Florida MIECHV Program FY 2023

HRSA's Maternal, Infant, and Early Childhood Home Visiting (MIECHV) Program

supports the <u>Florida Home Visiting Program</u> and provides voluntary, evidence-based home visiting programs for expectant and new parents with children through kindergarten entry age living in communities that are at-risk for poor maternal and child health outcomes¹.

Evidence-Based Home Visiting Models in Florida: <u>Healthy Families America (HFA)</u>, <u>Nurse-Family Partnership (NFP)</u>, <u>Parents as Teachers (PAT)</u>

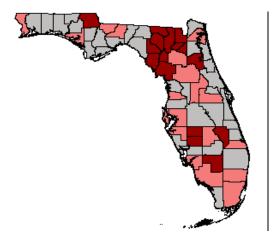

Florida MIECHV Program At-a-Glance

Rural Counties²:

Baker, Bradford, Columbia, De Soto, Dixie, Gilchrist, Hamilton, Hardee, Hendry, Jackson, Lafayette, Levy, Okeechobee, Putnam, Suwannee, Union

Non-Rural Counties²:

Alachua, Bay, Broward, Collier, Duval, Escambia, Gadsden, Hernando, Highlands, Hillsborough, Lake, Lee, Leon, Manatee, Marion, Martin, Miami Dade, Orange, Pinellas

Participants 4,473

Households

2,359

Home Visits

32,732

Florida Prioritizes Community Needs

MIECHV Program awardees tailor their programs to serve populations of need within their state. In Florida:

- **94**% of households were at or below 200% of the Federal Poverty Guidelines and **62.9**% were at or below 100% of those guidelines.
- 9% of households included a pregnant enrollee under age 21

Florida Performance Highlights

MIECHV Program awardees track and report improvements in MIECHV benchmark areas every year. Awardees are required by authorizing statute to demonstrate improvement in benchmark areas every three years. In the most recent assessment following FY 2023, the Florida MIECHV program successfully met the requirements for demonstration of improvement by improving in all 6 benchmark areas.

FY 2023 Performance Highlights Include:

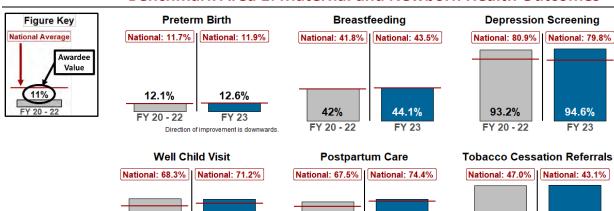

- **Depression Screening**: 94.6% of caregivers enrolled in home visiting were screened for depression within 3 months of enrollment or within 3 months of delivery. Research shows that postpartum depression can be associated with a number of adverse outcomes for both the mother and infant, such as poor parent-child bonding, negative parenting approaches, and increased risk of developmental, health, and safety concerns for the child.
- **Developmental Screening**: 91.2% of children enrolled in home visiting had a timely screening for developmental delays. Early identification, referral to necessary supports and services, and follow-up has been shown to improve the developmental trajectories of children with developmental delays or disabilities.

¹HRSA awarded ARP (<u>American Rescue Plan Act</u>) funds to current MIECHV awardees to address the needs of families in response to the COVID-19 pandemic.

² These counties were served by MIECHV formula funds, ARP funds, or both.
