# **Nevada MIECHV Program FY 2023**

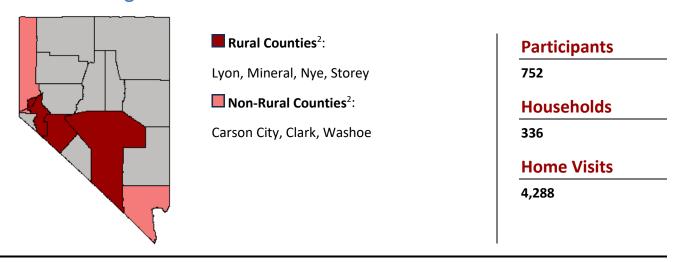

# HRSA's Maternal, Infant, and Early Childhood Home Visiting (MIECHV) Program

supports the <u>Nevada Home Visiting Program</u> and provides voluntary, evidence-based home visiting programs for expectant and new parents with children through kindergarten entry age living in communities that are at-risk for poor maternal and child health outcomes<sup>1</sup>.

**Evidence-Based Home Visiting Models in Nevada:** <u>Early Head Start—Home-Based Option</u>, <u>Home Instruction for Parents of Preschool Youngsters (HIPPY)</u>, <u>Nurse-Family Partnership (NFP)</u>, <u>Parents as Teachers (PAT)</u>

### **Nevada MIECHV Program At-a-Glance**

# **Nevada Prioritizes Community Needs**

MIECHV Program awardees tailor their programs to serve populations of need within their state. In Nevada:

- **92.1**% of households were at or below 200% of the Federal Poverty Guidelines and **52**% were at or below 100% of those guidelines.
- 9.6% of households included a pregnant enrollee under age 21

## **Nevada Performance Highlights**

MIECHV Program awardees track and report improvements in MIECHV benchmark areas every year. Awardees are required by authorizing statute to demonstrate improvement in benchmark areas every three years. In the most recent assessment following FY 2023, the Nevada MIECHV program successfully met the requirements for demonstration of improvement by improving in 5 of the 6 benchmark areas.

### FY 2023 Performance Highlights Include:

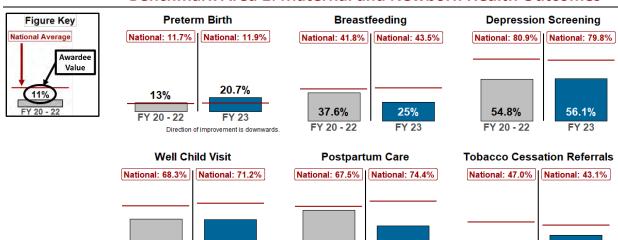

- **Early Language and Literacy Activities**: 88.1% of children enrolled in home visiting had a family member who read, told stories, and/or sang with them on a daily basis. Children who are spoken to frequently by their caregivers have larger vocabularies and literacy skills, which are linked to later academic, social, and cognitive functioning.
- Safe Sleep: 69.9% of infants enrolled in home visiting were always placed to sleep on their backs, without bedsharing or soft bedding. Following recommended infant safe sleep practices can reduce the risk of sudden infant death syndrome (SIDS) and other sleep-related infant deaths.

<sup>&</sup>lt;sup>1</sup>HRSA awarded ARP (<u>American Rescue Plan Act</u>) funds to current MIECHV awardees to address the needs of families in response to the COVID-19 pandemic.

<sup>&</sup>lt;sup>2</sup> These counties were served by MIECHV formula funds, ARP funds, or both.

### **Nevada MIECHV Performance Data Compared to National MIECHV Averages**

#### **Benchmark Area 1: Maternal and Newborn Health Outcomes**

62.3%

FY 20 - 22

50.8%

FY 20 - 22

50.4%

**FY 23**
