**SIGNIFICANCE** Individuals who acquire health insurance are more likely to have access to a usual source of care, receive well child care and immunizations, to have developmental milestones monitored, and receive prescription drugs, appropriate care for asthma and basic dental services. Insured children not only receive more timely diagnosis of serious health care conditions but experience fewer avoidable hospitalizations, improved asthma outcomes and fewer missed school days.

Title V National Performance Measure #13

**SIGNIFICANCE**

Oral health is a vital component of overall health. Access to oral health care, good oral hygiene and adequate nutrition are essential components of oral health to help ensure individuals achieve and maintain oral health. Those with limited preventive oral health services access are at a greater risk for oral diseases.
