to collectively apply their resources to the implementation of one or more commons strategies to achieve a common goal within that project area.

**BENCHMARK DATA SOURCES**

**GRANTEE DATA SOURCES**

Grantee data systems

**SIGNIFICANCE**

Consumer involvement in setting the community agenda and informing efforts to effectively meet the community’s needs is critical to the effectiveness of the CAN.

## DIVISION OF CHILDREN WITH SPECIAL HEALTH NEEDS

Family to Family Health Information Center Program
PERFORMANCE MEASURE DETAIL SHEET SUMMARY TABLE

<table>
<thead>
<tr>
<th>Performance Measure</th>
<th>Topic</th>
</tr>
</thead>
<tbody>
<tr>
<td>F2F 1</td>
<td>Provide National Leadership for families with children with special health needs</td>
</tr>
</tbody>
</table>
## F2F 1 Performance Measure

**Goal:** Provide National Leadership for families with children with special health needs  
**Level:** Grantee  
**Category:** Family Participation

| **GOAL** | To increase the number of families with CSHCN receiving needed health and related information, training, and/or education opportunities in order to partner in decision making and be satisfied with services that they receive. |
| **MEASURE** | The percent of families with CSHCN that have been provided information, education and/or training by Family-to-Family Health Information Centers. |
| **DEFINITION** | **Numerator:** The total number of families with CSHCN in the State that have been provided information, education, and/or training from Family-To-Family Health Information Centers.  
**Denominator:** The number of families that can be reasonably served with provided federal grant funds.  
**Units:** 100  
**Text:** Percent |
| **BENCHMARK DATA SOURCES** | Related to Objective MICH-31: Increase the proportion of children with special health care needs who receive their care in family-centered, comprehensive, coordinated systems |
| **GRANTEE DATA SOURCES** | Progress reports from Family-To-Family Health Care Information and Education Centers, National Survey for Children’s Health (NSCH), Title V Information System |
| **SIGNIFICANCE** | The last decade has emphasized the central role of families as informed consumers of services and participants in policy-making activities. Research has indicated that families need information they can understand and information from other parents who have experiences similar to theirs and who have navigated services systems. |
DATA COLLECTION FORM FOR DETAIL SHEET #F2F 1

A. PROVIDING INFORMATION, EDUCATION, AND/OR TRAINING

The number of families that can be reasonably served with provided federal grant funds: _____________

1. The total number of families served is based solely on “one-to-one” service conducted by the F2F.

a. Total number of families served/trained: _____________

b. Of the total number of families served/trained, how many families identified themselves as:

   **Ethnicity**
   1. Hispanic
   2. Non-Hispanic

   **Race**
   1. White
   2. Black or African American
   3. Asian
   4. Native Hawaiian or Pacific Islander
   5. Native American/American Indian or Alaskan Native
   6. Some other Race
   7. Multiple races
   8. Unknown

   Total number of instances of service/training provided (this will be a duplicated count): _____________

d. Of the total instances of service, how many provided:

   1. Individualized assistance (Includes one-on-one instruction, consultation, counseling, case management, and mentoring) ______
   2. Basic contact information and referrals ______
   3. Group training opportunities ______
   4. Meetings/Conferences and Public Events (includes outreach events and presentations) ______

e. Of the total number of families served/trained, how many instances of service related to the following issues:

   1. Partnering/decision making with providers
      Number of families served/trained ______
   2. Accessing a medical home
      Number of families served/trained ______
   3. Financing for needed health services
      Number of families served/trained ______
   4. Early and continuous screening
      Number of families served/trained ______
   5. Navigating systems/accessing community services easily
      Number of families served/trained ______
   6. Adolescent transition issues
      Number of families served/trained ______
   7. Other (Specify): _____________________________________________
      Number of families served/trained ______

2. Our organization provided health care information/education to professionals/providers to assist them in better providing services for CSHCN.

a. Total number of professionals/providers served/trained: _____________
b. Total instances of service/training provided (this will be a duplicated count): ____________

c. Of the total number of professionals/providers served/trained, how many instances of service were used to provide health care information/education related to the following issues:

1. Partnering/decision making with families
   Number of professionals/providers served/trained: _____

2. Accessing/providing a medical home
   Number of professionals/providers served/trained: _____

3. Financing for needed services
   Number of professionals/providers served/trained: _____

4. Early and continuous screening
   Number of professionals/providers served/trained: _____

5. Navigating systems/accessing community services easily
   Number of professionals/providers served/trained: _____

6. Adolescent transition issues
   Number of professionals/providers served/trained: _____

7. Other (Specify): _____________________________________________
   Number of professionals/providers served/trained: _____

3. Our organization conducted communication and outreach to families and other appropriate entities through a variety of methods.

   a. Select the modes of how print/media information and resources are disseminated. (Select all that apply).
      - Electronic newsletters and listservs
      - Hardcopy
      - Public television/radio
      - Social media (Specify platform): __________
      - Text messaging

4. Our organization worked with State agencies/programs to assist them with providing services to their populations and/or to obtain their information to better serve our families.

   a. Types of State agencies/programs - Total: __________

   b. Indicate the types of State agencies/programs with which your organization has worked:

      a. State level Commissions, Task Forces, etc.
      b. MCH/CSHCN
      c. Genetics/newborn screening
      d. Early Hearing Detection and Intervention/Newborn Hearing screening
      e. Emergency Medical Services for Children
      f. LEND Programs
      g. Oral Health
      h. NICHQ Learning Collaboratives
      i. Developmental Disabilities
      j. Medicaid (CMS), SCHIP
      k. Private Insurers
      l. Case Managers
      m. SAMHSA/Mental & Behavioral Health
      n. Federation of Families for Children’s Mental Health
      o. HUD/housing
      p. Early Intervention/Head Start
q. Education
r. Child Care
s. Juvenile Justice/Judicial System
t. Foster Care/Adoption agencies
t. Other (Specify): _____________________________

v. None

Attachment C | 3
7. TOTAL COLLABORATIVE FEDERAL FUNDS

INSTRUCTIONS FOR COMPLETION OF FORM 1
MCH BUDGET DETAILS FOR FY ____

Line 1. Enter the amount of the Federal MCHB grant award for this project.

Line 2. Enter the amount of carryover (e.g., unobligated balance) from the previous year’s award, if any. New awards do not enter data in this field, since new awards will not have a carryover balance.

Line 3. If matching funds are required for this grant program list the amounts by source on lines 3A through 3E as appropriate. Where appropriate, include the dollar value of in-kind contributions.

Line 4. Enter the amount of other funds received for the project, by source on Lines 4A through 4E, specifying amounts from each source. Also include the dollar value of in-kind contributions.

Line 5. Displays the sum of lines 1 through 4.

Line 6. Enter the amount of other Federal funds received on the appropriate lines (A.1 through C.12) other than the MCHB grant award for the project. Such funds would include those from other Departments, other components of the Department of Health and Human Services, or other MCHB grants or contracts.

   Line 6C.1. Enter only project funds from the Center for Medicare and Medicaid Services. Exclude Medicaid reimbursement, which is considered Program Income and should be included on Line 3C or 4C.

   If lines 6A.8-10, 6B.4-6, or 6C.10-12 are utilized, specify the source(s) of the funds in the order of the amount provided, starting with the source of the most funds.

Line 7. Displays the sum of lines in 6A.1 through 6C.12.

INSTRUCTIONS FOR THE COMPLETION OF FORM 2
PROJECT FUNDING PROFILE

Instructions:

Complete all required data cells. If an actual number is not available, use an estimate. Explain all estimates in a note.

The form is intended to provide funding data at a glance on the estimated budgeted amounts and actual expended amounts of an MCH project.

For each fiscal year, the data in the columns labeled Budgeted on this form are to contain the same figures that appear on the Application Face Sheet (for a non-competing continuation) or the Notice of Grant Award (for a performance report). The lines under the columns labeled Expended are to contain the actual amounts expended for each grant year that has been completed.
### FORM 3

INSTRUCTIONS FOR COMPLETION OF FORM 3
BUDGET DETAILS BY TYPES OF INDIVIDUALS SERVED

For Projects Providing Direct Services, Enabling, or Public Health Services and Systems

If the project provides direct services, complete all required data cells for all years of the grant. If an actual number is not available make an estimate. Please explain all estimates in a note.

All ages are to be read from $x$ to $y$, not including $y$. For example, infants are those from birth to 1, and children and youth are from age 1 to 25.

Enter the budgeted amounts for the appropriate fiscal year, for each targeted population group. Note that the Total for each budgeted column is to be the same as that appearing in the corresponding budgeted column in Form 2, Line 5.

Enter the expended amounts for the appropriate fiscal year that has been completed for each target population group. Note that the Total for the expended column is to be the same as that appearing in the corresponding expended column in Form 2, Line 5.

Attachment C | 9
INSTRUCTIONS FOR THE COMPLETION OF FORM 4
PROJECT BUDGET AND EXPENDITURES BY TYPES OF SERVICES

Complete all required data cells for all years of the grant. If an actual number is not available, make an estimate. Please explain all estimates in a note. Administrative dollars should be allocated to the appropriate level(s) of the pyramid on lines I, II, II or IV. If an estimate of administrative funds use is necessary, one method would be to allocate those dollars to Lines I, II, III and IV at the same percentage as program dollars are allocated to Lines I through IV.

Note: Lines I, II and II are for projects providing services. If grant funds are used to build the infrastructure for direct care delivery, enabling or population-based services, these amounts should be reported in Line IV (i.e., building data collection capacity for newborn hearing screening).

Line I  Direct Health Care Services - enter the budgeted and expended amounts for the appropriate fiscal year completed and budget estimates only for all other years.

**Direct Health Care Services** are those services generally delivered one-on-one between a health professional and a patient in an office, clinic or emergency room which may include primary care physicians, registered dietitians, public health or visiting nurses, nurses certified for obstetric and pediatric primary care, medical social workers, nutritionists, dentists, sub-specialty physicians who serve children with special health care needs, audiologists, occupational therapists, physical therapists, speech and language therapists, specialty registered dietitians. Basic services include what most consider ordinary medical care, inpatient and outpatient medical services, allied health services, drugs, laboratory testing, x-ray services, dental care, and pharmaceutical products and services. State Title V programs support - by directly operating programs or by funding local providers - services such as prenatal care, child health including immunizations and treatment or referrals, school health and family planning. For CSHCN, these services include specialty and sub-specialty care for those with HIV/AIDS, hemophilia, birth defects, chronic illness, and other conditions requiring sophisticated technology, access to highly trained specialists, or an array of services not generally available in most communities.

Line II  Enabling Services - enter the budgeted and expended amounts for the appropriate fiscal year completed and budget estimates only for all other years.

**Enabling Services** allow or provide for access to and the derivation of benefits from, the array of basic health care services and include such things as transportation, translation services, outreach, respite care, health education, family support services, purchase of health insurance, case management, coordination of with Medicaid, WIC and educations. These services are especially required for the low income, disadvantaged, geographically or culturally isolated, and those with special and complicated health needs. For many of these individuals, the enabling services are essential - for without them access is not possible. Enabling services most commonly provided by agencies for CSHCN include transportation, care coordination, family support, family training workshops, advocacy, nutrition and social work.

Line III  Public Health Services and Systems - enter the budgeted and expended amounts for the appropriate fiscal year completed and budget estimates only for all other years.

**Public Health Services and Systems** include preventive interventions and personal health services, developed and available for the entire MCH population of the State rather than for individuals in a one-on-one situation. Disease prevention, health promotion, and statewide outreach are major components. Common among these services are newborn screening, lead screening, immunization, Sudden Infant Death Syndrome counseling, oral health, injury prevention, nutrition and outreach/public education. These services are generally available whether the mother or child receives care in the private or public system, in a rural clinic or an HMO, and whether insured or not. The other critical aspect of Public Health Services and Systems are activities directed at improving and maintaining the health status of all women and children by providing support for development and maintenance of comprehensive health services systems and resources such as health services standards/guidelines, training, data and planning systems. Examples
include needs assessment, evaluation, planning, policy development, coordination, quality assurance, standards development, monitoring, training, applied research, information systems and systems of care. In the development of systems of care it should be assured that the systems are family centered, community based and culturally competent.

Line V  **Total** – Displays the total amounts for each column, budgeted for each year and expended for each year completed.

TOTAL SERVED: ________________
INSTRUCTIONS FOR THE COMPLETION OF FORM 5

NUMBER OF INDIVIDUALS SERVED (UNDUPLICATED)
By Type of Individual and Source of Primary Insurance Coverage
For Projects Providing Direct Health Care, Enabling or Population-based Services

Enter data into all required (unshaded) data cells. If an actual number is not available, make an estimate. Please explain all estimates, in a note.

Note that ages are expressed as either x to y, (i.e., 1 to 25, meaning from age 1 up to age 18, but not including 25) or x – y (i.e., 1 – 4 meaning age 1 through age 4). Also, symbols are used to indicate directions. For example, <1 means less than 1, or from birth up to, but not including age 1. On the other hand, 45+ means age 45 and over.

1. At the top of the Form, the Line Reporting Year displays the year for which the data applies.

2. In Column (a), enter the unduplicated count of individuals who received a direct service from the project regardless of the primary source of insurance coverage. These services are those that are done by any non-capacity building services and would include individuals served by total dollars reported on Form 3, Line 5.

3. In Column (b), the total number of the individuals served is summed from Column (a).

4. In the remaining columns, report the percentage of those individuals receiving direct health care, enabling or population-based services, who have as their primary source of coverage:
   - Column (c): Title XIX (includes Medicaid expansion under Title XXI)
   - Column (d): Title XXI
   - Column (e): Private or other coverage
   - Column (f): None
   - Column (g): Unknown

These may be estimates. If individuals are covered by more than one source of insurance, they should be listed under the column of their primary source.

- Related Activity 2:

Specify the primary Healthy People 2020 objectives(s) (up to three) which this project addresses:

a.
b.
c.

Coordination (List the State, local health agencies or other organizations involved in the project and their roles)

Evaluation (briefly describe the methods which will be used to determine whether process and outcome objectives are met, be sure to tie to evaluation from FOA.)

Quality Improvement Activities

B. Continuing Grants ONLY

1. Experience to Date (For continuing projects ONLY):
2. Website URL and annual number of hits
   a. _________ Number of web hits
   b. _________ Number of unique visitors

VI. KEY WORDS

VII. ANNOTATION
INSTRUCTIONS FOR THE COMPLETION OF FORM 6
PROJECT ABSTRACT

NOTE: All information provided should fit into the space provided in the form. The completed form should be no more than 3 pages in length. Where information has previously been entered in forms 1 through 5, the information will automatically be transferred electronically to the appropriate place on this form.

Section I – Project Identifier Information
Project Title: Displays the title for the project.
Project Number: Displays the number assigned to the project (e.g., the grant number)
E-mail address: Displays the electronic mail address of the project director

Section II – Budget
These figures will be transferred from Form 1, Lines 1 through 5.

Section III - Types of Services
Indicate which type(s) of services your project provides, checking all that apply.

Section IV – Program Description OR Current Status (DO NOT EXCEED THE SPACE PROVIDED)
A. New Projects only are to complete the following items:
1. A brief description of the project and the problem it addresses, such as preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children; and services for Children with Special Health Care Needs.
2. Provide up to 5 aims of the project, in priority order. Examples are: To reduce the barriers to the delivery of care for pregnant women, to reduce the infant mortality rate for minorities and “services or system development for children with special healthcare needs.” MCHB will capture annually every project’s top aims in an information system for comparison, tracking, and reporting purposes; you must list at least 1 and no more than 5 aims. For each goal, list the key related activities. The aims and activities must be specific and time limited (i.e., Aim 1: increase providers in area trained in providing quality well-child visits by 10% by 2017 through 1. trainings provided at state pediatric association and 2. on-site technical assistance).
3. Displays the primary Healthy People 2020 goal(s) that the project addresses.
4. Describe the programs and activities used to reach aims, and comment on innovation, cost, and other characteristics of the methodology, proposed or are being implemented. Lists with numbered items can be used in this section.
5. Describe the coordination planned and carried out, in the space provided, if applicable, with appropriate State and/or local health and other agencies in area(s) served by the project.
6. Briefly describe the evaluation methods that will be used to assess the success of the project in attaining its aims and implementing activities.

B. For continuing projects ONLY:
1. Provide a brief description of the major activities and accomplishments over the past year (not to exceed 200 words).
2. If applicable, provide the number of hits by unique visitors to the website (or section of website) funded by MCHB for the past year.

Section V – Key Words
Provide up to 10 key words to describe the project, including populations served. Choose key words from the included list.

Section VI – Annotation
Provide a three- to five-sentence description of your project that identifies the project’s purpose, the needs and problems, which are addressed, the aims of the project, the related activities which will be used to meet the aims, and the materials, which will be developed.

PROJECT SUMMARY

Section 1 – Project Service Focus
Select all that apply

Section 2 – Project Scope
Choose the one that best applies to your project.

Section 3 – Grantee Organization Type
Choose the one that best applies to your organization.

Section 4 – Project Infrastructure Focus
If applicable, choose all that apply.

Section 5 – Demographic Characteristics of Project Participants
Indicate the service level for the grant program. Multiple selections may be made. Please fill in each of the cells as appropriate.

Direct Health Care Services are those services generally delivered one-on-one between a health professional and a patient in an office, clinic or emergency room which may include primary care physicians, registered dietitians, public health or visiting nurses, nurses certified for obstetric and pediatric primary care, medical social workers, nutritionists, dentists, sub-specialty physicians who serve children with special health care needs, audiologists, occupational therapists, physical therapists, speech and language therapists, specialty registered dietitians. Basic services include what most consider ordinary medical care, inpatient and outpatient medical services, allied health services, drugs, laboratory testing, x-ray services, dental care, and pharmaceutical products and services. State Title V programs support - by directly operating programs or by funding local providers - services such as prenatal care, child health including immunizations and treatment or referrals, school health and family planning. For CSHCN, these services include specialty and sub-specialty care for those with HIV/AIDS, hemophilia, birth defects, chronic illness, and other conditions requiring sophisticated technology, access to highly trained specialists, or an array of services not generally available in most communities.

Enabling Services allow or provide for access to and the derivation of benefits from, the array of basic health care services and include such things as transportation, translation services, outreach, respite care, health education, family support services, purchase of health insurance, case management, coordination of with Medicaid, WIC and educations. These services are especially required for the low income, disadvantaged, geographically or culturally isolated, and those with special and complicated health needs. For many of these individuals, the enabling services are essential - for without them access is not possible. Enabling services most commonly provided by agencies for CSHCN include transportation, care coordination, translation services, home visiting, and family outreach. Family support activities include parent support groups, family training workshops, advocacy, nutrition and social work.

Public Health Services and Systems include preventive interventions and personal health services, developed and available for the entire MCH population of the State rather than for individuals in a one-on-one situation. Disease prevention, health promotion, and statewide outreach are major components. Common among these services are newborn screening, lead screening, immunization, Sudden Infant Death Syndrome counseling, oral health, injury prevention, nutrition and outreach/public education. These services are generally available whether the mother or child receives care in the private or public system, in a rural clinic or an HMO, and whether insured or not. The other critical aspect of Public Health Services and Systems are activities directed at improving and maintaining the health status of all women and children by providing support for development and maintenance of comprehensive health services systems and resources such as health services standards/guidelines, training, data and planning systems. Examples include needs assessment, evaluation, planning, policy development, coordination, quality assurance, standards development, monitoring, training, applied research, information systems and systems of care. In the development of systems of care it should be assured that the systems are family centered, community based and culturally competent.

II. BUDGET
1. MCHB Grant Award $__________
   (Line 1, Form 2)
2. Unobligated Balance $__________
   (Line 2, Form 2)
3. Matching Funds (if applicable) $__________
   (Line 3, Form 2)
4. Other Project Funds $__________
   (Line 4, Form 2)
5. Total Project Funds $__________
   (Line 5, Form 2)

III. CARE EMPHASIS
[ ] Interventional
[ ] Non-interventional

IV. POPULATION FOCUS
[ ] Neonates [ ] Pregnant Women
[ ] Infants [ ] Postpartum Women
[ ] Toddlers [ ] Parents/Mothers/Fathers
[ ] Preschool Children [ ] Adolescent Parents
[ ] School-Aged Children [ ] Grandparents
[ ] Adolescents [ ] Physicians
[ ] Adolescents (Pregnancy Related) [ ] Others
[ ] Young Adults (>20)

V. STUDY DESIGN
[ ] Experimental
[ ] Quasi-Experimental
[ ] Observational

VI. TIME DESIGN
[ ] Cross-sectional
[ ] Longitudinal
[ ] Mixed

VII. PRIORITY RESEARCH ISSUES ANDQUESTIONS OF FOCUS
From the Maternal and Child Health Bureau (MCHB) Strategic Research Issues: Fiscal Years (FYs) 2004 – 2009.
Primary area addressed by research:

Secondary area addressed by research:

VIII. ABSTRACT

IX. KEY WORDS

X. ANNOTATION
NOTE: All information provided should fit into the space provided in the form. Do not exceed the space provided.

Where information has previously been entered in forms 1 through 5, the information will automatically be transferred electronically to the appropriate place on this form.

Section I – Project Identifier Information

Project Title: Displays the title for the project.
Project Number: Displays the number assigned to the project (e.g., the grant number).
Project Director: Displays the name and degree(s) of the project director as listed on the grant application.
Principal Investigator: Enter the name(s) and discipline(s) of the principal investigator(s).

Section II – Budget

The amounts for Lines 1 through 5 will be transferred from Form 1, Lines 1 through 5.

Section III – Care Emphasis

Indicate whether the study is interventional or non-interventional.

Section IV – Population Focus

Indicate which population(s) are the focus of the study. Check all that apply.

Section V – Study Design

Indicate which type of design the study uses.

Section VI – Time Design

Indicate which type of design the study uses.

Section VII – Priority Research Issues and Questions of Focus (DO NOT EXCEED THE SPACE PROVIDED)

Provide a brief statement of the primary and secondary (if applicable) areas to be addressed by the research. The topic(s) should be from those listed in the Maternal and Child Health Bureau (MCHB) Strategic Research Issues: Fiscal Years (FYs) 2004 – 2009.

Section VIII – Abstract

Section IX - Key Words

Provide up to 10 key words to describe the project, including populations served. A list of key words used to classify active projects is included. Choose keywords from this list when describing your project.

Section X – Annotation

Provide a three- to five-sentence description of your project that identifies the project’s purpose, the needs and problems which are addressed, the aims of the project, the related activities which will be used to meet the stated aims, and the materials, which will be developed.

INSTRUCTIONS FOR THE COMPLETION OF FORM 9
PERFORMANCE MEASURE TRACKING

General Instructions:

Complete all required data cells. If an actual number is not available, make an estimate. Please explain all estimates in a footnote. If neither actual data nor an estimate can be provided, the State must provide a footnote that describes a time framed plan for providing the required data. In such cases, the Annual Performance Objective and Annual Performance Indicator lines are to be left blank.

This form serves two purposes: 1) to show performance measures with 5-year planned performance objective targets for the application, and 2) the performance Annual Performance Indicator, values actually achieved each year for the annual report for each performance measure.

For each program (i.e., Healthy Start, Research, LEND, etc.) there are appropriate, required Performance Measures. Under the applicable FY heading, each project will complete the Annual Performance Objectives, the Annual Performance Indicators, and numerator and denominator data for each measure as described below under Specific Instructions. For project developed additional performance measures, enter these data on the form beginning with the first blank Performance Measure area under the national measure(s).

Specific Instructions:

In the first available space under “Performance Measure” on the appropriate form, enter the brief title of the project performance measure that has been selected. The titles are to be numbered consecutively with notations of “PP 1, PP 2, etc. Titles are to be written exactly as they appear on Form 10, "Project Performance/Outcome Measure Detail Sheet.”

For both national and project measures, in the lines labeled Annual Performance Objective enter a numerical value for the target the project plans to meet for the next 5 years. These values may be expressed as a number, a rate, a percentage, or yes - no

For both national and project measures, in the lines labeled Annual Performance Indicator, enter the numerical value that expresses the progress the project has made toward the accomplishment of the performance objective for the appropriate reporting year. Note that the indicator data are to go in the years column from which they were actually derived even if the data are a year behind the “reporting” year. This value is to be expressed in the same units as the performance objective: a number, a rate, a percentage, or a yes - no.

If there are numerator and denominator data for the performance measures, enter those data on the appropriate lines for the appropriate fiscal year. If there are no numerator and denominator data leave these lines empty. NOTE: Do not enter numerator and denominator data for scale measures.

Repeat this process for each performance measure. A continuation page is included. If the continuation page is used, be sure to enter the number for each listed performance measure. If there are more than six performance measures, make as many copies of the continuation page as necessary.

   Tier 2- Activities/ Activity Areas:

   Tier 3- Process Measures:

   Tier 4- Outcome Measures:

BENCHMARK DATA SOURCES:

GRANTEE DATA SOURCES:

SIGNIFICANCE:
Instructions:

This form is to be used for both the nationally required Project Performance Measures and any Outcome Measure the project chooses to add. The project can choose to add either a single component Performance measure, using Option 1, or a tiered measure, using Option 2. Complete each section as appropriate for the measure being described.

Performance Measure: Enter the narrative description of the performance or outcome measure.

Level: Select from National, State, or Grantee the most appropriate classification for the measure being described.

Category: Select from Women’s and Maternal Health, Perinatal Infant Health, Child Health, Children with Special Health Care Needs, Adolescent Health, Life Course/ Crosscutting, or Capacity Building the most appropriate classification for the measure being described.

Goal: Enter a short statement indicating what the project hopes to accomplish by tracking this measure.

Measure: Enter a brief statement of the measure with information sufficient to interpret the meaning of a value associated with it (e.g., The percent of children with special health care needs age 0 to 18 whose families have adequate private and/or public insurance to pay for needed services). The measure statement should not indicate a desired direction (e.g., an increase).

Definition: Describe how the value of the measure is determined from the data. If the value of the measure is yes/no or some other narrative indicator such as a stage 1/stage 2/stage 3, a clear description of what those values mean and how they are determined should be provided.

If using Option 2:

Tier 1: Use dichotomous yes/no for respondents to state whether work is being done in the program

Tier 2: Enter a list of related process activities related to the area of measurement that projects can select from to demonstrate what activities are being done

Tier 3: Enter the same list as in Tier 2, but with space for reporting of numerical value for each process activity selected (e.g. if Technical Assistance is selected in Tier 2, then in Tier 3, space should be provided to report number of technical assistance encounters provided)

Tier 4 or Option 1: Enter the following for outcome measures to be reported.

Numerator: If the measure is a percentage, rate, or ratio, provide a clear description of the numerator.

Denominator: If the measure is a percentage, rate, or ratio, provide a clear description of the denominator.

Units: If the measure is a percentage, rate, ratio, or scale, indicate the units in which the measure is to be expressed (e.g., 1,000, 100) on the "Number" line and type of measure (e.g., percentage, rate, ratio or scale) on "Text" line. If the measure is a narrative, indicate yes/no or stage 1, stage 2", etc. on the "Text" line and make no entry on the "Number" line.
Healthy People 2020 Objective: If the measure is related to a Healthy People 2020 objective describe the objective and corresponding number. If it relates to another benchmark data source, please describe that and include relevant information.

Grantee Data Sources: Enter the source(s) of the data used in determining the value of the measure and any issues concerning the methods of data collection or limitations of the data used.

Significance: Briefly describe why this measure is significant, especially as it relates to the Goal.

Note that the Performance Measure title and numerator and denominator data are to appear on Form 10 exactly as they appear on this Form.

Discretionary Grant Performance Measures

OMB No. 0915-0298
Expires: 06/30/2022

Attachment D:
Additional Data Elements

OMB Clearance Package

Public Burden Statement: An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control number for this project is 0915-0298. Public reporting burden for this collection of information is estimated to average 36 hours per response, including the time for reviewing instructions, searching existing data sources, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to HRSA Reports Clearance Officer, 5600 Fishers Lane, Room 14N-39, Rockville, Maryland, 20857.

TECHNICAL ASSISTANCE/COLLABORATION FORM – REVISED JULY 2019

DEFINITION: Technical Assistance/Collaboration refers to mutual problem solving and collaboration on a range of issues, which may include program development, clinical services, collaboration, program evaluation, needs assessment, and policy & guidelines formulation. It may include administrative services, site visitation and review/advisory functions. Collaborative partners might include State or local health agencies, and education or social service agencies. Faculty may serve on advisory boards to develop &/or review policies at the local, State, regional, national or international levels. The technical assistance (TA) effort may be a one-time or on-going activity of brief or extended frequency. The intent of the measure is to illustrate the reach of the training program beyond trainees.

Provide the following summary information on ALL TA provided:

<table>
<thead>

\(^1\) A ‘central’ role refers to those that regularly participate in on-going training activities such as acting as a preceptors; teaching core courses; and participating in other core leadership training activities that would be documented in the progress reports.
Trainee Information (Long–term Trainees Only) – REVISED JULY 2019

Definition: Long-term trainees (those with greater than or equal to 300 contact hours within the training program) benefiting from the training grant (including those who received MCH funds and those who did not).

Total Number of long-term trainees participating in the training program* __________

Name
Ethnicity
Race
Gender
Address (For supported trainees ONLY)
  City
  State
  Country
Discipline(s) upon Entrance to the Program
Degree(s)
Degree Program in which enrolled
Received financial MCH support? [ ] Yes [ ] No Amount: $____________________
If yes… [ ] Stipend [ ] Tuition [ ] Stipend and Tuition [ ] Other
Type: [ ] Non-Degree Seeking [ ] Undergraduate [ ] Masters
      [ ] Pre-doctoral [ ] Doctoral [ ] Post-doctoral
Student Status: [ ] Part-time student [ ] Full-time student

Epidemiology training grants ONLY
Length of time receiving support: __________
Research Topic or Title________________________________________________________

*All long-term trainees participating in the program, whether receiving MCH stipend support or not.
Former Trainee Information

The following information is to be provided for each long-term trainee who completed the Training Program 2 years and 5 years prior to the current reporting year.

Definition of Former Trainee = Long-term trainees who completed a long-term (greater than or equal to 300 contact hours) MCH Training Program 2 years and 5 years ago, including those who received MCH funds and those who did not.

☐ Project does not have any trainees who have completed the Training Program 2 years prior to current reporting year.

☐ Project does not have any trainees who have completed the Training Program 5 years prior to current reporting year.

- Post-secondary setting
- Government agency
- Clinical health care setting (includes hospitals, health centers and clinics)
- Private sector
- Other (specify)

** The term “underserved” refers to “Medically Underserved Areas and Medically Underserved Populations with shortages of primary medical care, dental or mental health providers. Populations may be defined by geographic (a county or service area) or demographic (low income, Medicaid-eligible populations, cultural and/or linguistic access barriers to primary medical care services) factors. The term “vulnerable groups,” refers to social groups with increased relative risk (i.e. exposure to risk factors) or susceptibility to health-related problems. This vulnerability is evidenced in higher comparative mortality rates, lower life expectancy, reduced access to care, and diminished quality of life.

Vulnerable Groups refers to social groups with increased relative risk (i.e. exposure to risk factors) or susceptibility to health-related problems. This vulnerability is evidenced in higher comparative mortality rates, lower life expectancy, reduced access to care, and diminished quality of life. (i.e., Immigrant Populations, Tribal Populations, Migrant Populations, Uninsured Populations, Individuals Who Have Experienced Family Violence, Homeless, Foster Care, HIV/AIDS, etc.)

MCH TRAINING PROGRAM TRAINEE FOLLOW-UP SURVEY

Contact / Background Information

*Name (first, middle, last):

Previous Name (if used while enrolled in the training program):

*Address:

City State Zip

Phone:

Primary Email:

Permanent Contact Information (someone at a different address who will know how to contact you in the future, e.g., parents)

*Name of Contact:

Relationship:

*Address:

City State Zip

Phone:

What year did you complete the MCH Training Program? _______

Degree(s) earned while participating in the MCH Training Program ___________ (a pick list will be provided—same as the one provided in the EHB faculty information form)

Ethnicity: (choose one)

Hispanic is an ethnic category for people whose origins are in the Spanish-speaking countries of Latin America or who identify with a Spanish-speaking culture. Individuals who are Hispanic may be of any race.

___ Hispanic or Latino
___ Not Hispanic or Latino
___ Unrecorded

Race: (choose one)

___ American Indian and Alaskan Native refer to people having origins in any of the original peoples of North and South America (including Central America), and who maintain tribal affiliation or community attachment. Tribe: __________

___ Asian refers to people having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinent (e.g., Asian Indian).

___ Black or African American refers to people having origins in any of the Black racial groups of Africa.

___ Native Hawaiian and Other Pacific Islander refers to people having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands.

___ White refers to people having origins in any of the original peoples of Europe, the Middle East, or North Africa.

___ More than One Race includes individuals who identify with more than one racial designation.

___ Unrecorded is included for individuals who do not indicate their racial category.
Survey
Please answer all of the following questions as thoroughly as possible. When you have filled out the entire survey, return it to your Center/Program.

1. What best describes your current employment setting:
   __ Student
   __ Schools or school system (includes EI programs, elementary and secondary)
   __ Post-secondary setting
   __ Government agency
   __ Clinical health care setting (includes hospitals, health centers and clinics)
   __ Private sector
   __ Other: please specify: ______________________________________

2. Do you currently work in a public health organization or agency (including Title V)?  Y/N

3. Does your current work focus on Maternal and Child Health (MCH) populations (i.e., women, infants and children, adolescents, young adults, and their families including fathers, and children or young adults with special health care needs?)
   __ yes
   __ no

4. Does your current work focus on populations considered to be underserved or vulnerable52 (e.g., immigrant, tribal, migrant, or uninsured populations, individuals who have experienced family violence, homeless, foster care, HIV/AIDS, people with disabilities)
   __ yes
   __ no

5. Have you done any of the following activities since completing your training program? (check all that apply)
   __ a. Participated on any of the following as a group leader, initiator, key contributor or in a position of influence/authority: committees of state, national or local organizations; task forces; community boards; advocacy groups; research societies; professional societies; etc.
   __ b. Served in a clinical position of influence (e.g. director, senior therapist, team leader, etc.)
   __ c. Provided consultation or technical assistance in MCH areas
   __ d. Taught/mentored in my discipline or other MCH related field
   __ e. Conducted research or quality improvement on MCH issues
   __ f. Disseminated information on MCH Issues (e.g., Peer reviewed publications, key presentations, training manuals, issue briefs, best practices documents, standards of care)
   __ g. Served as a reviewer (e.g., for a journal, conference abstracts, grant, quality assurance process) (ac, c)
   __ h. Procured grant and other funding in MCH areas
   __ i. Conducted strategic planning or program evaluation

52 The term “underserved” refers to “Medically Underserved Areas and Medically Underserved Populations with shortages of primary medical care, dental or mental health providers. Populations may be defined by geographic (a county or service area) or demographic (low income, Medicaid-eligible populations, cultural and/or linguistic access barriers to primary medical care services) factors. The term “vulnerable groups,” refers to social groups with increased relative risk (i.e. exposure to risk factors) or susceptibility to health-related problems. This vulnerability is evidenced in higher comparative mortality rates, lower life expectancy, reduced access to care, and diminished quality of life.
j. Participated in public policy development activities (e.g., Participated in community engagement or coalition building efforts, written policy or guidelines, provided testimony, educated policymakers, etc.)

k. None

6. If you checked any of the activities above, in which of the following settings or capacities would you say these activities occurred? (check all that apply)

   - a. Academic
   - b. Clinical
   - c. Public Health
   - d. Public Policy & Advocacy

7. Have you done any of the following interdisciplinary activities since completing your training program? (check all that apply)

   - a. Sought input or information from other professions or disciplines to address a need in your work
   - b. Provided input or information to other professions or disciplines.
   - c. Developed a shared vision, roles and responsibilities within an interdisciplinary group.
   - d. Utilized that information to develop a coordinated, prioritized plan across disciplines to address a need in your work
   - e. Established decision-making procedures in an interdisciplinary group.
   - f. Collaborated with various disciplines across agencies/entities
   - g. Advanced policies & programs that promote collaboration with other disciplines or professions
   - h. None

(end of survey)

Confidentiality Statement

Thank you for agreeing to provide information that will enable your training program to track your training experience and follow up with you after the completion of your training. Your input is critical to our own improvement efforts and our compliance with Federal reporting requirements. Please know that your participation in providing information is entirely voluntary. The information you provide will only be used for monitoring and improvement of the training program. Please also be assured that we take the confidentiality of your personal information very seriously. We very much appreciate your time and assistance in helping to document outcomes of the Training Program. We look forward to learning about your academic and professional development.
Medium Term Trainees

DEFINITION: Medium term trainees are trainees with 40 - 299 contact hours in the current reporting year.

**Continuing Education Form**

Continuing Education is defined as continuing education programs or trainings that serve to enhance the knowledge and/or maintain the credentials and licensure of professional providers. Training may also serve to enhance the knowledge base of community outreach workers, families, and other members who directly serve the community. Additional details about CE activities will be collected in the annual progress report.

A. Provide information related to the total number of CE activities provided through your training program last year.

| Total Number of CE Participants |  
| Total Number of CE Sessions/Activities |

Number of CE Sessions/Activities by Primary Target Audience

| Number of Within Your State CE Activities |  
| Number of CE Activities With Another State |  
| Number of Regional CE Activities |  
| Number of National CE Activities |  
| Number of International CE Activities |

Number of CE Sessions/Activities for which Credits are Provided

B. Topics Covered in CE Activities  *Check all that apply*

- Clinical Care-Related (including medical home)
- Diversity or Cultural Competence-Related
- Data, Research, Evaluation Methods (Knowledge Translation)
- Family Involvement
- Interdisciplinary Teaming
- Healthcare Workforce Leadership
- Policy
- Prevention
- Systems Development/ Improvement

- Women’s Reproductive/ Perinatal Health
- Early Childhood Health/ Development (birth to school age)
- School Age Children
- Adolescent Health
- CSHCN/ Developmental Disabilities
- Autism
- Emergency Preparedness
- Health Information Technology
- Mental Health
- Nutrition
- Oral Health
- Patient Safety
- Respiratory Disease
- Vulnerable Populations*
- Health Disparities
- Health care financing
- Other (specify) ________________________________

*“Vulnerable populations” refers to social groups with increased relative risk (i.e., exposure to risk factors) or susceptibility to health-related problems. This vulnerability is evidenced in higher comparative mortality rates, lower life expectancy, reduced access to care, and diminished quality of life. MCH PIPELINE PROGRAM GRADUATE FOLLOW-UP QUESTIONS – NEW SURVEY

Please answer all of the following questions as thoroughly as possible. When you have filled out the entire survey, return it to your Pipeline Program Director.

What year did you graduate from the MCH Pipeline Program? _________

1. Are you currently enrolled or have you completed a graduate school program that is preparing you to work with the MCH population?
   
   □ Yes
   □ No

   NOTE: Graduate programs preparing graduate students to work in the MCH population include:

   Medicine (e.g., Pediatric, Ob/Gyn, Primary Care), public health, MCH nutrition, public health social work, MCH nursing, pediatric dentistry, psychology, health education, health administration, pediatric occupational/physical therapy, speech language pathology.

2. Have you worked with Maternal and Child Health (MCH) populations since graduating from the MCH Pipeline Training Program? (i.e., women, infants and children, adolescents, young adults, and their families, including fathers, and children and youth with special health care needs)?

   □ Yes
   □ No

3. Have you worked with populations considered to be underserved or vulnerable since graduating from the MCH Pipeline Training program? (e.g., Immigrant Populations, Tribal Populations, Migrant Populations, Uninsured Populations, Individuals Who Have Experienced Family Violence, Homeless, Foster Care, HIV/AIDS, health disparities, etc.)

   □ Yes
   □ No

53 The term “underserved” refers to “Medically Underserved Areas and Medically Underserved Populations with shortages of primary medical care, dental or mental health providers. Populations may be defined by geographic (a county or service area) or demographic (low income, Medicaid-eligible populations, cultural and/or linguistic access barriers to primary medical care services) factors. The term "vulnerable groups," refers to social groups with increased relative risk (i.e., exposure to risk factors) or susceptibility to health-related problems. This vulnerability is evidenced in higher comparative mortality rates, lower life expectancy, reduced access to care, and diminished quality of life.
