

## HRSA's Maternal, Infant, and Early Childhood Home Visiting (MIECHV) Program

- Supports the [Nevada Home Visiting Program](#) and provides voluntary, evidence-based home visiting programs for at-risk pregnant women and families with children through kindergarten entry
- Builds upon decades of scientific research showing that home visits by a nurse, social worker, early childhood educator, or other trained professional during pregnancy and in the first years of a child's life helps prevent child abuse and neglect, supports positive parenting, improves maternal and child health, and promotes child development and school readiness

## Nevada Serves a High-Risk Population

MIECHV Program awardees serve high-risk populations. Awardees tailor their programs to serve populations of need within their state.

- 64.1% of households were low income
- 16.9% of households included someone who used tobacco products in the home
- 12.2% of households included a child with developmental delays or disabilities

## Nevada Performance Highlights

- **Serving Women who are incarcerated:** Partnered with the Washoe County Jail to provide voluntary home visiting using the Parents as Teachers curriculum to pregnant women who are incarcerated, and encourage enrollment and continuation of services once released.
- **Behavioral Concerns:** Caregivers were asked if they had any concerns regarding their child's development, behavior, or learning in 95.8% of postpartum home visits
- **Depression Screening:** 86.0% of caregivers enrolled in home visiting were screened for depression within 3 months of enrollment or within 3 months of delivery
