

HRSA's Maternal, Infant, and Early Childhood Home Visiting (MIECHV) Program

supports the [Washington Home Visiting Program](#) and provides voluntary, evidence-based home visiting programs for expectant and new parents with children through kindergarten entry age living in communities that are at-risk for poor maternal and child health outcomes¹.

Evidence-Based Home Visiting Models in Washington: [Nurse-Family Partnership \(NFP\)](#), [Parents as Teachers \(PAT\)](#)

Washington MIECHV Program At-a-Glance

■ Rural Counties²:

Adams, Clallam, Grant, Grays Harbor, Island, Lewis, Mason, Okanogan

■ Non-Rural Counties²:

Benton, Clark, Cowlitz, Franklin, King, Kitsap, Pierce, Skagit, Snohomish, Spokane, Thurston, Walla Walla, Yakima

Participants

3,016

Households

1,444

Home Visits

18,572

Washington Prioritizes Community Needs

MIECHV Program awardees tailor their programs to serve populations of need within their state. In Washington:

- **94.5%** of households were at or below 200% of the Federal Poverty Guidelines and **59.2%** were at or below 100% of those guidelines.
- **12%** of households included a pregnant enrollee under age 21

Washington Performance Highlights

MIECHV Program awardees track and report improvements in MIECHV benchmark areas every year. Awardees are required by authorizing statute to demonstrate improvement in benchmark areas every three years. In the most recent assessment following FY 2023, the Washington MIECHV program successfully met the requirements for demonstration of improvement by improving in all 6 [benchmark areas](#).

FY 2023 Performance Highlights Include:

- **Early Language and Literacy Activities:** 83.3% of children enrolled in home visiting had a family member who read, told stories, and/or sang with them on a daily basis. Children who are spoken to frequently by their caregivers have larger vocabularies and literacy skills, which are linked to later academic, social, and cognitive functioning.
- **Well Child Visits:** 75.2% of children enrolled in home visiting received their last recommended well child visit based on the American Academy of Pediatrics schedule. Routine well-child check-ups prevent illness (through timely vaccinations), promote early identification of concerns, and ensure that children remain healthy.

¹ HRSA awarded ARP ([American Rescue Plan Act](#)) funds to current MIECHV awardees to address the needs of families in response to the COVID-19 pandemic.

² These counties were served by MIECHV formula funds, ARP funds, or both.

Washington MIECHV Performance Data Compared to National MIECHV Averages

Benchmark Area 1: Maternal and Newborn Health Outcomes

Benchmark Area 2: Child Injuries, Maltreatment, and Emergency Department Visits

Benchmark Area 3: School Readiness and Achievement

Benchmark Area 4: Crime or Domestic Violence

Benchmark Area 5: Family Economic Self Sufficiency

Benchmark Area 6: Coordination and Referrals
