

HRSA's Maternal, Infant, and Early Childhood Home Visiting Program (MIECHV)

- Supports the [Alaska Home Visiting Program](#) and provides voluntary, evidence-based home visiting programs for at-risk pregnant women and families with children through kindergarten entry
- Builds upon decades of scientific research showing that home visits by a nurse, social worker, early childhood educator, or other trained professional during pregnancy and in the first years of a child's life helps prevent child abuse and neglect, supports positive parenting, improves maternal and child health, and promotes child development and school readiness

Alaska Serves a High-Risk Population

MIECHV Program awardees serve high-risk populations. Awardees tailor their programs to serve populations of need within their state.

- 100% of households were low income
- 19.5% of households included pregnant teens
- 13.0% of households included someone who used tobacco products in the home

Evidence-Based Home Visiting Models in AK

[Nurse-Family Partnership](#)

Alaska Performance Highlights

- **Increased Parent Support:** Expanded parent-to-parent support by launching a monitored, closed Facebook group with over 100 members and alumni
- **Well Child Visits:** 95.7% of children enrolled in home visiting received their last recommended well child visit based on the American Academy of Pediatrics schedule
- **Postpartum Care:** 92.5% of mothers enrolled in home visiting received a postpartum visit with a healthcare provider within 8 weeks of delivery
