

New York's MIECHV Program FY 2019

HRSA's Maternal, Infant, and Early Childhood Home Visiting (MIECHV) Program

- Supports the [New York Home Visiting Program](#) and provides voluntary, evidence-based home visiting programs for at-risk pregnant women and families with children through kindergarten entry
- Builds upon decades of scientific research showing that home visits by a nurse, social worker, early childhood educator, or other trained professional during pregnancy and in the first years of a child's life helps prevent child abuse and neglect, supports positive parenting, improves maternal and child health, and promotes child development and school readiness

New York Targets Community Needs

MIECHV Program awardees serve high-risk populations. Awardees tailor their programs to serve populations of need within their state.

- 55.4% of households were low income
- 15.9% of households reported a history of child abuse or maltreatment
- 13.8% of households included someone with low student achievement

New York Performance Highlights

- **Depression Screening:** 98.2% of caregivers enrolled in home visiting were screened for depression within 3 months of enrollment or within 3 months of delivery
- **Intimate Partner Violence (IPV) Screening:** 91.8% of caregivers enrolled in home visiting were screened for IPV within 6 months of enrollment
