## INSTRUCTIONS FOR THE COMPLETION OF FORM 5

### NUMBER OF INDIVIDUALS SERVED (UNDUPLICATED) By Type of Individual and Source of Primary Insurance Coverage For Projects Providing Direct Health Care, Enabling or Population-based Services

Enter data into all required (unshaded) data cells. If an actual number is not available, make an estimate. Please explain all estimates, in a note.

**Note** that ages are expressed as either x to y, (i.e., 1 to 25, meaning from age 1 up to age 25, but not including 25) or x – y (i.e., 1 – 4 meaning age 1 through age 4). Also, symbols are used to indicate directions. For example, <1 means less than 1, or from birth up to, but not including age 1.

1. At the top of the Form, the Line Reporting Year displays the year for which the data applies.
2. In Column (a), enter the unduplicated count of individuals who received a direct service from the project regardless of the primary source of insurance coverage. These services are those that are done by any non-capacity building services and would include individuals served by total dollars reported on Form 3, Line 7. Counts of Pregnant women and Non-pregnant women should be unduplicated and reported separately in their respective lines. Counts for CSHCN can be duplicative counts of Children 1 to 21 years. CSHCN should be reported as a subset of all infants and children ages zero (0) through 21. The count for CSHCN will not be added to the overall total because their inclusion would result in a duplicated count.
3. In the remaining columns, report the percentage of those individuals receiving direct health care, enabling or population-based services, who have as their primary source of coverage:
  - Column (b): Title XIX (includes Medicaid expansion under Title XXI)
  - Column (c): Title XXI
  - Column (d): Private or other coverage
  - Column (e): None
  - Column (f): Unknown

These may be estimates. If individuals are covered by more than one source of insurance, they should be listed under the column of their primary source.
