Oklahoma’s MIECHV Program FY 2019

HRSA’s Maternal, Infant, and Early Childhood Home Visiting (MIECHV) Program

- Supports the Oklahoma Home Visiting Program and provides voluntary, evidence-based home visiting programs for at-risk pregnant women and families with children through kindergarten entry
- Builds upon decades of scientific research showing that home visits by a nurse, social worker, early childhood educator, or other trained professional during pregnancy and in the first years of a child’s life helps prevent child abuse and neglect, supports positive parenting, improves maternal and child health, and promotes child development and school readiness

Oklahoma MIECHV Program At-a-Glance

Rural counties: None
Non-rural counties: Oklahoma, Tulsa

Participants: 1,771
Households: 916
Home Visits: 10,282

Oklahoma Targets Community Needs

MIECHV Program awardees serve high-risk populations. Awardees tailor their programs to serve populations of need within their state.

- 87.6% of households were low income
- 26.4% of households included someone with low student achievement
- 16.4% of households included someone who used tobacco products in the home

Oklahoma Performance Highlights

- **Intimate Partner Violence (IPV) Screening:** 90.7% of caregivers enrolled in home visiting were screened for IPV within 6 months of enrollment
- **Well Child Visit:** 87.4% of children enrolled in home visiting received their last recommended well child visit based on the American Academy of Pediatrics schedule

Evidence-Based Home Visiting Models in Oklahoma

- Nurse-Family Partnership (NFP)
- Parents as Teachers (PAT)
- SafeCare Augmented
