

Hawaii MIECHV Program FY 2023

HRSA's Maternal, Infant, and Early Childhood Home Visiting (MIECHV) Program

supports the [Hawaii Home Visiting Program](#) and provides voluntary, evidence-based home visiting programs for expectant and new parents with children through kindergarten entry age living in communities that are at-risk for poor maternal and child health outcomes¹.

Evidence-Based Home Visiting Models in Hawaii: [Healthy Families America \(HFA\)](#), [Home Instruction for Parents of Preschool Youngsters \(HIPPI\)](#), [Parents as Teachers \(PAT\)](#)

Hawaii MIECHV Program At-a-Glance

Rural Counties²:

Hawaii, Kauai

Non-Rural Counties²:

Honolulu, Maui

Participants

1,002

Households

488

Home Visits

7,283

Hawaii Prioritizes Community Needs

MIECHV Program awardees tailor their programs to serve populations of need within their state. In Hawaii:

- **91.7%** of households were at or below 200% of the Federal Poverty Guidelines and **63.3%** were at or below 100% of those guidelines.
- **1.3%** of households included a pregnant enrollee under age 21

Hawaii Performance Highlights

MIECHV Program awardees track and report improvements in MIECHV benchmark areas every year. Awardees are required by authorizing statute to demonstrate improvement in benchmark areas every three years. In the most recent assessment following FY 2023, the Hawaii MIECHV program successfully met the requirements for demonstration of improvement by improving in 5 of the 6 [benchmark areas](#).

FY 2023 Performance Highlights Include:

- **Serving Diverse Families:** Hawaii's MIECHV local implementing agencies have succeeded in targeting services to communities who would most benefit from MIECHV services. Last year, they collectively served Native Hawaiian, Filipino, Mexican, Puerto Rican, Samoan, Micronesian, Chuukese, Pohnpeian, Yapese, and Vietnamese populations.
- **Early Language and Literacy Activities:** 99.2% of children enrolled in home visiting had a family member who read, told stories, and/or sang with them on a daily basis. Children who are spoken to frequently by their caregivers have larger vocabularies and literacy skills, which are linked to later academic, social, and cognitive functioning.

¹ HRSA awarded ARP ([American Rescue Plan Act](#)) funds to current MIECHV awardees to address the needs of families in response to the COVID-19 pandemic.

² These counties were served by MIECHV formula funds, ARP funds, or both.

Hawaii MIECHV Performance Data Compared to National MIECHV Averages

Benchmark Area 1: Maternal and Newborn Health Outcomes

Benchmark Area 2: Child Injuries, Maltreatment, and Emergency Department Visits

Benchmark Area 3: School Readiness and Achievement

Benchmark Area 4: Crime or Domestic Violence

Benchmark Area 5: Family Economic Self Sufficiency

Benchmark Area 6: Coordination and Referrals
