

Division of Maternal and Child Health (MCH) Workforce Development: Healthy Tomorrows Partnership for Children Program

MISSION

The Healthy Tomorrows Partnership for Children Program (HTPCP) promotes maternal and child health (MCH) in innovative community-based programs that improve access to care and reduce health care costs through health promotion, prevention, and early intervention.

Healthy Tomorrows began in 1989 as a grant program funded and administered by the Maternal and Child Health Bureau (MCHB). A partnership was formed with the American Academy of Pediatrics in 1991 to offer technical assistance, resources and tools to HTPCP grantees and prospective applicants.

The Program's projects must represent a new initiative within the community or an innovative component that builds on existing community resources. Projects usually target vulnerable and underserved populations and address four key areas: (1) access to health care, (2) community-based health care, (3) preventive health care; and (4) service coordination.

Healthy Tomorrows grants have been awarded to a wide variety of organizations, including, but not limited to, medical centers, schools, local foundations and non-profit agencies, community-based clinics, community health centers, hospitals, and local and State health departments.

Healthy Tomorrows supports State Title V priority needs as identified in state needs assessments. Projects serve as demonstration sites, examining program interventions in areas such as: early childhood development, school readiness, medical home (including enhanced family and youth engagement), care coordination and case management, nutrition and physical activity to address overweight and obesity, oral health, mental and behavioral health, and school-based health. These focus areas advance key MCHB priorities. Projects serve as a testing ground for program innovations and models of care that will inform MCH 3.0, Affordable Care Act implementation, and Bright Futures, and build the evidence base for community-based programs.

PROGRAM PROFILE

In FY 2016, MCHB funded eight HTPCP grantees with 5-year awards totaling \$400,000. There are 39 active grants, with a total annual budget of more than \$2.2 million.

Program Impact

- ▶ **Reach.** In FY2013, HTPCP projects served 536,127 women, infants, children, youth, and families. 75% of individuals served by HTPCP projects are from racially and ethnically diverse groups.
- ▶ **Resources.** In FY2013, grantees produced a total of 103 products and publications.
- ▶ **Sustainability.** 87% of HTPCP projects are fully or partially sustained 5 or more years after federal funding ends.
- ▶ **Community Impact.** 85% of HTPCP grantees report improved children's access to care; 77% report increased visibility of the organization; 77% report enhanced family participation in services; 71% report improved children's access to a medical home; 68% report increased advocacy; and 59% report improved lives of people served.
- ▶ **Evaluation.** 65% of HTPCP grantees report that their projects are well evaluated. 78% of grantees used information collected from evaluations to improve services; 56% used information to obtain/leverage additional funding and support replication of their project; and 50% used information to advocate for their service population.
