

Oregon MIECHV Program FY 2022

HRSA's Maternal, Infant, and Early Childhood Home Visiting (MIECHV) Program

supports the [Oregon Home Visiting Program](#) and provides voluntary, evidence-based home visiting programs for expectant and new parents with children through kindergarten entry age living in communities that are at-risk for poor maternal and child health outcomes¹.

Oregon MIECHV Program At-a-Glance

Rural counties by Funding Source:

- MIECHV: Clatsop, Jefferson, Klamath, Lincoln, Morrow, Tillamook, Umatilla, Yamhill
- ARP¹: Baker
- Both ARP & MIECHV: Malheur

Non-rural counties by Funding Source:

- MIECHV: Jackson, Lane, Marion, Multnomah

Participants

1,688

Households

921

Home Visits

11,475

Oregon Prioritizes Community Needs

MIECHV Program awardees tailor their programs to serve populations of need within their state. In Oregon:

- **73.1%** of households were at or below 100% of the Federal Poverty Guidelines
- **9.0%** of households included a pregnant enrollee under age 21

Oregon Performance Highlights

MIECHV Program awardees track and report improvements in MIECHV benchmark areas every year. Awardees are required by authorizing statute to demonstrate improvement in benchmark areas every three years. In the most recent assessment following FY 2020, the Oregon MIECHV program successfully met the requirements for demonstration of improvement by improving in 4 of the 6 MIECHV [benchmark areas](#).

FY 2022 Performance Highlights Include:

- **Depression Screening:** 73.1% of caregivers enrolled in home visiting were screened for depression within 3 months of enrollment or within 3 months of delivery. Research shows that postpartum depression can be associated with a number of adverse outcomes for both the mother and infant, such as poor parent-child bonding, negative parenting approaches, and increased risk of developmental, health, and safety concerns for the child.
- **Behavioral Concern Inquiries:** Home visitors asked caregivers if they had any concerns regarding their child's development, behavior, or learning in 97.2% of postnatal home visits. Children with behavior problems are at greater risk of entering school with lower speech and language, motor, play, and school skills. Early detection can help address concerns prior to school entry and lead to improved child outcomes.

Evidence-Based Home Visiting Models in Oregon

[Nurse-Family Partnership \(NFP\)](#)

[Healthy Families America \(HFA\)](#)

[Early Head Start-Home-Based Options](#)

¹ HRSA awarded ARP ([American Rescue Plan Act](#)) funds to current MIECHV awardees to address the needs of families in response to the COVID-19 pandemic.

Oregon MIECHV Performance Measurement Data Compared to MIECHV Averages²

Benchmark Area 1 – Maternal and Newborn Health Outcomes

Benchmark Area 2 – Child Injuries, Abuse, Neglect, and Maltreatment and Emergency Department Visits

Benchmark Area 3 – School Readiness and Achievement

Benchmark Area 4 – Crime or Domestic Violence

Benchmark Area 5 – Family Economic Self-Sufficiency

Benchmark Area 6 – Coordination and Referrals for Other Community Resources and Supports

Oregon MIECHV (FY 2022)
 Oregon MIECHV Rolling Average (FY 2019- FY 2021)
 MIECHV National Average (FY 2022)
 MIECHV National Rolling Average (FY 2019- FY 2021)

² Comparison to a three-year average minimizes the effects of outliers or potential data reporting issues specific to one year.
 * Direction for improvement in performance is downwards. **Child Injury reported as a rate
