

Alaska's MIECHV Program FY 2019

HRSA's Maternal, Infant, and Early Childhood Home Visiting (MIECHV) Program

- Supports the [Alaska Home Visiting Program](#) and provides voluntary, evidence-based home visiting programs for at-risk pregnant women and families with children through kindergarten entry
- Builds upon decades of scientific research showing that home visits by a nurse, social worker, early childhood educator, or other trained professional during pregnancy and in the first years of a child's life helps prevent child abuse and neglect, supports positive parenting, improves maternal and child health, and promotes child development and school readiness

Alaska Targets Community Needs

MIECHV Program awardees serve high-risk populations. Awardees tailor their programs to serve populations of need within their state.

- 69.2% of households were low income
- 19.8% of households included pregnant teens
- 10.3% of households reported a history of child abuse or maltreatment

Evidence-Based Home Visiting Models in Alaska

[Nurse-Family Partnership \(NFP\)](#)

Alaska Performance Highlights

- **Well Child Visits:** 94.9 % of children enrolled in home visiting received their last recommended well child visit based on the American Academy of Pediatrics schedule
- **Continuity of Insurance Coverage:** 87.7% of caregivers enrolled in home visiting had continuous health insurance coverage for at least 6 consecutive months
