

HRSA's Maternal, Infant, and Early Childhood Home Visiting (MIECHV) Program

supports the [New Hampshire Home Visiting Program](#) and provides voluntary, evidence-based home visiting programs for expectant and new parents with children through kindergarten entry age living in communities that are at-risk for poor maternal and child health outcomes¹.

Evidence-Based Home Visiting Models in New Hampshire: [Healthy Families America \(HFA\)](#)

New Hampshire MIECHV Program At-a-Glance

■ Rural Counties²:

Belknap, Carroll, Cheshire, Coos, Grafton, Merrimack, Sullivan

■ Non-Rural Counties²:

Hillsborough, Rockingham, Strafford

Participants

810

Households

333

Home Visits

3,994

New Hampshire Prioritizes Community Needs

MIECHV Program awardees tailor their programs to serve populations of need within their state. In New Hampshire:

- **100%** of households were at or below 200% of the Federal Poverty Guidelines and **62.4%** were at or below 100% of those guidelines.
- **5.4%** of households included a pregnant enrollee under age 21

New Hampshire Performance Highlights

MIECHV Program awardees track and report improvements in MIECHV benchmark areas every year. Awardees are required by authorizing statute to demonstrate improvement in benchmark areas every three years. In the most recent assessment following FY 2023, the New Hampshire MIECHV program successfully met the requirements for demonstration of improvement by improving in all 6 [benchmark areas](#).

FY 2023 Performance Highlights Include:

- **Improved Data Collection and Reporting:** The New Hampshire MIECHV Program provided targeted training to staff around collection and documentation of Race, Ethnicity, and Language (REaL) data. Missing data was reduced substantially in all 3 categories: Missing Race decreased from 39% to 4%; Missing Ethnicity decreased from 38% to 4%; and Missing Language decreased from 28% to 8%.
- **Postpartum Care:** 85.3% of mothers enrolled in home visiting received a postpartum visit with a healthcare provider within 8 weeks of delivery. Many maternal deaths occur in the postpartum period and are considered preventable with appropriate follow-up care – the CDC has found that 66 percent of postpartum deaths are preventable.

¹ HRSA awarded ARP ([American Rescue Plan Act](#)) funds to current MIECHV awardees to address the needs of families in response to the COVID-19 pandemic.

² These counties were served by MIECHV formula funds, ARP funds, or both.

New Hampshire MIECHV Performance Data Compared to National MIECHV Averages

Benchmark Area 1: Maternal and Newborn Health Outcomes

Benchmark Area 2: Child Injuries, Maltreatment, and Emergency Department Visits

Benchmark Area 3: School Readiness and Achievement

Benchmark Area 4: Crime or Domestic Violence

Benchmark Area 5: Family Economic Self Sufficiency

Benchmark Area 6: Coordination and Referrals
