Arizona MIECHV Program FY 2023

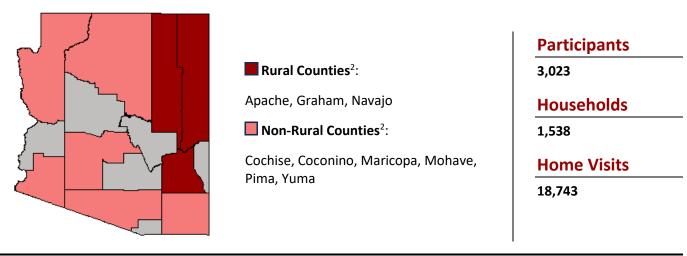

HRSA's Maternal, Infant, and Early Childhood Home Visiting (MIECHV) Program

supports the <u>Arizona Home Visiting Program</u> and provides voluntary, evidence-based home visiting programs for expectant and new parents with children through kindergarten entry age living in communities that are at-risk for poor maternal and child health outcomes¹.

Evidence-Based Home Visiting Models in Arizona: Family Spirit, Health Start (Promising Approach), Healthy Families America (HFA), Maternal Early Childhood Sustained Home-Visiting Program (MECSH), Nurse-Family Partnership (NFP), Parents as Teachers (PAT), SafeCare Augmented

Arizona MIECHV Program At-a-Glance

Arizona Prioritizes Community Needs

MIECHV Program awardees tailor their programs to serve populations of need within their state. In Arizona:

- **81.7**% of households were at or below 200% of the Federal Poverty Guidelines and **58.8**% were at or below 100% of those guidelines.
- 8.1% of households included a pregnant enrollee under age 21

Arizona Performance Highlights

MIECHV Program awardees track and report improvements in MIECHV benchmark areas every year. Awardees are required by authorizing statute to demonstrate improvement in benchmark areas every three years. In the most recent assessment following FY 2023, the Arizona MIECHV program successfully met the requirements for demonstration of improvement by improving in 5 of the 6 <u>benchmark areas</u>.

FY 2023 Performance Highlights Include:

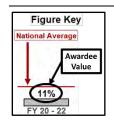

- **Safe Sleep**: 75.5% of infants enrolled in home visiting were always placed to sleep on their backs, without bed-sharing or soft bedding. Following recommended infant safe sleep practices can reduce the risk of sudden infant death syndrome (SIDS) and other sleep-related infant deaths.
- **Early Language and Literacy Activities**: 89.9% of children enrolled in home visiting had a family member who read, told stories, and/or sang with them on a daily basis. Children who are spoken to frequently by their caregivers have larger vocabularies and literacy skills, which are linked to later academic, social, and cognitive functioning.

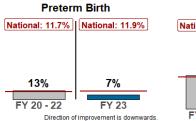

¹HRSA awarded ARP (<u>American Rescue Plan Act</u>) funds to current MIECHV awardees to address the needs of families in response to the COVID-19 pandemic.

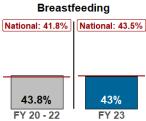

² These counties were served by MIECHV formula funds, ARP funds, or both.

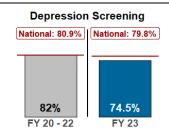

Arizona MIECHV Performance Data Compared to National MIECHV Averages

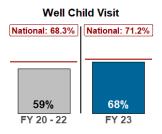

Benchmark Area 1: Maternal and Newborn Health Outcomes

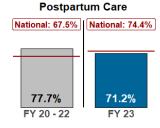

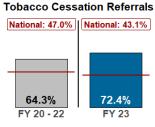

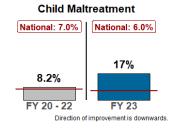

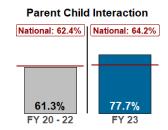

Benchmark Area 2: Child Injuries, Maltreatment, and Emergency Department Visits

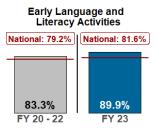

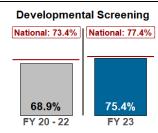

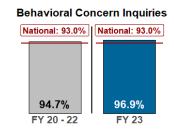

Benchmark Area 3: School Readiness and Achievement

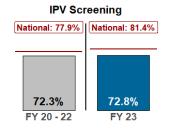

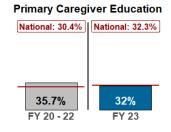

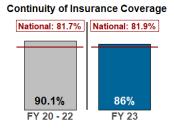

Benchmark Area 4: Crime or Domestic Violence

Benchmark Area 5: Family Economic Self Sufficiency

Benchmark Area 6: Coordination and Referrals
