North Carolina’s MIECHV Program FY 2019

HRSA’s Maternal, Infant, and Early Childhood Home Visiting (MIECHV) Program

- Supports the North Carolina Home Visiting Program and provides voluntary, evidence-based home visiting programs for at-risk pregnant women and families with children through kindergarten entry
- Builds upon decades of scientific research showing that home visits by a nurse, social worker, early childhood educator, or other trained professional during pregnancy and in the first years of a child’s life helps prevent child abuse and neglect, supports positive parenting, improves maternal and child health, and promotes child development and school readiness

North Carolina Targets Community Needs

MIECHV Program awardees serve high-risk populations. Awardees tailor their programs to serve populations of need within their state.

- 66.9% of households were low income
- 25.3% of households included someone who used tobacco products in the home
- 13.8% of households reported a history of substance abuse

North Carolina Performance Highlights

- **Depression Screening:** 97.5% of caregivers enrolled in home visiting were screened for depression within 3 months of enrollment or within 3 months of delivery
- **Postpartum Care:** 87.8% of mothers enrolled in home visiting received a postpartum visit with a healthcare provider within 8 weeks of delivery
- **The 2018 Inaugural North Carolina Home Visiting Summit:** Workshop sessions included child behavior and development, continuous quality improvement, preventing domestic violence, family engagement, and maternal and infant mental health. Over 250 home visitors were in attendance.

Evidence-Based Home Visiting Models in North Carolina

- Healthy Families America (HFA)
- Nurse-Family Partnership (NFP)
