

Maternal, Infant, and Early Childhood Home Visiting Program

The Maternal, Infant, and Early Childhood Home Visiting Program (MIECHV) gives at-risk pregnant women and families necessary resources and skills to raise children who are physically, socially, and emotionally healthy and ready to succeed.

In FY 2018

The MIECHV Program served over **150,000** parents and children and provided more than **930,000** home visits.

The MIECHV Program funds states, territories, and tribal entities to develop and implement evidence-based, voluntary programs that best meet the needs of their communities.

BENCHMARKS

Improved maternal and newborn health

Improved school readiness and achievement

Improved family economic self-sufficiency

Reduced child injuries, abuse, and neglect

Reduced crime or domestic violence

Improved coordination and referrals for community resources

The MIECHV Program serves many of the most vulnerable families. In FY 2018, states and territories reported that:

71%

of participating families had household incomes at or below 100 percent of the Federal poverty guidelines (\$25,100 for a family four)

65%

of adult program participants had a high school diploma or less

Families served by the MIECHV Program were at risk for poor family and child outcomes. In FY 2018, states and territories reported that:

13%

of new enrolled households included pregnant teens

13%

of new enrolled households reported substance abuse

19%

of new enrolled households reported a history of child abuse and maltreatment

The MIECHV Program's impact on parents and their children in FY 2018:

DEPRESSION SCREENING

78%

of MIECHV caregivers were screened for depression within 3 months of enrollment or 3 months of delivery

SCHOOL READINESS

70%

of children enrolled in MIECHV had a family member who read, told stories, and/or sang with them on a daily basis

DEVELOPMENTAL SCREENING

74%

of children enrolled in MIECHV had a timely screening for developmental delays

INTIMATE PARTNER VIOLENCE (IPV)

82%

of MIECHV caregivers were screened for IPV within 6 months of enrollment
