

HRSA's Maternal, Infant, and Early Childhood Home Visiting (MIECHV) Program

- Supports the [New York Home Visiting Program](#) and provides voluntary, evidence-based home visiting programs for at-risk pregnant women and parents with young children up to kindergarten entry
- Builds upon decades of scientific research showing that home visits by a nurse, social worker, early childhood educator, or other trained professional during pregnancy and in the first years of a child's life helps prevent child abuse and neglect, supports positive parenting, improves maternal and child health, and promotes child development and school readiness

New York MIECHV Program At-a-Glance

■ **Rural counties:**
None

■ **Non-rural counties:**
Bronx, Chemung, Dutchess,
Erie, Kings, Monroe, Nassau,
Onondaga, Queens,
Schenectady

Participants
5,693

Households
3,015

Home Visits
38,117

New York Serves a High-Risk Population

MIECHV Program awardees serve high-risk populations. Awardees tailor their programs to serve populations of need within their state.

- 17.7% of households included someone with low student achievement
- 17.2% of households reported a history of child abuse or maltreatment
- 13.4% of households included pregnant teens

New York Performance Highlights

- **Behavioral Concerns:** Caregivers were asked if they had any concerns regarding their child's development, behavior, or learning in 99.4% of postpartum home visits
- **Depression Screening:** 96.7% of caregivers enrolled in home visiting were screened for depression within 3 months of enrollment or within 3 months of delivery
